The GM 3800 Series II engine, introduced in 1995, is quite a different engine from its predecessor, the Series I engine. While the stroke for the 3.8L engine remained at 3.4" (86 mm), and the bore remained at 3.8" (97 mm), the engine architecture changed dramatically. The deck height is shorter than the Series I, which reduced its weight and total engine package size. To make this change ...
