Agricultural Engineering is the area of engineering concerned with the design, construction and improvement of farming equipment and machinery. Agricultural engineers integrate technology with farming. For example, they design new and improved farming equipment that may work more efficiently, or perform new tasks.

Facts about Agricultural Engineering talk about the advanced technology used by the farmers to increase their crop production with fewer inputs. We can trace the development of agriculture from time to time. In the past, the farmers had to do the manual job by scattering the seeds on the soil to grow plants.
