What is AWS Lambda? - AWS Lambda

AWS Lambda - Algorithmia Developer Center

This guide currently covers NodeJS on Lambda. Until the Python Blueprint is completed, please refer to our simplified guide to Webhooks using Python on Lambda.. AWS Lambda is a compute service that runs your code in response to events and automatically manages the compute resources for you, making it easy to build applications that respond quickly to new information.

By combining AWS Lambda with other AWS services, developers can build powerful web applications that automatically scale up and down and run in a highly available configuration across multiple data centers - with zero administrative effort required for scalability, back-ups or multi-data center redundancy.

AWS Lambda confuses many people. So let's talk AWS Lambda, serverless, and how to build a scalable image processing app using AWS Lambda and Node.js.
