Notes on Educational Psychology: Nature, Scope and Methods

"While general psychology is pure science, educational psychology is its application in the field of education with the aim of socializing an individual and modifying his behavior." Anderson "Educational psychology is the systematic study of the educational growth and development of a child." Stephen

Nature of Educational Psychology: Educational psychology is a science in the sense that it uses all the methods of science for data collection, analysis and interpretation of data. Educational psychology aims at understanding, predicting and controlling human behaviour in a systematic way. As it employs all the methods of science, it is called as a positive science.
