#### *Backup Exec 21.1 Administrator's Guide - Veritas*

When attempting to add the server in Backup Exec the operation cannot be completed. I have tried using DNS, IP and the FQDN of the server. Each time it fails with the same message. I am able to ping the server by IP and DNS. The Ubuntu server didn't have a firewall running but it did have IP tables. I added the port 10000 to this.

When it comes to using AWS or Azure cloud storage, Backup Exec provides native connections that are just as easy to set up and manage as local storage. Because Backup Exec uses a native connection, the only cost is what AWS or Azure charges for their storage, which can be \$.01/MB/Month or even lower for the least expensive storage.

#### *Backup Exec*

Backup Exec integrates with Veritas Information Map - Helps organisations gain insight into their data by providing an immersive visual experience of the global information environment for an organisation. Enhanced protection for Linux virtual machines - Backup Exec users can now instantly recover any Linux virtual machine. Enhanced backup wizard when you select a Linux virtual machine from the list of servers.

#### *Backup Exec | What's New - Veritas*

Veritas Backup Exec is a data protection software product designed for customers who have mixed physical and virtual environments, and who are moving to public cloud services. Supported platforms include VMware and Hyper-V virtualization, Windows and Linux operating systems, Amazon S3, Microsoft Azure and Google cloud storage, among others.

#### *Backup Exec - Wikipedia*

Backup Exec's powerful, yet easy-to-use backup and recovery solution protects all your data no matter where it lives: whether virtual, physical or in the cloud. In a matter of minutes, you can recover anything including VMs, servers, databases, applications, files, folders and granular application objects. With Backup Exec, you can save time, get faster backups and recoveries, and reduce costs.

#### *Backup Exec subscription licensing - Veritas*

Backup Exec is a high-performance data management solution for Windows® servers networks. With its client/server design, Backup Exec provides fast, reliable backup and restore capabilities for servers, applications, and workstations across the network. Backup Exec is available in several configurations that can accommodate networks of all sizes.
