What is African American about African American literature? Why identify it as a distinct tradition? John Ernest contends that too often scholars have relied on naïve concepts of race, superficial conceptions of African American history, and the marginali

Ten years after the war on terror, the deportation of millions, and the ostensive rise of Latino political power, *Reform Without Justice* provides an analysis of both Latino migrant activism and state migration control.

Globalization and Money explores how men and women, particularly the poor and the unbanked in the global South, use money in ways that empower themselves and their families. Supriya Singh argues that money as a medium of relationships across cultures is a central component of globalization. She deftly weaves theory and individual stories to show how money is emblematic of interconnected markets, the half of the world that is unbanked, and gender disparities. She shows how men's and women's banking patterns are tied to their management of money in the household. Migrants send money home to show they care for their families and communities left behind. Yet these remittances are far from symbolic; instead they represent more than three times the total amount of official development assistance. This book illustrates how many of the most exciting changes in harnessing people's savings; widening credit and insurance; and lowering the cost of technologies, payments and money transfers are taking place in Africa, Asia, and Latin America. Singh demonstrates how strategies to help the poor and marginalized have gone global in South--South conversations, making us rethink the contours of globalization and money.

How America can achieve greater racial equality in the post-civil rights era With the election of Barack Obama as the first black president of the United States, the issue of racial justice in America occupies center stage. Have black Americans finally achieved racial justice? Is government intervention no longer required? *Racial Justice in the Age of Obama* considers con-

temporary civil rights questions and theories, and offers fresh insights and effective remedies for race issues in America today. While there are now unprecedented opportunities for talented African Americans, Roy Brooks shows that lingering deficiencies remain within the black community. Exploring solutions to these social ills, Brooks identifies competing civil rights theories and perspectives, organizing them into four distinct categories—traditionalism, reformism, limited separation, and critical race theory. After examining each approach, Brooks constructs the best civil rights theory for the Obama phase of the post-civil rights era. Brooks supports his theoretical model with strong statistics that break down the major racial groups along such demographics as income and education. He factors in the cultural and structural explanations for the nation's racial divisions, and he addresses affirmative action, the failures of integration, the negative aspects of black urban culture, and the black community's limited access to resources. The book focuses on African Americans, but its lessons are relevant for other groups, including Latinos, Asians, women, and gays and lesbians. *Racial Justice in the Age of Obama* maps out today's civil rights questions so that all groups can achieve equality at a time of unprecedented historical change.

In the first ever theoretical treatment of the environmental justice movement, David Schlosberg demonstrates the development of a new form of 'critical' pluralism, in both theory and practice. Taking into account the evolution of environmentalism and pluralism over the course of the century, the author argues that the environmental justice movement and new pluralist theories now represent a considerable challenge to both conventional pluralist thought and the practices of the major groups in the US environmental movement. Much of recent political theory has been aimed at how to acknowledge and recognize, rather than deny, the diversity inherent in contemporary life. In practice, the myriad ways people define and experience the 'environment' has given credence to a form of environmentalism that

takes difference seriously. The environmental justice movement, with its base in diversity, its networked structure, and its communicative practices and demands, exemplifies the attempt to design political practices beyond those one would expect from a standard interest group in the conventional pluralist model.

The latest volume in the Core Concepts in Higher Education series explores the complexity of law in higher education and both the limits and opportunities of how law can promote inclusivity and access on campus. Through a historical and legal framework, this volume discusses undergraduate students' histories of inclusion and struggles for social justice in higher education by race, sex, social class, dis/ability, and sexual orientation. Bridging research, theory, and practice, *Law and Social Justice in Higher Education* encourages future and current higher education and student affairs practitioners to consider how they can collaborate to further a just society. Special features: Discussion of case law illustrates the reach and limits of law and where higher education professionals can continue to push for social justice. Accessible to non-lawyers, chapters highlight key legal terms and key concepts to guide readers at the beginning of each chapter. End-of-chapter questions provide prompts for discussion and encourage student interactivity.

Understanding reentry experiences after incarceration Prison in the United States often has a revolving door, with droves of formerly incarcerated people ultimately finding themselves behind bars again. In *Beyond Recidivism*, Andrea Leverentz, Elsa Y. Chen, and Johnna Christian bring together a leading group of interdisciplinary scholars to examine this phenomenon using several approaches to research on recently released prisoners returning to their lives. They focus on the social context of reentry and look at the stories returning prisoners tell, including such key issues as when they choose to reveal (or not) their criminal histories. Drawing on contemporary studies, contributors examine the best ideas that have emerged over the last decade to understanding the challenges prisoners face upon reentering soci-

ety. Together, they present a complete picture of prisoner reentry, including real-world recommendations for policies to ensure the well-being of returning prisoners, regardless of their past mistakes.

This book should be required reading for all campus law enforcement and security professionals. Describes the factors related to the level of crime on college campuses. Topics covered include development of campus security systems, preventative measures, victimization surveys, perception of crime on campus and high definition geographic information systems.

This book breaks new ground in ensuring access to the criminal justice system for one of the most vulnerable groups in the disability sphere: those individuals who have little or no functional speech. Their voices have been silent for too long. The book provides an international perspective on violence against children and adults with disabilities. It focusses on promising practices and approaches to reduce the risks and occurrence of violence, intervention, access to justice, increase awareness, knowledge and understanding of the violence, rape and sexual abuse against people with disabilities, with an emphasis on people who have little or no functional speech. Each chapter, written by an expert on disability and/or law and peer reviewed, contains extensive information, references, resources, manuals for practice, stories and reports of people with disabilities themselves confronting the violence they experienced. They also provide whatever data and statistics there are about the prevalence, the perpetrators, and access to justice. The UN Convention on the Rights of Persons with Disabilities (CRPD) has been ratified in over 135 countries to date. Three articles from the CRPD that apply directly to the topic of violence against people with disabilities and their access to the criminal justice system are focal throughout the book.

"This edited volume highlights Latina girls' and women's perceptions of and experiences within the US juvenile, criminal, and immigration enforcement systems"--

This book is the first collection of scholarship featuring both Canadian and American scholarship on the resurgent right-wing extremist movement in the two countries. It is particularly timely given the recent rise in political populism that has engendered renewed activism from extreme right contingents. Trump's right-wing populist and white nationalist political campaign has galvanized Canadian and American white supremacist ideologies, identities, movements and practices. Leading Canadian and American scholars are

brought together to explore a contemporary array of current dynamics, patterns and characteristics associated with the movement in each country. Split into four sections, it provides an introduction to extremism in the 21st century, it examines studying extremism, forms of extremist activity and violence, and the responses. The collection allows comparisons to be drawn out from the distinct treatments of each country. It speaks to students as well as scholars in social sciences departments, including criminology, sociology, social justice, and terrorism, peace and security studies, and political-violence related programs.

The nightly news and other media provide a constant reminder of illegal drug transport over American borders and along routes between various U.S. cities. The general public is well aware that law enforcement efforts to address the foreign supply and trafficking of illegal drugs into the United States is an ongoing battle. This useful and readable compendium gives a fascinating account of how illegal drugs are transported into and around the United States and throughout its neighborhoods. Criminologist and geographer George F. Rengert takes a unique approach to the problem of illegal drug distribution and U.S. drug markets. Using maps and charts to illustrate his findings, Rengert applies spacial diffusion models to the illegal drug trade and explains why certain drugs are transported and found in different parts of the country. For example, the highest concentration of marijuana plants is not on either coast, but rather across the middle of the United States?throughout what is known as the corn belt. At the local level Rengert assesses the patterns and processes that interconnect drug sales and neighborhood deterioration and change. The book also addresses the important issues of how illegal drugs in this country operate on wholesale and retail levels and ways in which law enforcement at the federal, state, and local levels contend with this widespread problem. Using ethnographic material to provide real-life examples, Rengert explores how drug dealers on the street expand spatially and predictably in their neighborhoods. He illustrates how this knowledge helps law enforcement in efforts to get these drugs off the streets.

Europe is a multi-ethnic society experiencing a rise of anti-immigration, racist, xenophobic discourses, and right-wing political rhetoric and movements proposing legislation to further solidify structural inequality and institutionalized systems of oppression that fuel educational inequities. Social

Justice Education in European Multi-ethnic Schools brings together researchers in the fields of sociology and education to examine debates in multicultural education. Drawing on critical theory, the book takes an in-depth look at how these challenges are being addressed (or not addressed) in educational contexts and in the proposed framework of intercultural education adopted as a conceptual and educational framework by the European Union over the last two decades. The book begins with an analysis of the sociological models and theories of migration and their connection to multiculturalism and interculturalism. It engages in the current debate between multiculturalism and interculturalism, bringing to light the "political rhetoric" that fueled narratives about the "failures" of multiculturalism, which ushered in the intercultural framework. It puts forth a critical analysis of interculturalism, linking it to neoliberalism, and policies of civic integration and the concept of governmentality. Advocating for a transformative framework informed in social justice education that aims to promote more equity in schools, it critically analyzes and discusses intercultural education, the pedagogical extension of interculturalism, as per the European documents highlighting its goals, pedagogies, tensions, and challenges. Social Justice Education in European Multi-ethnic Schools will be of great interest to academics, researchers, and scholars in the fields of intercultural, multicultural, and transformative education.

Born shortly before the Civil War, activist and reformer Fannie Barrier Williams (1855-1944) became one of the most prominent educated African American women of her generation. Hendricks shows how Williams became "raced" for the first time in early adulthood, when she became a teacher in Missouri and Washington, D.C., and faced the injustices of racism and the stark contrast between the lives of freed slaves and her own privileged upbringing in a western New York village. She carried this new awareness to Chicago, where she joined forces with black and predominantly white women's clubs, the Unitarian church, and various other interracial social justice organizations to become a prominent spokesperson for Progressive economic, racial, and gender reforms during the transformative period of industrialization. By highlighting how Williams experienced a set of freedoms in the North that were not imaginable in the South, this clearly-written, widely accessible biography expands how we understand intellectual possibilities, economic success, and social mobility in post-Reconstruction America.

""The focus of this book is the potentially radical and fundamental changes that are taking place within criminal justice in Britain and in France and the ways that these are driven by wider domestic, European or international concerns. This metamorphosis away from established values and practices is eroding what were once regarded as core rights and freedoms in the name of efficiency, security and justice to victims. Beginning with a comparative analysis of adversarial and inquisitorial procedural values and traditions, and an examination of broad trends in domestic and European criminal justice, the book then discusses how the roles of prosecution and defence have been re-shaped in different ways in both jurisdictions - both in the text of the law and in their practices. The final section considers how systems within different procedural traditions adapt to address, or provide a remedy for, systemic flaws that produce wrongful convictions and in particular, the role of the defence in these procedures. By adopting a comparative approach with France, the study explores the nature and reach of these trends, the ways that they challenge and disrupt criminal processes and values and the contrasting responses that they provoke. It reveals how criminal justice traditions continue to be shaped in different ways by broader policy and political concerns; how different systems adapt, change and distort when faced with (sometimes conflicting) pressures domestically and externally; and how different procedural values may serve to structure or limit reform, and so work to facilitate or resist change. In his topical new book, *Ethical Borders*, Bill Ong Hing asks, why do undocumented immigrants from Mexico continue to enter the United States and, what would discourage this surreptitious traffic? An expert on immigration law and policy, Hing examines the relationship between NAFTA, globalization, and undocumented migration, and he considers the policy options for controlling immigration. He develops an ethical rationale for opening up the U.S./Mexican border, as well as improving conditions in Mexico so that its citizens would have little incentive to migrate. In *Ethical Borders* Hing insists that reforming NAFTA is vital to ameliorating much of the poverty that drives undocumented immigration and he points to the European Union's immigration and economic development policies as a model for North America. Hing considers the world-wide economic crisis and the social problems that attend labor migration into homogenous countries, arguing for a spectrum of changes, including stricter border enforcement and more effective

barriers; a path to citizenship for undocumented migrants; or a guest worker program. Hing also situates NAFTA and its effects in the larger, and rapidly shifting, context of globalization—particularly the recent rise of China as the world's economic giant. Showing how NAFTA's unforeseen consequences have been detrimental to Mexico, Hing passionately argues that the United States is ethically bound to address the problems in a way that puts prosperity within the grasp of all North Americans.

ETHNICITY AND CRIMINAL JUSTICE IN THE ERA OF MASS INCARCERATION: A Critical Reader on the Latino Experience is designed as a Latino reader in criminal justice, covering a much broader spectrum of the Latino experience in criminal justice and society, while giving readers a broad overview of the Latino experience in a single book. Considering the shifting trends in demographics and the current state of the criminal justice system, along with the current political "climate," this book is timely and of critical significance for the academic, political, and social arena. The authors report sound evidence that testifies to a historical legacy of violence, brutality, manipulation, oppression, marginalization, prejudice, discrimination, power, and control, and to white America's continued fear about ethnic and racial minorities, a movement that continues in the twenty-first century—as we have been witnessing during the 2015-2016 presidential race, highly charged with anti-immigrant and anti-Mexican political rhetoric. A central objective of this book is to demystify and expose the ways in which ideas of ethnicity, race, gender, and class uphold the functioning and "legitimacy" of the criminal justice system. In this mission, rather than attempting to develop a single explanation for the Latino experience in policing, the courts, and the penal system, this book presents a variety of studies and perspectives that illustrate alternative ways of interpreting crime, punishment, safety, equality, and justice. The findings reveal that race, ethnicity, gender, class, and several other variables continue to play a significant role in the legal decision-making process. With the social control (from police brutality to immigration) discourse reaching unprecedented levels, the book will have broad appeal for students, police officers, advocates/activists, attorneys, the media, and the general public.

"The calculus for mothers between working and staying at home varies across U.S. states. Lower costs and longer school days tend to help mothers return to work after giving birth. States tend to offer either better workplace protection or affordable

child care, but few states support mothers across their employment needs"--

This present book examines some of the key features of the interplay between legal history, authoritarian rule and political transitions in Brazil and other countries from the end of 20th Century until today. This book casts light on these aspects of the role of law and legal actors/institutions. In the context of transition from authoritarian rule to democratic state, Brazil has produced a significant literature on the challenges and shortcomings of the transition, but little attention has been given to the role of law and legal actors/institutions. Different approaches focus on the legal mechanisms, discourses and practices used by the military regime and by the players involved in the political transition process in Brazil. A comparative perspective that takes into account different political transitions - and their legal consequences - in Europe and Latin America complements the analysis. Part 1 (4 essays) discusses some of the central issues of political transition and legal history in contemporary Brazil, focusing on the time of the transition (and its effects on transitional justice) with different perspectives, from racial and gender issues to constitutional reform and police repression. Part 2 (3 essays) brings the comparative studies on South American experiences. Part 3 (4 essays) analyses different cases of transition to democracy in Chile, Portugal, Spain and Italy. Part 4 (3 essays) proposes a historiographical and methodological approach, considering the politics of time involved in the interplay between political transitions and legal history.

Community organizers reveal what service learning is--and what it should be.

Despite the ever-changing demographics of the United States and decisions made by the Supreme Court, racial tensions and turmoil continue to affect daily life in a multitude of environments. In educational environments, advancements in teaching technologies, in conjunction with these tensions, require a cooperation between parents and school personnel to promote student success. *Social Justice and Parent Partnerships in Multicultural Education Contexts* is a critical scholarly resource that explores the importance of cooperation between parents, teachers, and administrators to create valuable support systems

that will promote student success through strategies using social justice. Featuring coverage on a wide range of topics, such as parent collaboration, bilingualism, and community-based partnerships, this book is geared toward academicians, researchers, and teachers seeking current research on the importance of cooperation between parents and education professionals in encouraging positive student outcomes in multicultural learning environments.

This updated and expanded new edition resumes the theme of the first edition, and the findings reveal that race, ethnicity, gender, class, and several other variables continue to play a significant and consequential role in the legal decision-making process. The book is structured into three sections, each of which corresponds to a different body of work on Latinos. Section One explores the historical dynamics and influence of ethnicity in law enforcement, and focuses on how ethnicity impacts policing field practices, such as traffic stops, use of force, and the subsequent actions that police departments have employed to alleviate these problems. A detailed examination of critical issues facing Latino defendants seeks to better understand the law enforcement process. The history of immigration laws as it pertains to Mexicans and Latinos explains how Mexicans have been excluded from the United States through anti-immigrant legislation. Latino officers must cope with structural and political issues, the community, and media, as these practices and experiences within the American police system are explored. Section Two focuses on the repressive practices against Mexicans that resulted in executions, vigilantism, and mass expulsions. The topic of Latinos and the Fourth Amendment reveals that the constitutional right of people to be protected against unreasonable searches and seizures has been eviscerated for Latinos, and particularly for Mexicans. Possible remedies to existing shortcomings of the court system when processing indigent defendants are presented. Section Three studies the issue of Hispanics and the penal system. The ethnic realities of life behind bars, probation and parole, the legacy of capital punishment, and life after prison are discussed. Section Four addresses the globalization of Latinos, social control, and the future of Latinos in the U.S. Criminal justice system. Lastly, the race and ethnic experience through the lens of science, law, and the American imagination, are explored, concluding with policy recommendations for social and criminal justice reform, and ultimately humanizing differences. Written for professionals and students of law enforcement, this book will promote the unders-

tanding of the historical legacy of brutality, manipulation, oppression, marginalization, prejudice, discrimination, power and control, and white America's continued fear about racial and ethnic minorities.

This updated and expanded new edition continues its unique approach and engrossing exploration of the elements of residential burglary. Presented in five parts, the first is concerned with what is on a burglar's mind when he or she considers whether to commit a burglary and which house to choose. The second part is concerned with time and the opportunities and limits it places on both burglar and victim, while the third section probes how burglaries are fit into space and the importance of perception of space in the burglary process. The fourth section describes how burglars select a home to burglarize and uses Greenwich, Connecticut as a model to contrast target and nontarget homes. The fifth part reviews some of the "nuts and bolts" techniques and reasons for their use as described by burglars and addresses elements about housing architecture, the burglary process, and offers suggestions for controlling the problem of burglary. It concludes with a discussion of changes in our lifestyles and communities and how these changes will play out in future patterns of residential burglary. The authors draw on in-depth interviews with admitted burglars, and the inclusion of the ideas and actual words of the burglars brings the material to life. The text continues to offer the most unique overview of residential burglary. It combines ethnographic research with study of official records and combines the strengths of both approaches.

This book is about the convergence of trends in two American institutions - the economy and the criminal justice system. The American economy has radically trans-

formed in the past half-century, led by advances in automation technology that have permanently altered labor market dynamics. Over the same period, the US criminal justice system experienced an unprecedented expansion, at great cost. These costs include not only the \$80 billion annually in direct expenditures on criminal justice, but also the devastating impacts experienced by justice-involved individuals, families, and communities. This book examines these potential consequences, the meaning of work in American society, and suggests alternative redistributive and policy solutions to avert the collision course of these economic and criminal justice policy trends.

For twenty years, *Teaching for Diversity and Social Justice* has been the definitive sourcebook of theoretical foundations, pedagogical and design frameworks, and curricular models for social justice teaching practice. Thoroughly revised and updated, this third edition continues in the tradition of its predecessors to cover the most relevant issues and controversies in social justice education in a practical, hands-on format. Filled with ready-to-apply activities and discussion questions, this book provides teachers and facilitators with an accessible pedagogical approach to issues of oppression in classrooms. The revised edition also focuses on providing students the tools needed to apply their learning about these issues. Features new to this edition include: A new bridging chapter focusing on the core concepts that need to be included in all SJE practice and illustrating ways of "getting started" teaching foundational core concepts and processes. A new chapter addressing the possibilities for adapting social justice education to online and blended courses. Expanded overview sections that highlight the historical contexts and legacies of oppression, opportunities for action and change, and the intersections among forms of oppression. Added coverage of key topics for teaching social justice issues, such as establishing a positive classroom climate, institutional and social manifestations of oppression, the global implications of contemporary SJE work, and action steps for addressing injustice. New and revised material for each of the core chapters in the book complemented by fully-developed online teaching designs, including over 150 downloadable, activities, and handouts on the book's Companion Website (www.routledge/textbooks/_author/teachingfordiversity). A classic for teachers across disciplines, *Teaching for Diversity and Social Justice* presents a thoughtful, well-constructed, and inclusive foundation for engaging students in the complex and

often daunting problems of discrimination and inequality in American society.

P&P Brantingham's enormous contribution to criminology has paved the way for major theoretical and empirical developments in the understanding of crime and its respective patterns, prevention, and geometry. In this unique collection of original essays, Andresen and Kinney bring together leading scholars in the field of environmental criminology to honour the work of P&P Brantingham with new research on the geometry of crime, patterns in crime and crime generators and attractors. Chapters include new perspectives on the crime mobility triangle, electronic monitoring, illegal drug markets, the patterns of vehicle theft for export, prolific offender patterns, crime rates in hotels and motels, violent crime and juvenile crime. A final chapter gathers together a collection of letters to P&P Brantingham, from key scholars reflecting on and celebrating their important contribution. This volume provides essential readings for those interested in the field of environmental criminology.

Without proper training on the intricacies of race and culture, pre-service and in-service teachers may unwittingly continue outdated and ineffective pedagogies. As the demographics of student bodies shift

to include more diverse backgrounds, fluency in the discourse of social justice becomes necessary. The Handbook of Research on Promoting Cross-Cultural Competence and Social Justice in Teacher Education elucidates the benefits, challenges, and strategies necessary to prepare teachers to meet the needs of a diverse student body. Featuring the newest research and pedagogical tools written by diverse scholars in the field of teacher training, this expertly crafted handbook is ideal for teachers, administrators, students of education, and policymakers.

Los Angeles, California, and Berlin, Germany, have been dubbed "homeless capitals" for having the largest homeless populations of their respective countries. In this book, the author provides a comparative analysis of the impact of social welfare policy on homelessness in these cities. He addresses the opportunity of people to overcome - or "exit" - homelessness and shows how Berlin, with its considerable social and economic investment for assisting its homeless, has been as unsuccessful as Los Angeles. Drawing on ethnographic insights, the author shows how homeless people in both cities face sociospatial exclusion - legal displacement for criminal activities, poor shelters in impoverished neighborhoods, and market barriers that

restrict reintegration. Providing a wake-up call for readers, this book addresses the critical public policy issues that can produce effective services to improve homeless people's chances for a lasting exit.

This book examines whether the 2016 presidential election challenged conventional wisdom in political science or strengthened current theories. Political scientists examine topics ranging from voter trends, election issues, political parties, and congressional elections to see whether Trump's victory was truly as unconventional as many assume.

"This book culminates a career-long search for justice. I felt it important to understand what it is and where it came from as a feature of human society, of human life. I wound up in a department of education, perhaps quite fortuitously, for education enabled me to examine how experiences of justice or injustice in various educational settings shape children and young people's values, behaviors, and chances for living a decent future life"--
