For your first question: AndroidGame is an abstract class. This means it doesn't have to implement all methods of Game, as long as one of the classes extending AndroidGame does this. As you can see from the code, this is done in MrNomGame:. public class MrNomGame extends AndroidGame { public Screen getStartScreen() { return new LoadingScreen(this); } }

### I need a explanation for code of "beginning android games"

A few months ago i was contacted by Apress on wether i want to give my book Beginning Android Games another update. The fist edition was pub-

lished in April 2011, with two subsequent updates, Beginning Android 4 Games (horrible title i objected to in vein), and Beginning Android Games 2nd Edition.

### | Category | Beginning Android Games
