14 Reasons Why You Should Build A PC - Tech Guided

1. Building a Gaming PC is Cost Efficient. If you build your own computer, it will cost you less than if you bought a pre-built system from the store. You can also build a computer based on your specific wants and needs. You can build a basic PC for normal internet usage for about \$300.

Here Are All the Parts You'll Need to Build Your First ...

Building your own PC is not necessarily an inexpensive or quick proposition. But if you're willing to devote the time and resources to the project, you will end up with the best possible computer on Earth for you—and that will make everything else worthwhile.

To build a basic PC, you will need at least a motherboard, a memory module, a processor with heatsink/fan, a power supply, a hard drive and a DVD drive. Most electrically sensitive hardware comes in a static bag which is designed to protect the electronics from static electricity shock.
