Praise for Educating Nurses "This book represents a call to arms, a call for nursing educators and programs to step up in our preparation of nurses. This book will incite controversy, wonderful debate, and dialogue among nurses and others. It is a must-read for every nurse educator and for every nurse that yearns for nursing to acknowledge and reach for the real difference that nursing can make in safety and quality in health care." —Beverly Malone, chief executive officer, National League for Nursing "This book describes specific steps that will enable a new system to improve both nursing formation and patient care. It provides a timely and essential element to health care reform." —David C. Leach, former executive director, Accreditation Council for Graduate Medical Education "The ideas about caregiving developed here make a profoundly philosophical and intellectually innovative contribution to medicine as well as all healing professions, and to anyone concerned with ethics. This groundbreaking work is both paradigm-shifting and delightful to read." —Jodi Halpern, author, *From Detached Concern to Empathy: Humanizing Medical Practice* "This book is a landmark work in professional education! It is a must-read for all practicing and aspiring nurse educators, administrators, policy makers, and, yes, nursing students." —Christine A. Tanner, senior editor, *Journal of Nursing Education* "This work has profound implications for nurse executives and frontline managers." —Eloise Balasco Cathcart, coordinator, Graduate Program in Nursing Administration, New York University

Jones & Bartlett Learning 2021 *Nurse's Drug Handbook* is the most up-to-date, practical, and easy-to-use nursing drug reference. Updated annually, it provides accurate and timely facts on hundreds of drugs from A-Z. Written in a no-nonsense style that speaks your language in terms you use every day, it offers concise and consistently formatted drug entries organized alphabetically.

*Antibiotics Simplified* is a succinct guide designed to bridge knowledge gained in basic sciences courses with clinical practice in infectious diseases. Introductory chapters explain the rationale behind the treatment of infectious diseases, describe a system for selecting antimicrobial agents and briefly review basic microbiology. Later chapters present relevant characteristics of drug classes, emphasizing clinical pearls for individual agents, and also include content on antifungals. The concise nature of the text allows for emphasis on key points, allowing readers to extract the most important characteristics of anti-infective drugs from the larger mass of material that they learn from detailed pharmacology textbooks. This is an ideal handbook for students as well as practicing clinicians and pharmacists.

Previous edition has subtitle: "a nursing process approach."

While the American legal system has played an important role in shaping the field of bioethics, *Law and Bioethics* is the first book on the subject designed to be accessible to readers with little or no legal background. Detailing how the legal analysis of an issue in bioethics often differs from the "ethical" analysis, the book covers such topics as abortion, surrogacy, cloning, informed consent, malpractice, refusal of care, and organ transplantation. Structured like a legal casebook, *Law and Bioethics* includes the text of almost all the landmark cases that have shaped bioethics. Jerry Menikoff offers commentary on each of these cases, as well as a lucid introduction to the U.S. legal system, explaining federalism and underlying common law concepts. Students and professionals in medicine and public health, as well as specialists in bioethics, will find the book a valuable resource.

This practical reference was developed to meet the needs of critical care and emergency nurses, physicians, and pharmacists in administering complex drugs given by IV infusion. Presented in an easy-to-use handbook format, it contains information on how to dose and administer complex and commonly used critical care drugs. Each drug is listed with information about what its most common uses are, how to prepare the drug infusion for patient administration, the most common dosages, the most common warnings and adverse reactions, compatibility with other drug infusions, and general nursing considerations. One of its most unique features is the inclusion of calculation factors. Dosing charts allow the healthcare professional to quickly determine the appropriate dose in a matter of seconds. Drip Rate Calculation Charts and Dosing Charts allow the user to quickly see how to mix and prepare drugs that are usually needed by patients on an immediate, urgent basis. Covers 44 of the most common intravenous infusion critical care drugs. Calculation factors for each drug are unique, simplifying an otherwise complicated process and substantially reducing the chance of medication errors. Includes Nursing Considerations for each drug. This reference is not only useful for critical care nurses, but also general medicine or general surgical nurses, hospital pharmacists, physicians, cardiologists, anesthesiologists, and emergency room physicians. Blank pages in the back of the book allow readers to take notes for quick reference. New and updated drug facts, including uses, solution preparation, doses, adverse reactions, warnings, incompatibilities, compatibilities, and nursing considerations Complete coverage of the following NEW drugs: Argatroban (Acova), Bivalirudin (Angiomax), Drotrecogin Alfa (Xigris), Infliximab (Remicade), Nesiritide (Natrecor), and Pantoprazole (Protonix) Includes a new quick reference drug compatibility chart for most of the critical care drugs New coverage of antibiotic infusion rates Updated drug dosing charts Updated Drug Calculation Formula section
