This is the first comprehensive book on Military Cost-Benefit Analysis and provides novel approaches to structuring cost-benefit and affordability analysis amidst an uncertain defense environment and cloudy fiscal prospects. Lifting the veil on military Cost-Benefit Analysis, this volume offers several new practical tools designed to guide defense investments (and divestments), combined with a selection of real-world applications. The widespread employment of Cost-Benefit Analysis offers a unique opportunity to transform legacy defense forces into efficient, effective, and accountable 21st century organizations. A synthesis of economics, statistics and decision theory, CBA is currently used in a wide range of defense applications in countries around the world: i) to shape national security strategy, ii) to set acquisition policy, and iii) to inform critical investments in people, equipment, infrastructure, services and supplies. As sovereign debt challenges squeeze national budgets, and emerging threats disrupt traditional notions of security, this volume offers valuable tools to navigate the political landscape, meet calls for fiscal accountability, and boost the effectiveness of defense investments to help guarantee future peace and stability. A valuable resource for scholars, practitioners, novices and experts, this book offers a comprehensive overview of Military Cost-Benefit Analysis and will appeal to anyone interested or involved in improving national security, and will also be of general interest to those responsible for major government programs, projects or policies.

The U.S. Department of Defense accounts for over half of federal government discretionary spending and over 3% of GDP. Half of all federal employees work for the Department. The annual budget for the military not only provides for those salaries, it covers the baseline and wartime operating expenses of the force, and hundreds of billions of dollars of investment in new capabilities and technologies. Given the materiality of the defense function and amount of resources it consumes, the processes for budgeting for defense and managing the funds is important to understand. This text provides a fully integrated view of defense budgeting. It takes the position that defense budgeting is a specific instance of public budgeting, and public budgeting is a specific instance of public policy. In order to fully understand how the nation budgets for defense, it first lays a theoretical and conceptual foundation for public policy and public budgeting. That is followed by an assessment of the political and policy context for defense, including the overarching federal budget process and role of Congress in setting defense policy. Only then does the text explore the specifics of defense budgeting: how, by whom, and why the budget is crafted. Beyond the topic of budgeting - formulating, requesting, and legitimating the request for funds - the book tackles financial management topics. Included are discussions of federal appropriations law, funds management, accounting requirements, intragovernmental business transactions, and contemporary topics of defense policy such as funding overseas contingency operations in an era of deficit control legislation. This book is an appropriate reference for both students and practitioners of defense budgeting and financial management. It would also be appropriate in a general public budgeting course. Most public budgeting texts focus on state and municipal governments and there are few that address the federal system. This book fills that gap and provides a specific example of federal budgeting.

The June 2019 OMB Circular No. A-11 provides guidance on preparing the FY 2021 Budget and instructions on budget execution. Released in June 2019, it's printed in two volumes. This is Volume I. Your budget submission to OMB should build on the President's commitment to advance the vision of a Federal Government that spends taxpayer dollars more efficiently and effectively and to provide necessary services in support of key National priorities while reducing deficits. OMB looks forward to working closely with you in the coming months to develop a budget request that supports the President's vision. Most of the changes in this update are technical revisions and clarifica-

tions, and the policy requirements are largely unchanged. The summary of changes to the Circular highlights the changes made since last year. This Circular supersedes all previous versions. We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. With the importance of sustainability and its impact on the Department of Defense, CSL's National Security Issues Branch has collected works from subject matter experts who cover the topic in a variety of ways in everything from sustainability and national security to sustainability of installations. In particular, Dr. Jim Hartman's chapter, "Sustainability and National Security", examines the evolution of the Army's sustainability program and its contributions to the national strategic security objectives. The growing world population and imbalance of natural resources are expected to affect US, as well as Army, interests. Dr. Hartman asserts sustainability is the nexus to ensure future security, which can only be achieved through the development and implementation of sound business practices. Dr. Hartman opines the Army, as a large institution, is well suited to lead a whole of government approach to sustainability.
