Why are histological sections stained?

Tissue Membranes. A tissue membrane
is a thin layer or sheet of cells that cov-
ers the outside of the body (for example,
skin), the organs (for example, pericardi-
um), internal passageways that lead to
the exterior of the body (for example, ab-
dominal mesenteries), and the lining of
the moveable joint cavities. There are
two basic types of tissue membranes:
connective tissue and epithelial ...
