It is your definitely own epoch to put on an act reviewing habit. among guides you could enjoy now is **Citizenship Social Work With Older People** below.

5F2 - ADRIEL LEVY

This exciting new book provides an overview of fifteen different contemporary social work practice settings, spanning across the statutory, voluntary, private and third sectors. It serves as the perfect introduction to the various roles social workers can have and the numerous places they can work, equipping students with the knowledge, skills and values required to work in areas ranging from mental health to fostering and adoption, and from alcohol and drug treatment services to youth offending. Each chapter provides: An overview of the setting, including the role of the social worker, how service users gain access to the service and key issues, definitions or terms specific to the setting Legislation and policy guidance related to the specific setting The key theories and methods related to the setting Best practice approaches and the benefits and challenges of working within the setting Case ex-

amples illustrating the application of the information to practice Social work students will find this an invaluable handbook that they will refer to time and again throughout their education and into their assessed and supported year of employment. Contributors: Mark Baldwin, Jo Bell, Jenny Clifford, Jill Chonody, Clare Evans, Benedict Fell, Alinka Gearon, Issy Harvey, Caroline Hickman, Tony Jeffs, Debbie Martin, Malcolm Payne, Justin Rogers, Sue Taplin, Barbra Teater, John Watson, Michele Winter. "It is an excellent student introduction to this diverse profession. Full of information that provides a thought provoking read." Andrew Ellery, Social Care Professional "This book really is an excellent resource for social work students at an introductory level and for preparation for placement levels. It provides a comprehensive overview of a range of service user groups as well as specific issues such as domestic violence, homelessness and substance

use. Each section is structured around the policy and legislative context and includes comment on theory, challenges and anti-oppressive practice with case examples to aid learning. The focus on the settings within which social work is practiced is particularly welcome and provides an essential companion to introductory books which look more at values, professional behaviour and skills. The range of different settings covered provides excellent preparation for students about to start a placement. The sections on rehabilitation of offenders and self-harm highlight topics that are often given less attention but may well be encountered by students on placement. I will certainly be including this book as essential reading for students on introductory and practice preparation modules." Allan Rose, Social Work Lecturer, Brunel University, UK

Social work is a profession that is increasingly involved with issues which have a global dimension. This Handbook tackles the global/local aspect of social work in its various forms and interrogates the key concerns that societies are facing through an international lens. The contributors show that, with an appreciation of commonalities and differences, local practices and appropriate forms of international activity can be better developed. Areas covered include: - Analysis of 'International social work' - Globalisation and indigenisation - Social justice and human rights - Poverty and livelihoods - Ecological issues - Migration - Education, theory, research and practice - Social work in different settings - Religion and spirituality - Responses to disasters and conflicts - Life course perspectives - Regional perspectives - Future directions With a truly international range of contributions, the Handbook incorporates perspectives from Asia, Africa, Europe, Australasia, the Mid-

dle East and the Americas. It will be an invaluable resource for undergraduates, postgraduates, researchers and academics working in the fields of social work, social welfare, human services, and community development worldwide, as well as service providers and policy makers in the international arena.

The Demographic Transformations of Citizenship examines how attempts by contemporary states to govern demographic anxieties are shaping ideas about citizenship both as a boundary--maintaining mechanism and as an ideal of equal membership. These anxieties, while most often centred upon immigration, also stem from other demographic changes unfolding in contemporary states - most notably, the long-standing trend towards lower birth rates and consequent population ageing. With attention to such topics as control over borders, national identity, gender roles, family life and changing stages of life, Askola examines the impact of demographic changes, including but not limited to immigration. Drawing from a variety of disciplines, including law, demography, and sociology, this book discusses how efforts to manage demographic anxieties are profoundly altering ideas about citizenship and belonging.

Citizenship as a status assumes that all those encompassed by the term 'citizen' are included, albeit within the boundaries of the nation-state. Yet citizenship practices can be both inclusionary and exclusionary, with far-reaching ramifications for both nationals and non-nationals. This volume explores the concept of citizenship and its practices within particular contexts and nation-states to identify whether its claims to inclusivity are justified. This will show whether the exclusionary dimensions experienced by some citizens and non-citizens are linked to deficiencies in the concept,

country-specific policies or how it is practised in different contexts. The interrogation of citizenship is important in a globalising world where crossing borders raises issues of diversity and how citizenship status is framed. This raises the issue of human rights and their protection within the nation-state for people whose lifestyles differ from the prevailing ones. Besides highlighting the importance of human rights and social justice as integral to citizenship, it affirms the role of the nation-state in safeguarding these matters. It does so by building on Indigenous peoples' insights about linking citizenship to connections to other people and the environment and arguing for the inalienability and portability of citizenship rights guaranteed collectively through international level agreements. These issues are of particular concern to social workers given that they must act in accordance with the principles of democracy, equality and empowerment. However, citizenship issues are often inadequately articulated in social work theory and practice. This book redresses this by providing social workers with insights, knowledge, values and skills about citizenship practices to enable them to work more effectively with those excluded from enjoying the full rights of citizenship in the nation-states in which they reside.

Adult social care was the first major social policy domain in England to be transferred from the state to the market. This book meticulously charts this shift, challenges the dominant market paradigm, explores alternative models for a post-Covid-19 future and locates the debate within the wider political thinking and policy change literature.

New Labour's modernisation agenda has produced an avalanche

of change that has posed formidable challenges for everyone involved in social work, whether as service users, practitioners or managers. *Modernising Social Work* provides a radical appraisal of the far-reaching changes in their theoretical, historical and policy contexts. The book is organised into three sections that consider: the inter-relationship of modernisation and managerialism, modernisation's impact on service users and the ways in which social workers and front-line managers seek to exercise professional discretion for the benefit of service users within a workplace culture of intensified scrutiny and control. Analysis of a range of key developments in all three areas reveals the modernisation agenda as complex and contested. The book's three sections cover the main issues of the modernisation agenda, making it ideal for teaching. Locating the issues in their theoretical, historical and policy contexts meets the needs of student readers and experienced social workers will appreciate the emphasis on empirical research as well as practice experience.

Relationships and communication are the foundation of good social work practice. This book offers a new model, drawn from research and practical experience, which describes how to carry out effective relationship-based social work. *Doing Relationship-Based Social Work* provides a refreshing and realistic approach to social work practice. The model itself is built around four stages: engagement, negotiation, enabling change and valuing endings. Underpinned by motivational interviewing techniques, strengths focused practice, emotional intelligence and empowerment, the approach is supported by case examples and explanations of the importance of relationships at each stage. Informative and practical, this book will be an invaluable text for un-

dergraduate and postgraduate social work students as well as all social work and allied professionals committed to enabling positive change.

This new dictionary provides A-Z definitions of terms from the broad field of social care. Accessible coverage of social work theories, methods, policies, organizations, and statutes, as well as key terms from interdisciplinary topics such as health and education, make this an ideal reference for students as well as qualified social workers.

In *Self-Leadership in Social Work*, Bill McKitterick calls for change in the practice of the profession. Arguing that the current approaches have minimized the social justice focus and therapeutic and change-oriented interventions, McKitterick explores the ways that strong self-leadership can help social workers refocus their attention on efforts that can achieve positive change. He identifies tactics and strategies for providing leadership within a team and in senior positions. Offering a fresh and innovative view of the field, this book will inspire social workers, managers of social services, and social work students to exercise leadership in their own practice.

Social Work and Social Work Perspectives introduces readers to a range of important sociological concepts, showing how these can feed critical practice and illustrate social work's complex relationship with the welfare state. Adopting a unique social policy framework, this distinctive text is illuminating reading.

With neo-liberal resource rationing, and the onus of cost shifting from the state to individuals, families, and communities, migration issues can add a further layer of complexity to the question

of caring for the elderly. By presenting examples from a variety of contexts and countries, this book will stimulate readers into considering new approaches to their own local situation in an attempt to find sustainable social work responses, and in helping to build intergenerational solidarity and social capital. Contributions to the book focus on patterns of migration: older migrants, migrating families and migrant carers. Facilitating and supporting social solidarity both locally and internationally requires social workers to understand the different contexts for elderly social work both within their own country, and internationally. Central to this area of work is the promotion of values that respect differences and uphold the principles of human rights and social justice. This book highlights the need to consider migration as a driver for social change, offering the opportunity for new forms of social solidarity that can adapt and support people inter-generationally and sustainably in later life. This book was originally published as a special issue of the *European Journal of Social Work*.

This text fills a gap for an accessible textbook which takes a person-centred approach to working with older people by providing readers with a basic knowledge of policy, legislation, theory and research.

Gerontological Social Work in Action introduces "anti-oppression gerontology" (AOG), a critical approach to social work with older adults, their families, and communities. AOG principles are applied to direct and indirect practice and a range of topics of relevance to social work practice in the context of a rapidly aging and increasingly diverse world. Weaving together stories from diverse older adults, theories, research, and practical tools, this unique

textbook prompts social workers to think differently and push back against oppressive forces. It pays attention to issues, realities, and contexts that are largely absent in social work education and gerontological practice, including important developments in our understanding of age/ism; theories of aging and social work; sites and sectors of health and social care; managing risk and frailty; moral, ethical and legal questions about aging including medical assistance in dying; caregiving; dementia and citizenship; trauma; and much more. This textbook should be considered essential reading for social work students new to or seeking to specialize in aging, as well as those interested in the application of anti-oppressive principles to working with older adults and researching later life.

First published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.

Exploring the key theoretical approaches and methods of intervention with older people, this uniquely positive, practical book helps social workers to identify, understand and facilitate their service-users' wishes for wellbeing and a fulfilling older age.

Continuing professional development has become an important and widespread practice in twenty-first-century social work. This volume traces its emergence and evolution, identifying the characteristics of continuing professional development, the barriers to undertaking it, and the way social workers view it. Drawing on an international survey of practitioners and interviews with social workers and their managers, the authors provide unique insight into the possibilities and challenges of continuing professional development for newly qualified and experienced social workers alike.

"This book is an optimal tool for instructors and students of graduate classes in social work and related disciplines." --Journal of Immigrant and Minority Health "I applaud social work students, professors, and social workers who seek to serve and empower the immigrant community. This text is a great tool toward raising awareness of the many issues immigrants face, and helping them find solutions." --Frank Sharry, Executive Director, America's Voice "The book is a major contribution to social workers and their clients as it addresses advocacy on behalf of immigrants and refugees during a social, economic and political period that restricts immigrants' rights and service access." --Dr. Diane Drachman, Associate Professor, University of Connecticut School of Social Work Successful social work with immigrants must begin with an understanding of their legal status and how that status impacts their housing, employment, health care, education, and virtually every other aspect of life. Chang-Muy and Congress present social workers with the only book on the market to emphasize the legal aspect of immigrant issues as well as critical practice and advocacy issues. Topics discussed include historical and current trends in immigration, applicable theories for practice with immigrants, policy and advocacy methods, and the need for cultural competence. By providing comprehensive coverage of both the legal and practice issues of this complex field, this book will help social service professionals and graduate students increase their cultural sensitivity and work more effectively with immigrants. Key Features: Covers the latest aspects of the immigration debate and discusses how social workers are affected by emerging immigration policies Discusses special populations such as refugees, elderly immigrants, and victims of international

trafficking Includes case studies on the most critical issues immigrants face today: legal processes, physical and mental health issues, employment difficulties, family conflicts, and more Instructional Materials Available! Free to instructors with a verified order of seven or more copies. Email marketing@springerpub.com to request syllabus and PowerPoint slides.

Social workers often have to handle a great deal of negativity in their working lives. This book celebrates social work practice at its most positive and influential and, in doing so, contributes to a growing literature on critical best practice. Focused on 12 unique and compelling stories of social work with older people, the authors: - Provide a fresh and realistic insight into life as a social worker, and the dilemmas and difficulties that practitioners typically face - Illustrate how knowledge, theory and research are integrated in professional decision-making and action - Show social workers analyzing their own cases and include reflective questions to help readers formulate their own learning and thereby develop their own practice This book provides students on qualifying courses with an invaluable perspective on real life practice, and gives qualified practitioners the opportunity to reflect on and better their own practice.

Scotland has changed, politically and culturally, in recent years, with persistent demands for independence culminating in a referendum in 2014. On this fluid political landscape, social welfare can be co-opted towards a wider 'nation-building' project. As a result, social work in Scotland is increasingly divergent from the rest of the UK. This book offers a comprehensive, critical and timely account of the profession in these changing times, charting its historical development, current practice and future directions.

Bringing together a range of academic and practice experts, it considers social work as it is currently but also as it might be. Divided into three parts, the first part sets a context, identifying historical, philosophical, policy and legal influences on current practice. The second part picks up on current themes in policy and practice, addressing key issues of professional identity in an increasingly integrated policy context. The final part contains chapters on current domains of practice, identifying key areas of legislation, policy and practice. *Social Work in a Changing Scotland* is essential reading for social work students, offering an accessible yet critical overview of the profession. It will also inform current practitioners to understand better the changing contexts within which they practise, while prompting further academic debate about Scottish social work.

It is essential for social work students to know about social policy, to know why studying social policy is important in the social work degree, and to understand how social policy, when implemented, has a real impact on the everyday life of vulnerable people. This book provides plenty of examples of this impact, tracing the development of welfare provision for older people right through the twentieth century, leading up to an analysis of contemporary developments, which students will need to know about in order to practice effectively.

Strangely, citizenship has usually been considered as a matter of interest when it is questioned or even withheld. The other way round, usually citizenship is taken for granted 'as it is', not being defined as such. In consequence we find only a negative definition rather than a clear way of spelling out the meaning. As glob-

alisation spreads and deepens, the question of citizenship becomes crucial for society. It is already possible to see changes in voting patterns in such a country as France due to its immigration policies. This has long been the case in America as well, and is being felt there yet again by the effects of the citizenships of its newest immigrants. The contributions in this volumes are dealing with different aspects of defining citizenship -- though not necessarily conceptualising it as such, i.e. under this term. These are burning questions which this book explores in this explosive national and international issue. Contents: Introduction; Citizenship Revisited: Threats and Opportunities of Shifting Boundaries; Globalisation as Seen from the Local Level; Self-Improved Citizens: Citizenship, Social Inclusion and the Self in the Politics of Welfare; Citizen Parti

cipati
Dementia has been widely debated from the perspectives of biomedicine and social psychology. This book broadens the debate to consider the experiences of men and women with dementia from a sociopolitical perspective. It brings to the fore the concept of social citizenship, exploring what it means within the context of dementia and using it to re-examine the issue of rights, status(es), and participation. Most importantly, the book offers fresh and practical insights into how a citizenship framework can be applied in practice. It will be of interest to health and social care professionals, policy makers, academics and researchers and people with dementia and family carers may find it revitalising.

Fully revised and updated throughout, this fourth edition of Lena Dominelli's influential book retains its reputation as the go-to text on anti-racist social work practice. As racism continues to present

a problem in contemporary society: the growth of the Far Right, the rise of Islamophobia and the victory of the Brexit camp in the EU referendum, the need to address racist attitudes and behaviour that affect diverse groups of people in the UK remains an urgent one. A truly classic text, *Anti-Racist Social Work* has been providing students and practitioners with a comprehensive guide to the debates and practices on racism in contemporary society since 1988. New to this Edition: - Includes a brand new chapter on 'Social Work Across Borders' - Incorporates discussion of recent events and developments to encourage critical thinking and analyses their effect on practice - Offers examples from across the globe at both micro and macro level

The Politics of Social Work provides a major contribution to debates on the politics of social work, at the beginning of the 21st Century. It locates social work within wider political and theoretical debates and deals with important issues currently facing social workers and the organisations in which they work. By setting the current crisis of identity social workers are experiencing in international context, Fred Powell analyses the choices facing social work in postmodern society. Fred Powell explores in this text contemporary and historical paradigms of social work from its Victorian origins to the development of reformist practice in the welfare state to radical social work, responses to social exclusion, the renaissance of civil society, multiculturalism, feminism and anti-oppressive practice. In conclusion he examines the options facing social work in the 21st century and argues for a civic model of social work based on the pursuit of social justice in an inclusive society.

This book explores shifts in international social policies, looking at how they affect national trends and the context for social work practice. It investigates the responsibilities for social welfare held by the state, the market and civil society, elaborating a concept of citizenship-based social work.

Future social work practice requires a holistic framework to deal effectively with the great social and economic disruptions of this unprecedented time. Innovation and creativity are indispensable to empowering social workers and social service organizations to make an impact on the lives of people and societies in today's world. This book provides a range of innovative practices of social work drawing from alternate theories and with a global orientation. It is forward-looking with a focus on social resilience, social inclusion and recovery. Using a strengths perspective, discussions in the chapters provide useful insights in restructuring social life and social services at the individual as well as community and societal levels for meeting the challenges of a new global era. The chapters draw on the experiences of the authors in their academic and practice engagements and focus on a variety of arenas of social work education and practice to enrich the understanding of the present and future of the field. Authors discuss theoretical and conceptual models to review social work education and practice of engaging in a fast-changing global era and complex contexts. Topics explored include: New Era for Social Work in the Global Future Remaking Social Work by Applying an Anti-oppressive Lens Vulnerability and Resilience of Refugee Women and Children Critical Green Social Work as Futuristic Social Work Practice Globalisation and the Future of Social Work Practice and Education Equipping Social Workers for a New Global Era Remaking

Social Work for the New Global Era is an essential resource to inform practice, enrich teaching, and direct future research for social work academics, researchers, educators, students, and field supervisors, as well as social care, social work and social service practitioners in both clinical and policy settings. The book also would be of interest to mental health and community professionals in various practice contexts across the globe.

Social exclusion is a subject of major importance in contemporary social work and has been a core feature of social policy developments in the UK and Europe in the past decade. Michael Shepard argues that the issue of social exclusion lies at the very heart of social work and he examines the implications of this position for both theory and practice. He goes on to examine a range of key topics in social work including: † Social work values and knowledge † Empowerment † Need † The exercise of authority † Authority and Choice † Evidence-based practice † Reflection and reflective learning † Judgement and decision making † Social work and 'art' † Social work as 'science' He discusses how each of these topics reflect an underlying concern with social exclusion, making it clear that even though the term 'social exclusion' is of recent origin, it provides a framework for understanding the enduring themes of social work. The book offers an original contribution to the understanding and practice of social work and includes a reappraisal of some fundamental aspects of the profession and its practice. In its focus on issues of wide concern it will be essential reading for practitioners and students in social work. It will also be of interest within social policy generally, offering an example of the way in which social exclusion becomes an issue of professional concern in welfare, and the form this takes in practice.

Increase the effectiveness of the services you provide to clients. *Social Work Visions from Around the Globe* examines the fundamental principles and dilemmas of social work with people whose health is under threat. This valuable resource was compiled from material presented at the Third International Conference on Social Work in Health and Mental Health in Tampere, Finland. The book explores key issues in social work in health and mental health, from the early historical roots of social work in health to developing a human rights perspective on the lives of men who face capital punishment. Using tables, figures, case studies, and interviews, the text will help you provide holistic, client-based care to children, men, women, and families. *Social Work Visions from Around the Globe* is divided into two sections: the first half discusses the position of individuals and families as users of health and mental health care services. Specific cases in the book include social work situations for children with disabilities, the mentally ill, the elderly, cancer, and HIV/AIDS. This text includes research and findings on the challenges and solutions faced by social workers in North America, Australia, Europe, Asia, and Africa. In the second half, *Social Work Visions from Around the Globe* focuses on various approaches to social work in health and mental health that address: the diversity of societies strengthening the voice of the social worker and service user the expertise of service users development of methods family life and childhood in global comparison human rights issues in social work

Puzzled by terminology, skills, law, or theory? Revising for your placement or exam? Then look no further! This series of concise and easy-to-use A-Zs will be your guide. Designed for both stu-

dents and newly-qualified social workers, this book will introduce you to over 350 key theories, theorists and concepts in a concise and no-nonsense way. Careful cross-referencing will help you make important connections, while selected further reading will provide you with a springboard to further learning.

Organized around the coherent and cohesive Generalist Intervention Model, this guide to generalist social work practice incorporates the knowledge, skills, and professional values needed to work with individuals and families, as well as the foundation to work with groups, communities, and organizations. Updated with new material on empathy, interdisciplinary collaboration, working with LGBTQ clients and clients with disabilities, and other topics, the book focuses on micro levels of social work practice while also discussing the interrelationship among the micro, mezzo, and macro levels. Part of the Brooks/Cole Empowerment Series, *UNDERSTANDING GENERALIST PRACTICE*, 8th Edition, clearly identifies content related to the latest Council on Social Work Education (CSWE) Educational Policy and Accreditation Standards (EPAS) with icons throughout the text. Learning objectives, correlated to chapter headings and summaries, guide students' reading and reinforce their understanding. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The publication takes account of the fundamental developments transforming social work in Europe at the beginning of the 21st century. A European standard of social work has already emerged, but models for future European social work are absent. Therefore the compendium gives an overview of the current transformation process for the first time, discusses the visible and in-

visible changes and maps out where social work is positioned in the emerging post-welfare states.

Focusing on the challenges of achieving good practice, this popular textbook reflects recent developments in social work within the context of contemporary society, law and policy. Getting to the heart of what this profession is all about, *Understanding Social Work* continues to offer an excellent foundation for readers for anyone wanting a better understanding of the social work role. What is social work? How is it carried out? What skills does it require? New to this edition: - Updates include new material on the importance of social media, resilience, the impact of austerity, rising case-loads, and the increase pressure on social workers

Social Work with the Aged and Their Families presents the functional-age model (FAM) of intergenerational treatment, an integrative theoretical framework for social workers practicing with older adults and their families. In keeping with the Council on Social Work Education's curriculum mandate of 2015, social workers are now encouraged to use human behavior theories in working with their geriatric clients. This fourth edition incorporates much-needed additional techniques to address the mental health assessments of the elderly. FAM addresses the assessment of older adults' biological, psychological, socio-cultural, and spiritual age. It also incorporates an evaluation of the family system, family roles, and family development in this assessment. Interventions at the individual, family, group, and community levels are discussed. This volume, augmented with recent concepts related to successful aging, spirituality, and resiliency, presents the major converging conceptual trends that constitute a model for twen-

ty-first century social work practice in the field of aging. It is an indispensable text for those training in social work practice with the elderly, or those currently in practice.

This masterly text is a classic in its field and will be a reliable companion throughout the course of your studies and your career as a social work practitioner. In this substantially reworked and updated fourth edition of his best-selling text, Malcolm Payne presents clear and concise evaluations of the pros and cons of major theories that inform social work practice, and comparisons between them. *Modern Social Work Theory* is now more accessible and comprehensive than ever, offering: the most complete coverage of social work theory, from classic perspectives to the very latest ideas, including a new chapter dedicated to strengths, narrative, and solutions approaches; a host of brand new case examples showing how theories can be applied to everyday practice; new analysis of the ethical dimensions of different social work theories and what common values they share; Pause and Reflect questions to encourage you to draw on your own experience and develop your thinking; and updated Example text sections which summarize the most current thinking and help bridge the gap between introductions to each theory and more specialist writing.

This practical guide will help students navigate through all core areas of their course by providing them with a comprehensive introduction to contemporary social work. Written by subject experts, including best-selling *Transforming Social Work Practice* authors, this essential guide will introduce students to key theory and approaches, helping them to develop and build the skills and knowledge that they will need for practice.

In this book, Payne illustrates society's inclination to mistreat old-

er people and encourages readers to combat their personal biases to improve service care for older adults. *Citizenship Social Work with Older People* emphasizes the importance of older people being fully recognized as complete members of society (as citizens) by others and particularly by social work practitioners.

Older people are, like younger people, citizens in the communities of the nations in which they live. This book sees ageing as a life journey that incorporates a process of citizenizing, in which people build their identity as part of their family and community. But the social experience of illness, frailty, disability and reaching the end of life may de-citizen older people by devaluing the social identity that comes from continuing social engagement. We de-citizen older people by emphasising dependence on services and their cost to public expenditure instead of valuing the interdepen-

dence of participation and mutual respect. This book argues that older people retain full citizenship for the whole of their lives, up to the moment of death, but what does this mean for health and social care? In this groundbreaking book, Malcolm Payne argues that social work with older people must build re-citizenizing practice strategies to value both the common and the special aspects of the citizenship of older people. Current models of social care and social work create dependency, rather than relying on values of participative interdependence. The failure to recognise the end of life as a crucial element in all social care and social work for older people means that the lessons learned in providing palliative and end-of-life care in health care have not been transferred to social care, and the priorities of end-of-life care have not been adequately encompassed in social work with older people.
