4DA - TRISTEN CHERRY

Professor Kurose's research interests are in the areas of computer network protocols and architecture, network measurement, sensor networks, and multimedia communication. He is also interested in the development of asynchronous learning materials and pedagogy, particularly the use of Internet-based multimedia material. The subject of computer networking is enormously complex, involving many concepts, protocols, and technologies that are woven together in an intricate manner. To cope with this scope and complexity, many computer networking texts are often organized around the "layers" of a network architecture. With a layered
