recipients and acceptance of allografts can be made. The authors have the experience and ability to bridge the entire field of transplantation and their article encompasses both clinical and immunochemical data in this area. Their data show clearly that matches for the DR antigens are more important than those at the ABC loci in determination of graft survival. Additional relevant factors, including autoimmunity and other B-cell antigens, are discussed and correlated with graft survival. The authors also present pathology data concerning the distribution of HLA-DR antigens in various tissues. These data indicate a fruitful area for future investigations on the chemical aspects of the various antigens encoded within the human MHC. Do changes in the structure of lymphocyte surface glycoproteins, especially changes in their carbohydrate portions, occur during normal lymphoid differentiation? Information about this question is limited, and pertinent data are available for only a few proteins. Three of the proteins are major glycoprotein constituents of rodent thymocyte membranes: the Thy-1 antigen, a glycosylated leukocyte sialoglycoprotein called W3/13, and a high-molecular-weight glycoprotein known as the leukocyte-common antigen. In his contribution, Pink thoroughly characterizes these glycoproteins and discusses the evidence that the structures change when a thymocyte differentiates into a mature, peripheral T cell. A comparison is drawn between lymphocyte glycoprotein changes and those that occur during red blood cell differentiation. The reader will find Pink's discourse informative and provocative. Mast cells, basophils, and related tumor lines bind IgE with very high affinity.

tion. The underlying philosophy of the course remains that language is best learned when it is used for meaningful communication. Written in American English, *Interchange Third Edition* reflects the fact that English is the major language of international communication and is not limited to any one country, region or culture.

*Contemporary Health Studies* provides an accessible introduction to current issues and key debates in understanding and promoting health. Its up-to-date, global focus places a strong emphasis on the social, political and environmental dimensions of health. Part One sets the scene by looking closely at the definition of 'health' and outlining the aims and purpose of health studies. Part Two explores the different disciplines that underpin health studies, such as sociology, psychology, anthropology and health psychology, incorporating new theoretical frameworks to help readers understand health. Part Three applies this knowledge to address the determinants of health, including chapters on individual factors, the role of public health, the latest policy influences on health and the growing importance of the global context. Each chapter contains contemporary statistics and evidence alongside carefully developed learning features designed to highlight the fundamentals of each topic, to apply these to in-depth case studies - from global antibiotic resistance to the challenge and promise of digital data -, and to pose questions for reflection and debate. *Contemporary Health Studies* is an essential guide for undergraduate health students written by three authors who have a wealth of teaching experience in this subject area. Their book will inspire readers to consider the human experience of health within contemporary global society as it is mediated by individual, societal and global contexts.

It is a comprehensive textbook especially designed for the students of commerce, management and other professional courses. It serves both as a learner's text and a practitioner's guide. It provides a sharp focus on all relevant concepts and cardinal principles of business communication and adds value to the reader's understanding of the subject. Following a need-based and sequential approach, the book is highly stimulating and leads students to communicate with élan and prepare for work place challenges.

Now in a fourth edition, *Contemporary Topics* expands on its highly respected approach to developing academic listening and study skills. Organized around realistic college lectures, the text guides

learners through carefully sequenced activities in skills such as note-taking, focusing attention, intensive listening, and vocabulary building. It also helps students evaluate their interests and explore possible career paths. New to This Edition New subject areas, presented as one-on-one academic lectures, emphasize professional applications such as software engineering, multimedia design, information technology, urban planning, and social psychology. Learning Outcomes listed at the outset of each unit let students know the goals of each unit and what their learning experience will be. New audio interviews with topic experts provide context for the upcoming unit lecture. Bottom-up listening and pronunciation exercises emphasize important principles and improve real-time perception. An oral presentation activity, supported by specific preparation and delivery strategies, concludes each unit and includes the opportunity for peer evaluation. Proficiency assessments composed of short academic audio lectures and multiple-choice exams simulate TOEFL-style test format for practice on high-stakes tests. New Essential Online Resources include audio, video, and teacher materials (assessments, teaching notes, answer keys, audioscripts, presentation points, and more). Other Highlights Corpus vocabulary drawn from the Academic Word List ensures that students are exposed to core academic vocabulary. Collaborative activities with presentation strategies and peer evaluations allow students to make connections and develop critical thinking skills. Unit comprehension tests assess students' grasp of key concepts presented in the unit lecture. Mapped to the Global Scale of English.
