At its heart, cryptocurrency aims to protect the user through something called the blockchain, as well as through using cryptography to verify and secure all transactions. If you are an established cryptocurrency user and owner, this option is an easy one: to gamble or not to gamble.

It's the way cryptocurrency networks like Bitcoin verify and confirm new transactions. It stops double spending without the need to trust centralized accounting as banks do. Cryptocurrency blockchains aren't secured by trust or people. They are secured by math done by computers! For
