"Electro-acoustic" is an academic term that encompasses various forms of experimental music and research involving artificial sound sources, including electronic music, electric instruments, tape

loops and manipulation, computer-generated music, and so forth. Roughly: "any avant-garde music that requires loudspeakers to perform."

Csound is a sound design, music synthesis and signal processing system, providing facilities for composition and performance over a wide range of platforms. It is not restricted to any style of music, having been used for many years in the creation of classical, pop, techno, ambient, experimental, and (of course) computer music, as well as music for film and television.
