Dayc2 Scoring Guide DAYC-2 Developmental Assessment of Young Children 2 Ed

The second edition of this

popular test identifies developmental delays and deficits in children from birth through age 5. DAYC-2 scores are highly useful in designing early intervention programs. The test is composed of five subtests, each focusing on a domain mandated for assessment by IDEA: Adaptive Behavior. Self-Help Skills. Cognition. Attention. Memory items, each with a score of 1 represent the basal. If you go back to the starting point of the subtest and still do not have a basal, then you need to work backwards and score the items listed for the previous age range until three consecutive items are scored with 1's, or until you've scored all of the subtest's remaining items.
