deterrence have argued that in order for legal sanctions to be effective deterrents to crime, they must be (1) severe, (2) administered with certainty, (3) administered swiftly (celerity), and (4) administered publicly. The pre-sumed importance of the celerity of punishment is illustrated by Beccaria:

ity. On the other hand, general deterrence suggests that the general population will be deterred from offending when they are aware of others being apprehended and punished. Both specific and general deterrence, how ever, are grounded in individuals' perceptions regarding severity, certainty, and celerity of punishment.

Punishment: Its Severity and Certainty

Thus, celerity is pertinent to judged deterrence value, and the three components of punishment clearly combine additively rather than multiplicatively. It is argued that despite the empirical results, certainty, severity, and celerity must, however, ultimately be showp to combine according to a multiplying rule.

Celerity—meaning the swiftness of punishment—is arguably the most overlooked element of deterrence theory. Scholars often neglect discussing it, at least in part, because of the perception that we know so little about it—a perception that is not rooted in reality.

Certainty, Severity, and Celerity - Economics of Crime

Certainty, Severity, and Celerity We have seen a series of examples in which an increased probability and severity of punishment deter would-be criminals from offending. However, there is an important dimension of punishment that has been relatively unexplored.

As a result, we can only speculate about the merit of the deterrence hypothesis for the celerity of executions, and how previous deterrence and death penalty investigations may be biased due to celerity being ignored. The deterrent effect of the certainty and celerity of the death penalty on homicide rates is examined cross-sectionally for states.

This paper examines the deterrent effect of the celerity of the death penalty on homicide rates. Although in recent years there have been a number of investigations of the certainty of execution and deterrence, the effect of celerity of execution has not been examined empirically.
