Modern legal theory contains a wide range of approaches and topics: from economic analysis of law to feminist legal theory to traditional analytical legal philosophy to a range of theories about justice. This healthy variety of jurisprudential work has created a problem: students and theorists working in one tradition may have difficulty understanding the concepts and terminology of a different tradition. This book works to make terminology and ways of thinking accessible. This dictionary covers topics from the 'autonomy of law' to the 'will theory of rights', from 'autopoiesis' to 'wealth maximization', and from 'John Austin' to 'Ludwig Wittgenstein'. The most important concepts and ideas are presented in a simple dictionary format. There are also many longer entries, where the initial definition gives an accessible explanation,

but the entry goes on to give more detailed information about the history of an idea and the debates currently surrounding it.

Legal lexicography or jurilexicography is the most neglected aspect of the discipline of jurilinguistics, despite its great relevance for translators, academics and comparative lawyers. This volume seeks to bridge this gap in legal literature by bringing together contributions from ten jurisdictions from leading experts in the field. The work addresses aspects of legal lexicography, both monolingual and bilingual, in its various manifestations in both civilian and common law systems. It thus compares epistemic approaches in a subject that is inextricably bound up with specific legal

systems and specific languages. Topics covered include the history of French legal lexicography, ordinary language as defined by the courts, the use of law dictionaries by the judiciary, legal lexicography and translation, and a proposed multilingual dictionary for the EU citizen. While the majority of contributions are in English, the volume includes three written in French. The collection will be a valuable resource for both scholars and practitioners engaging with language in the mechanism of the law.
