Early Concepts of Evolution: Jean Baptiste Lamarck

Many scientists proposed ideas about evolution George Louis Leclerc de Buffon (1707-1788) A French naturalist who used evidence of fossils to propose that species shared common ancestors instead of arising separately. He also believed that the Earth was much older than 6000 years, as was commonly believed at the time.

Early Ideas about Evolution

Theory of evolution refers to a scientific theory that explains the origin of different species by evolution. Charles Darwin is considered to be the father of the theory of evolution and the one behind the foundation of the theory explained in the famous *On the Origin of Species* book published in 1859. Actual Research Essay Examples on Topic!

Ch 10.1 Early Ideas about Evolution question Evolution answer Changes in species over time. The process of biological change by which descendants come to differ from their ancestors.

Evolutionary origin of religions - Wikipedia

Proposed that all living things were descended from a common ancestor and that more-complex forms of life arose from less-complex forms. Jean-Baptiste Lamarck. Presented evolution as occurring due to environmental change over long periods of time. Stated, acquired traits could pass on to offspring.

Chapter 10 Principles of Evolution Test :) Flashcards ...

The evolutionary origin of religions and religious behavior is a field of study related to evolutionary psychology, the origin of language and mythology, and cross-cultural comparison of the an-

thropology of religion. Some subjects of interest include Neolithic religion, evidence for spirituality or cultic behavior in the Upper Paleolithic, and similarities in great ape behavior
