The long-awaited final volumes of Emerson's lectures The past several decades have witnessed an extraordinary editorial reconstruction of the life and influence of Ralph Waldo Emerson, one of America's foremost writers and intellectuals. By drawing primarily from previously unpublished manuscripts in the Ralph Waldo Emerson Memorial Association Collection in the Houghton Library at Harvard University, recent editions of Emerson's correspondence, journals and notebooks, sermons, and early lectures have provided authoritative texts that inspire readers to consider Emerson's place in American culture afresh. Drawn from the last untapped body of Emerson's manuscripts, The Later Lectures of Ralph Waldo Emerson, 1843-1871 presents the texts of forty-seven complete and unpublished lectures that Emerson delivered during the crucial middle years of his career. They offer Emerson's

thoughts on subjects that occupied him throughout his life - New England and Old World history and culture, poetic theory, education, the history and uses of intellect - as well as his ideas on subjects that sparked as many debates in the nineteenth century as they do today - race relations and women's rights. "The author describes the foundations on which not only biodynamics but also the wider organic movement is based. He builds bridges between mainstream science and Steiner's insights, making it easier for the wider organic and ecological movement to approach biodynamic concepts and practise. This book has much to offer to the beginner as well as to those already involved with biodynamics. Its broad range of topics - including the ecology of the farm organism, food quality and nutrition, community supported agriculture, planetary influences, seed quality, and the vitality of water - contribute to a deeper understanding of the subject."--
