Pyoderma Gangrenosum. Differential diagnosis includes infection, vasculitis, spider bite, and factitious disorder. Treatment includes treatment of underlying disease if applicable, local wound care, systemic and intralesional corticosteroids, cyclosporine, and infliximab.

Dermatologic Signs of Systemic Disease

An ocular manifestation of a systemic disease is an eye condition that directly or indirectly results from a disease process in another part of the body. There are many diseases known to cause ocular or visual changes. Diabetes, for example, is the leading cause of new cases of blindness in those aged 20-74, with ocular manifestations such as diabetic retinopathy and macular edema affecting up to 80% of those who have had the disease for 15 years or more. Other diseases such as acquired ...

List of systemic diseases with ocular manifestations ...

Rheumatic manifestations are often the initial presentation of systemic illnesses. Each endocrine disorder has its own set of arthritic complaints that can often mimic or present as definitive rheumatic diatheses, such as calcium pyrophosphate dihydrate deposition (CPPD) or diffuse arthralgia.

Oral manifestations of systemic disease

ENDOCRINE MYOPATHIES Endocrine diseases are generally associated with hormonally-mediated systemic alterations in metabolism. At any time during the course of many endocrinopathies, muscle may become affected. The diagnosis of such a myopathy may be more difficult if it is the presenting manifestation of the endocrinopathy.
