The #1 New York Times bestselling sequel to Words of Radiance, from epic fantasy author Brandon Sanderson at the top of his game. In Oathbringer, the third volume of the New York Times bestselling Stormlight Archive, humanity faces a new Desolation with the return of the Voidbringers, a foe with numbers as great as their thirst for vengeance. Dalinar Kholin's Alethi armies won a fleeting victory at a terrible cost: The enemy Parshendi summoned the violent Everstorm, which now sweeps the world with destruction, and in its passing awakens the once peaceful and subservient parshmen to the horror of their millennia-long enslavement by humans. While on a desperate flight to warn his family of the threat, Kaladin Stormblessed must come to grips with the fact that the newly kindled anger of the parshmen may be wholly justified. Nestled in the moun-

tains high above the storms, in the tower city of Urithiru, Shallan Davar investigates the wonders of the ancient stronghold of the Knights Radiant and unearths dark secrets lurking in its depths. And Dalinar realizes that his holy mission to unite his homeland of Alethkar was too narrow in scope. Unless all the nations of Roshar can put aside Dalinar's blood-soaked past and stand together—and unless Dalinar himself can confront that past—even the restoration of the Knights Radiant will not prevent the end of civilization. NATIONAL BESTSELLER • WINNER OF THE PULITZER PRIZE • A searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (San Francisco Chronicle). A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. The Road is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that

we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation. Look for Cormac McCarthy's new novel, *The Passenger*.

Are aliens visiting Earth, right now, even as you're reading this? For a long-time, best-selling science fiction author Stephen Hunt believed - as you might do - that UFOs and the chance extraterrestrials are presently calling on Earth was a load of... (let's keep this family-friendly), complete old nonsense! What was it that changed his mind? Interestingly, not his encounter with an alien probe in 2001. He wrote that off as a council pollution-monitoring drone - even though the first commercial drone wasn't used until 2006. No, it was the New York Times's article revealing that the Pentagon had been running, and denying the existence of, a top-secret alien-hunting program so covert it had to change the word 'UFO' to 'UAP' just to escape the stigma created by the CIA around the term. This feature came with confirmed videos

of the latest U.S. navy fighter jets being made to look like paper planes by anti-gravity effect vehicles. Craft racing at mind-boggling speeds that would turn human pilots into meat-paste. Since then, Stephen has been exploring deep down this rabbit hole. Now, in his very first non-fiction book, he brings you the results of his strange voyage of exploration, seeking the answers to such eye-opening questions as... - Has the U.S. government (a) lost its mind, or (b) are they really trying to back-engineer crashed alien craft wreckage? - What is the connection between UFOs/UAPs and high strangeness (portals, ghosts, Bigfoot)? - Given there are between 100 and 400 billion star systems in our Milky Way Galaxy, where the heck is everyone else? Is humanity truly that unique? The only machine-using species? - What does the U.S. government know that we don't? - Are UFO witnesses and whistleblowers influenced by popular science fiction entertainment, or are our media companies dropping approved UFO/alien bread-crumbs? - Is this new wave of official U.S.--sanctioned UFO openness a prelude to something shocking coming our planet's way? Revelations so improbable, they'll

change humanity forever? Stephen Hunt examines this fascinating and astonishing universe through the eyes of a science fiction author, drawing the parallels between our sci-fictions, and what just might be a bizarre classified reality of actual alien-derived sci-facts.

Goodreads Choice winner for Nonfiction 2021 and instant #1 bestseller! A deeply moving collection of personal essays from John Green, the author of *The Fault in Our Stars* and *Turtles All the Way Down*. "The perfect book for right now." -People "The Anthropocene Reviewed is essential to the human conversation." -Library Journal, starred review The Anthropocene is the current geologic age, in which humans have profoundly reshaped the planet and its biodiversity. In this remarkable symphony of essays adapted and expanded from his groundbreaking podcast, bestselling author John Green reviews different facets of the human-centered planet on a five-star scale—from the QWERTY keyboard and sunsets to Canada geese and Penguins of Madagascar. Funny, complex, and rich with detail, the reviews chart the contradictions of contemporary humanity. As a species, we are both far too powerful

and not nearly powerful enough, a paradox that came into sharp focus as we faced a global pandemic that both separated us and bound us together. John Green's gift for storytelling shines throughout this masterful collection. The Anthropocene Reviewed is a open-hearted exploration of the paths we forge and an unironic celebration of falling in love with the world. This is a signed edition.

Since Hopalong Cassidy and the Lone Ranger blazed their first trails on television in 1949, Westerns have been the genre of choice for 180 series. Some (Gunsmoke, Bonanza, and Maverick, for example) were classics; others, such as 26 Men and Shotgun Slade, were quickly forgotten. From Adventures of Briscoe County, through Zorro and Son, this comprehensive reference work covers all 180 Western series. Each entry opens with a listing of the broadcast history of the series, including original network, day and time. This is followed by a listing of the regular cast members and a brief premise of the series. The individual episodes are then covered, with the title, original air date, leading guest stars and a brief synopsis given. An exhaustive index

completes the work.

'A very funny tome' DAILY TELEGRAPH 'Hilarious' DAILY MAIL 'A profoundly instructive course in the idiosyncrasies of Greek law, custom and culture ... entertainingly chronicled' SAGA * * * * * From Radio 4 presenter, bestselling author and national treasure John Humphrys, a funny and engaging memoir of building a home in Greece written together with his son Christopher. It was a moment of mad impulse when John Humphrys decided to buy a semi-derelict cottage and a building site on a plot of land overlooking the Aegean. A few minutes gazing out over the most glorious bay he had ever seen was all it took to persuade him. After all, his son Christopher was already raising his family there so he would help build the beautiful villa that would soon rise there. What could possibly go wrong? Everything. John was to spend the next three years regretting his moment of madness. Some of it had its comic side. He learned to cope with a drunken peacock falling out of his favourite tree and even a colony of rats invading his bedroom. Some of the humans proved trickier: the old man demanding payment for olive trees in the middle of

John's own land; the neighbour who dragged his lovely old fishing boat onto the beach and set fire to it after a row with his wife. And, of course, the builders. Was the plumber who electrocuted him in the shower vengeful or merely incompetent? John learned a lot about Greece in a short time. He grew to love it and loathe it in almost equal measures, but was never for a moment bored by it. And Christopher learned a bit more about John. Their shared experience revived keen memories for him of growing up with a father for whom patience was never the strongest virtue... Here father and son capture the idyll and the odyssey as paradise is found, lost and regained.

Volume one of a fifty year oral history of Star Trek by the people who were there, in their own words, sharing never-before-told stories.

Hailed as "an extraordinary novel of men at war" (The Washington Post) this is the book that inspired the TNT television series starring Eric Dane, Rhona Mitra, Adam Baldwin and Michael Bay as Executive Producer. The unimaginable has happened. The world has been plunged into all-out nuclear war. Sailing near the Arctic Circle, the U.S.S. Nathan James is relatively uncathed, but the future is grim and Captain Thomas is facing mutiny from the tattered remnants of his crew. With civilization in ruins, he urges those that remain—one-hundred-and-fifty-two men and twenty-six women—to pull together in search of land. Once they reach safety, however, the men and women on board realize that they are earth's last remaining survivors—and they've all been exposed to radiation. When none of the women seems able to conceive, fear sets in. Will this be the end of humankind?
