This report finds that although there are some successes, African countries are still experiencing enormous difficulties in achieving the macroeconomic convergence criteria set by their RECs, such as targets on inflation, debt-to-GDP ratio, and deficit-to-GDP ratio. The assessment also indicates that despite some financial developments, African financial market activities remain shallow, with capital markets characterized by low capitalization and liquidity. The report also provides policymakers with recommendations on how to deepen monetary and financial integration on the continent and create an enabling macroeconomic environment for the continent.

A fine-tuning of Sappho was necessary, after new papyrus acquisitions have integrated the poetess' corpus, dated glorious editions and updated a critical debate that introduced new views in the study of ancient poetry and forced to rethink the productive dy-

namics, performative occasions, contexts and social functions, literary dimension of archaic Greek lyric. Therefore, Camillo Neri does not limit himself to update previous works since Sappho is in the singular position of object a) of good, although partial, critical editions, but without translation and commentary, b) of good translations, but without critical text and often without commentary, c) of good commentaries, but without critical text and/or translation. The introduction addresses all the issues related to Sappho: biography, contexts and functions of her poetry, metre, language and style, tradition, history of her centuries-old fortune. The text proposes the first complete collection of all the fragments and all the testimonia, with an extensive critical apparatus, Italian translation, perpetual commentary. Finally, the book contains a *conspectus metrorum*, a large array of indices (*verborum*, *sources*, *locorum* and *nominum et notabilium*) and a rich

and updated bibliography.
