Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 10/e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. There is more comprehensive coverage of accounting for governmental and not-for-profit organizations than what is available in an advanced text but concise enough to be used effectively in a semester, quarter, or even a half term course focusing on just these areas.

The textbook is designed to introduce readers to the accounting procedures and financial reporting of nonprofit entities; i.e., state and local governments), voluntary health and welfare organizations, hospitals and other health care providers, private and public colleges and universities, and other not-for-profit organizations. It is based on the latest official pronouncements and interpretations of the Financial Accounting Standards Board (FASB) and the Governmental Accounting Standards Board (GASB), as well as the industry audit guides issued by the American Institute of Certified Public Accountants (AICPA) and Governmental Accounting, Auditing, and Financial Reporting (a.k.a., "The Blue Book") published by the Government Finance Officers Association.

The preparation of government-wide statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes.

The accounting used by government entities is substantially different from the accounting used by for-profit organizations. This book describes the unique aspects of governmental accounting, including the use of funds, the modified accrual basis of accounting, and many unique financial statement formats and disclosures. There is a strong emphasis on common accounting transactions, the comprehensive annual financial report, budgetary reporting, and nonexchange transactions. In short, Governmental Accounting is an essential desk reference for the professional accountant.

Running public sector organizations requires specialist accounting and finance skills to overcome the unique challenges of the sector. Citizens rely on their governments to provide a wide range of public services from an inevitably limited budget and therefore the better that the public money is managed the more services that can be delivered. Just as there is no single best way to manage a business there is no single best way to manage public finances. Co-published by the Chartered Institute of Public Finance and Accountancy (CIPFA), the world's leading professional public finance accountancy body, International Public Financial Management: Essentials of Public Sector Accounting provides an expert introduction to public sector accounting and finance. This book was conceived to accompany CIPFA's International Public Financial Management (IPFM) qualifications as a resource for students that seeks to capture the essential elements of the modules they study, and reflects good practice as put forward by CIPFA in its examination syllabuses. Students of public management and public sector accounting will find this a useful text. Practitioners working in the public sector will also find this concise book vital reading in seeking value for money in providing public services.
