The Evolution of Forensic Science - 699 Words | Bartleby

While forensic science can explain the 'how' of a crime, a human mind is still needed to uncover the 'why'. It requires the acumen of the crime scene investigator and law enforcement personnel to understand the motive before a trial. A crime scene analysis is incomplete without the concord of scientific methods and the human factor.

Our aim in this paper, then, is to clarify the role of evolutionary explanations in criminology with a focus on how evolutionary approaches can be best integrated with mainstream criminological approaches. We first provide a brief outline of what can be termed Evolutionary Behavioral Science - an integrative perspective that encompasses
