Why did the Greeks of the archaic and early Classical period join in choruses that sang and danced on public and private occasions? This book offers a wide-ranging exploration of representations of chorality in the poetry, art and material remains of early Greece in order to demonstrate the centrality of the activity in the social, religious and technological practices of individuals and communities. Moving from a consideration of choral archetypes, among them cauldrons, columns, Gorgons, ships and halcyons, the discussion then turns to an investigation of how participation in choral song and dance shaped communal experience and interacted with a variety of disparate spheres that include weaving, cataloguing, temple architecture and inscribing. The study ends with a treatment of the role of choral activity in generating epiphanies and allowing viewers and participants access to realms that typically lie beyond their perception.

The manufacture and decorative use of wire in Southern Africa traditional arts dates back to the first millennium AD. With advancements in telecommunications, a new type of wire -- multi-colored plastic-coated copper wire, often referred to as telephone wire -- came into being. Beginning in the late 1960's, Zulu night watchmen started weaving scraps of this wire around their traditional sticks. This new material was also applied to making izimbenge -- beer pot covers -- that had been traditionally made from grass and palm. Today, there is wide variety in the creative use of this wire, and, in post-Apartheid South Africa, Zulu craft artists are imbuing old forms with the colourful contemporary material of telecommunications. The result is a vibrant, distinctive new folk form gaining international attention. This is the first and only publication to document the development of this transitional art. Including more than two-hundred examples of baskets, this book traces telephone-wire weaving from its roots to its most current forms, featuring the works of the most renowned contemporary weavers. The accompanying text -- from some of the foremost experts in African art and craft -- traces the history of telephone-wire weaving as well as discussing its significance to South African culture and art history. Today telephone wire baskets are at the heart of growing markets for South African products and sustainable cultural industry in Zululand.

Fiber artists around the world have embraced crochet as an inventive medium like never before. Expanding on the creative possibilities and using sculpture, immense site-specific installations, performance, and mixed-media objects, they have used crochet techniques to explore feminine craft and heritage, dissect gender codes, and show the primal creative expression represented by crochet. In *The Fine Art of Crochet*, author Gwen Blakley Kinsler looks at the art-crochet movement from 1915 onward to the crochet revolution of the 1960s, profiling twenty of the most innovative practitioners working today. Offering insight to those who may not have otherwise thought to go beyond the purely practical aspect of crochet, she features internationally known artists such as Arline Fisch, Leslie Pontz, Carol Hummel, Tracy Krumm, Bonnie Meltzer, and Soonran Youn. Gwen Blakley Kinsler, the founder of the Crochet Guild of America and a fiber-art practitioner in her own right, examines the concepts and diverse works of these artists, in whose hands the magic of crochet creates cutting-edge art for the twenty-first century. Each artist approaches the medium with wonder and the desire to explore its full potential. This study and collection of images presents an exploration of the diverse styles, unusual shapes, and exquisite textures that characterize crocheted art today.

Timeless Wire Weaving focuses on developing wirework skills through 13 projects using three classic wire weaving techniques: coiling, wrapping, and weaving. The projects are built around a focal cabochon and incorporate seed beads and crystals in imaginative ways. Designers will be able to make the jewelry shown in the book, while also using the techniques learned to create innovative jewelry pieces of their own.
