I Have a 2000 F-350 Crew Cab 2WD Diesel. My unloaded pressures are 62 psi front/52 psi rear with stock size tires (265-75-16). It rides pretty good and the tires wear nice and even. When I'm towing I'll put the fronts to 65 psi and the rears to 70 psi.

To be able to tow more weight, you'd essentially need to build a whole new truck from the chassis out. This is why manufacturers like Ford offer different packages in a model line, such as the F-250, F-350, F-450, and on up; those vehicles are all built to be able to haul/carry more weight.

For the gooseneck style of towing the 2019 F350 reaches 32,000 pounds while the F450 can tow 37,000 through the same towing method. Of course, different models may have slightly different towing capacities. It is said that the new 2020 F350 can reach up to 34,000 pounds when it wants to tow a trailer.
