The Routledge Companion to Philosophy in Organization Studies provides a wide-ranging overview of the significance of philosophy in organizations. The volume brings together a veritable "who's-who" of scholars that are acclaimed international experts in their specialist subject within organizational studies and philosophy. The contributions to this collection are grouped into three distinct sections: Foundations - exploring philosophical building blocks with which organizational researchers need to become familiar. Theories - representing some of the dominant traditions in organizational studies, and how they are dealt with philosophically. Topics - examining the issues, themes and topics relevant to understanding how philosophy infuses organization studies. Primarily aimed at students and academics associated with business schools and organizational research, The Routledge Companion to Philosophy in Organization Studies is a valuable reference source for anyone engaged in this field.

There has, in recent times, been an increasing interest in history, broadly defined, among management scholars. But what specifically a historical approach or perspective can contribute to research on organizational fields, organizations, strategy etc. and how exactly such historical research should be carried out remain questions that have been answered only partially, if at all. Building on the authors' prior and ongoing work, *History in Management and Organization Studies: From Margins to Mainstream* is unique in presenting a comprehensive and integrated view of how history has informed management research with a focus on organization theory and strategy. More specifically, the volume provides an overview of how the relationship between history and management scholarship has evolved from the 19th century until today, focusing mainly on the post-World War II period; and systematically surveys the kind of research programs within organization theory and strategy that have used historical data and/or history as a theoretical construct, while also identifying the remaining "blind spots". As a whole, it offers a kind of roadmap for management scholars and historians to situate their research and, hopefully, find new roads for others to travel. The book is intended for anybody conducting or planning to conduct historical research within management and organization studies, and aims, in particular, at becoming a standard feature of research methods courses in business schools and departments of management.

The World Trade Organisation plays the primary role in regulating international trade in goods, services and intellectual property. Traditionally, international trade law and regulation has been analysed primarily from the trade-in-goods perspective. Services are becoming an important competence for the WTO. The institutional, legal and regulatory influence of the General Agreement on Trade in Services (GATS) on domestic economic policymaking is attracting increasing attention in the academic and policymaking literature. The growing importance of services trade to the global economy makes the application of the GATS to trade in services an important concern of international economic policy. The GATS contains important innovations that build on the former GATT and existing WTO/GATT trade regime for goods. This book fills a void in the academic and policymaking literature by examining how the GATS governs international trade in services and its growing impact on the regulatory practice of WTO member states. It offers a unique discussion of the major issues confronting WTO member states by analysing the GATS and related international trade issues from a variety of perspectives that include law, political economy, regulation, and business. Moreover, the role of the WTO in promoting liberalised trade and economic development has come under serious strain because of the breakdown of the Doha Development Round negotiations. The book analyses the issues in the Doha services debate with some suggested policy approaches that might help build a more durable GATS framework. The book is a welcomed addition to the WTO literature and will serve as a point of reference for academics, policymakers and practitioners. Recommended by The Nation, the New Republic, Current Affairs, Bustle, In These Times "Entertaining, tough-minded, strenuously argued." —The Nation A thrilling and timely account of ten moments in history when labor challenged the very nature of power in America, by the author called "a brilliant historian" by The Progressive magazine Powerful and accessible, *A History of America in Ten Strikes* challenges all of our contemporary assumptions around labor, unions, and American workers. In this brilliant book, labor historian Erik Loomis recounts ten critical workers' strikes in American labor history that everyone needs to know about (and then provides an annotated list of the 150 most important moments in American labor history in the appendix). From the Lowell Mill Girls strike in the 1830s to Justice for Janitors in 1990, these labor uprisings do not just reflect the times in which they occurred,

but speak directly to the present moment. For example, we often think that Lincoln ended slavery by proclaiming the slaves emancipated, but Loomis shows that they freed themselves during the Civil War by simply withdrawing their labor. He shows how the hopes and aspirations of a generation were made into demands at a GM plant in Lordstown in 1972. And he takes us to the forests of the Pacific Northwest in the early nineteenth century where the radical organizers known as the Wobblies made their biggest inroads against the power of bosses. But there were also moments when the movement was crushed by corporations and the government; Loomis helps us understand the present perilous condition of American workers and draws lessons from both the victories and defeats of the past. In crystalline narratives, labor historian Erik Loomis lifts the curtain on workers' struggles, giving us a fresh perspective on American history from the boots up. Strikes include: Lowell Mill Girls Strike (Massachusetts, 1830-40) Slaves on Strike (The Confederacy, 1861-65) The Eight-Hour Day Strikes (Chicago, 1886) The Anthracite Strike (Pennsylvania, 1902) The Bread and Roses Strike (Massachusetts, 1912) The Flint Sit-Down Strike (Michigan, 1937) The Oakland General Strike (California, 1946) Lordstown (Ohio, 1972) Air Traffic Controllers (1981) Justice for Janitors (Los Angeles, 1990)

The rising importance of community organizing in the US and more recently in Britain has coincided with the developing significance of social movements and identity politics, debates about citizenship, social capital, civil society, and religion in the public sphere. At a time when participation in formal political process and membership of faith groups have both declined dramatically, community organizing has provided a new opportunity for small community groups, marginalized urban communities, and people of faith to engage in effective political action through the developments of inter-faith and cross-cultural coalitions of groups. In spite of its renewed popularity, little critical attention has been paid to community organizing. This book places community organizing within debates about the role of religion in the public sphere and the rise of public theology in recent years. The book explores the history, methodology, and achievements of community organizing, engaging in a series of conversations with key community organizers in the US and Britain. This volume breaks new ground by beginning to articulate a cross-cultural and inter-faith 'Theology for Community Organizing' that arises from fresh readings of Liberation Theology.

How the First World War made women central to popular imperialism in Britain

Organizations are caught in clichés. This means that they do not think for themselves anymore, but rather simply copy pre-existing ideas. This is giving rise to a world which pretends to be knowable, predictable and mouldable, one in which clichés like efficiency, transparency, means-ends rationality, and the strong leader are used without further thought or critique. This is the reason why organizations come into conflict with themselves, and which causes a seemingly unresolvable crisis. Film, however, can show us a totally different world. It has a subversive potency that can wake up the viewer, making them think again, allowing them to see a world which cannot be perceived anymore. It can show the world as it really is again, and can enable us to break through clichés. This book adopts a unique viewpoint on organizations, through its use of film. With the help of philosophers like Deleuze, Heidegger and Sloterdijk, filmmakers like the Coen Brothers, Cronenberg, Antonioni and Tarkovsky and films like *The Big Lebowski*, *eXistenZ*, *Stalker* and *Playtime*, a world is revealed and explored. It shows the decisive role played by architecture, and why managers are manipulative and impotent at the same time.

She may have had a soap opera private life, which included a very public marriage and breakup with George Jones, among other things, but Tammy Wynette still managed to turn out 17 number one singles during the late '60s and early '70s, the classics "Stand by Your Man," "D-I-V-O-R-C-E," and "Bedtime Story" being just three of them, each of which is compiled in this two-disc set of essential tracks. ~ Steve Leggett

International Organizations play a pivotal role on the modern global stage and have done, this book argues, since the beginning of the 20th century. This volume offers the first historical exploration into the formative years of international public administrations, covering the birth of the League of Nations and the emergence of the second generation that still shape international politics today such as the UN, NATO and OECD. Centring on Europe, where the multilateralization of international relations played out more intensely in the mid-20th century than in other parts of the world, it demonstrates a broad range of historiographical and methodological approaches to institutions in international history. The book argues that after several 'turns' (cultural, linguistic, material, transnational), international history is now better equipped to restate its core questions of policy and power with a view to their institutional dimensions. Making use of new approaches in the field, this book develops an understanding of the specific powers and roles of IO-administrations by delving into their institutional make-up.

Women in the United States organized around their own sense of

a distinct set of needs, skills, and concerns. And just as significant as women's acting on their own behalf was the fact that race, class, sexuality, and ethnicity shaped their strategies and methods. This authoritative anthology presents some of the powerful work and ideas about activism published in the acclaimed series *Women, Gender, and Sexuality in American History*. Assembled to commemorate the series' thirty-fifth anniversary, the collection looks at two hundred years of labor, activist, legal, political, and community organizing by women against racism, misogyny, white supremacy, and inequality. The authors confront how the multiple identities of an organization's members presented challenging dilemmas and share the histories of how women created change by working against inequitable social and structural systems. Insightful and provocative, *Women's Activist Organizing in US History* draws on both classic texts and recent bestsellers to reveal the breadth of activism by women in the United States in the nineteenth and twentieth centuries. People of all genders and ages of the nation and all nations throughout the land is at war with invisible spirit beings, spirit enemies, demonic forces, and demon spirits within themselves, internally and externally in spiritual warfare, living and fighting among demonic forces in all areas of life without one's knowledge. Demon spirits are not made of flesh and blood. They are the invisible enemies in the physical realm and biologically in the spirit realm. Demonization covers all area of human lives and all levels of governments, even our own. The weeds and the wheat describe how demonization has some of the world population literally believe they are the opposite sex. Some male genders literally believe they are the opposite sex. Some female genders literally believe they are the opposite sex. And some of both genders believe he or she are of both genders, which classifies them as bisexual or having orientation to person of either sex. This means demonization has brought spiritual conflict upon nations throughout the land. Only Jehovah God's Word, the Holy Bible, can we, mankind, have victory over the invisible spirit enemies (adversaries) of the earth and in our governments at all levels.

What is organized crime? There have been many answers over the decades from scholars, governments, the media, pop culture and criminals themselves. These answers cumulatively created a "Mafia Mystique" that dominated discourse until after the Cold War, when transnational organized crime emerged as a pronounced, if nebulous, threat to global security and stability. The authors focus both on the American experience that dominated organized crime scholarship in the second half of the 20th century and on the more recent global scene. Case studies show that organized crime is best understood not as a series of famous gangsters and events but as a structure of everyday life formed by numerous political, social, economic and anthropological variables. Privatization has been on the right-wing agenda for years. Health care, schools, Social Security, public lands, the military, prisons—all are considered fair game. Through stories, analysis, impassioned argument—even song lyrics—Si Kahn and Elizabeth Minnich show that corporations are, by their very nature, unable to fulfill effectively what have traditionally been the responsibilities of government. They make a powerful case that the market is not the measure of all things, and that a vital public sector is an indispensable component of a healthy democracy.

Given the near-silence in technological and business history about post-World War II socialist enterprises, this book gives voice to a generation of Communist China's managers, entrepreneurs, cadres, and workers from the Liberation to the early 1970s. Using recently-opened online archival resources, it details and assesses the course of technical and organizational experimentation at state-owned, cooperative, and private enterprises as the PRC strove to construct a socialist economy through trial-and-error initiatives. Core questions treated are: How did Chinese enterprises operate, evolve, experiment, improvise and adjust during the PRC's first generation? What technological initiatives were crucial to these processes, necessarily developed with limited expertise and thin financial resources? How could constructing "socialism with Chinese characteristics" have helped lay foundations for the post-1980 "Chinese miracle," as the PRC confidently entered the 21st century while Soviet and Central European socialisms crumbled? And what might current-day Western managers and entrepreneurs learn from Chinese practice and performance a half-century ago? Readers can anticipate a granular, bottom-up analysis of how businesses worked day-to-day in a planned economy, how enterprise practices and technological strategies shifted during the first postwar generation, how managers and technicians emerged after the capitalist exodus, how organizations experimented and adapted, and how the controversies and convulsions of the PRC's early decades fashioned durable technical and organizational capabilities.

Two decades of neoliberalism have destroyed a structured, pan-regional feminist movement in Canada. As a result, new generations of feminists have come to age without ever seeing the force that

an organized social movement can have in democratic society. They have never benefited from the knowledge, the debates, the actions, the mass mobilizations or the leadership that all accompany a social movement and instead organize in decentralized silos. As a result, government and corporate leaders have co-opted feminism to turn it into something that can be bought, sold, or used to attract voters. Campaigns like #BeenRapedNeverReported, #MeToo, the SlutWalks and the Canadian Women's marches, while important, don't yet have the organized power to bring the changes that activists seek to make in society. In *Take Back The Fight*, Nora Loreto examines the state of modern feminism in Canada and argues that feminists must organize to take back feminism from politicians, business leaders and journalists who distort and obscure its power. Furthermore, Loreto urges today's activists to overcome the challenges that sank the movement decades ago, to stop centering whiteness as the quintessential woman's experience, and to find ways to rebuild the communities that have been obliterated by neoliberal economic policies. Meticulously documented investigation uncovering the political secrets surrounding John F. Kennedy's assassination.

Uncovers the elements of creative collaboration by examining six of the century's most extraordinary groups and distill their successful practices into lessons that virtually any organization can learn and commit to in order to transform its own management into a collaborative and successful group of leaders. On a chilly April day in 2001, some 75,000 protesters flooded the streets of Quebec City to denounce corporate globalization and a neoliberal trade deal. From that wellspring of activist anger, energy, and hope came the founding of *rabble.ca*: an alternative news source and community space that reported on Canadian politics from the ground, catching the attention of journalists and activists across the country. Since then, Canada has seen the rise of Harper Conservatism and its replacement by a Liberal government; a decline in union power; the stalled beginnings of reconciliation with Indigenous nations; the birth of Black Lives Matter; an invigorated climate justice movement; and more. These stories of activist struggle lie at the heart of *Everything on (the) Line*, a collection of *rabble.ca*'s most incisive articles from the past twenty years. Editors S. Reuss and Christina Turner guide readers deftly through *rabble.ca*'s deep and storied archives, combining critical analysis with new essays from celebrated activists and writers such as Russell Diabo, Nora Loreto, Phillip Dwight Morgan, and Monia Mazigh. Each vital selection marks a flashpoint in Canadian politics—and an opportunity to reflect on the social movements that have challenged capitalism, racism, settler colonialism, and patriarchy over the past two decades.

As Canada was in the grips of the worst pandemic in a century, Canadian media struggled to tell the story. Newsrooms, already run on threadbare budgets, struggled to make broader connections that could allow their audience to better understand what was really happening, and why. Politicians and public health officials were mostly given the benefit of the doubt that what they said was true and that they acted in good faith. This book documents each month of the first year of the pandemic and examines the issues that emerged, from racialized workers to residential care to policing. It demonstrates how politicians and uncritical media shaped the popular understanding of these issues and helped to justify the maintenance of a status quo that created the worst ravages of the crisis. *Spin Doctors* argues alternative ways in which Canadians should understand the big themes of the crisis and create the necessary knowledge to demand large-scale change.

Why have conservatives fared so much better than progressives in recent decades, even though polls show no significant move to the right in public opinion? *Cultural Dilemmas of Progressive Politics* highlights one reason: that progressives often adopt impoverished modes of discourse, ceding the moral high ground to their conservative rivals. Stephen Hart also shows that some progressive groups are pioneering more robust ways of talking about their issues and values, providing examples other progressives could emulate. Through case studies of grassroots movements—particularly the economic justice work carried on by congregation-based community organizing and the pursuit of human rights by local members of Amnesty International—Hart shows how these groups develop distinctive ways of talking about politics and create characteristic stories, ceremonies, and practices. According to Hart, the way people engage in politics matters just as much as the content of their ideas: when activists make the moral basis for their activism clear, engage issues with passion, and articulate a unified social vision, they challenge the recent ascendancy of conservative discourse. On the basis of these case studies, Hart addresses currently debated topics such as individualism in America and whether strains of political thought strongly informed by religion and moral values are compatible with tolerance and liberty.

Youth-led organizing is increasingly receiving attention from scho-

lars, activists, and the media. Delgado and Staples have produced the first comprehensive study of this dynamic field. Their well-organized book takes an important step toward bridging the gap between academic knowledge and community practice in this growing area.

The mining industry continues to be at the forefront of colonial dispossession around the world. It controls information about its intrinsic costs and benefits, propagates myths about its contribution to the economy, shapes government policy and regulation, and deals ruthlessly with its opponents. Brimming with case studies, anecdotes, resources, and illustrations, *Unearthing Justice* exposes the mining process and its externalized impacts on the environment, Indigenous Peoples, communities, workers, and governments. But, most importantly, the book shows how people are fighting back. Whether it is to stop a mine before it starts, to get an abandoned mine cleaned up, to change Laws and policy, or to mount a campaign to influence investors, *Unearthing Justice* is an essential handbook for anyone trying to protect the places and people they love.

This edited volume explores recent research and developments in the study of organized crime. It covers six key areas: drug-related issues; human trafficking and prostitution; sports and crime; procurement and corruption; and enforcement and prevention. The contributors provide timely research for understanding various aspects of organized crime, as well as the responses that have been developed worldwide to prevent and contain them. These contributions were presented at seminars of the Centre for Information and Research on Organized Crime (CIROC). It will be of interest to researchers in Criminology and Criminal Justice, particularly with an interest in organized crime and criminal networks, as well as related fields such as Comparative Law, and Political Science. This collection represents the most current thinking on entrenched problems of organized crime....This book is an important contribution in developing new approaches to organized crime and its control. — Jay S. Albanese, Ph.D., Professor and Chair, Criminal Justice Programs, Virginia Commonwealth University The book is very well organised and written and deals with a diversity of topics and approaches. — Ernesto U.Savona, Director of Transcrime, Professor of Criminology, Università Cattolica del Sacro Cuore, Milan

As a method for empirical inquiry, autoethnography has gained much purchase among business school academics. This book offers exemplars of how autoethnography can be leveraged to study myriad organization and management phenomena. Drawing on his own fieldwork in Palestine, the author engages with several timely questions including: What are the ethical implications of pursuing organization research at neo-colonial spaces? How should we account for the 'Other' when studying in ideologically fraught sites? And, how should we write so as to capture the spirit of autoethnography? In sum, this seminal text highlights the benefits of autoethnography in business school research.

From the slot machine trust of the early 1900s to the prolific Prohibition era bootleggers allied with Al Capone, and for decades beyond, organized crime in Chicago Heights, Illinois, represented a vital component of the Chicago Outfit. Louis Corsino taps interviews, archives, government documents, and his own family's history to tell the story of the Chicago Heights "boys" and their place in the city's Italian American community in the twentieth century. Debunking the popular idea of organized crime as a uniquely Italian enterprise, Corsino delves into the social and cultural forces that contributed to illicit activities. As he shows, discrimination blocked opportunities for Italians' social mobility and the close-knit Italian communities that arose in response to such limits produced a rich supply of social capital Italians used to pursue alternative routes to success that ranged from Italian grocery stores to union organizing to, on occasion, crime.

The wine industry appears to be an anomaly within the modern global economy. Thousands of small companies provide a vast variety of highly differentiated products and compete successfully with multinational corporations. Using case studies from Bordeaux, Napa Valley and Chianti Classico, this book argues that rather than being a vestige or a serendipitous phenomenon, this variety results from a sophisticated alternative organization of production. Integrating differentiation and branding into Ostrom's common pool resource theory, Jerry Patchell shows how winegrowers in a territory can use self-governance to protect and promote their common reputation while enhancing each producer's ability to differentiate their wines and build their own brand. Bordeaux, Napa, and Chianti Classico share several common challenges, but develop a set of strategies and tools appropriate to their markets and regulatory contexts.
