Post harvest management of fruits and vegetables, page no 497-506. Champ ,b.r ,highley ,E and Johnson ,G.I 1993. Post harvest handling of tropical fruits .proceedings of International conference held at Chiang mai,Thailand 19-13 july 1993.

Full article: Postharvest management of fruits and ...

In agriculture, postharvest handling is the stage of crop production immediately following harvest, including cooling, cleaning, sorting and packing. The instant a crop is removed from the ground, or separated from its parent plant, it begins to deteriorate. Postharvest treatment largely determines final quality, whether a crop is sold for fresh consumption, or used as an ingredient in a processed food product.

(vii) Waxing: Waxing of fruits or vegetables is a common post-harvest practice. Food grade waxes are used to replace some of the natural waxes removed during harvesting and sorting operations ...
