This report summarizes results from the 1994 National Assessment of Educational Progress (NAEP), specifically those results concerning geography and U. S. history. The 1994 NAEP asked 4th-, 8th-, and 12th-grade students a series of questions designed to assess their knowledge level and skills applications in specific subjects. This report provides an in-depth look at the type of tasks that made up the assessments in geography and U. S. history and how the students performed on those tasks. It makes extensive use of examples of student work and of exercise-level statistics in examining performance in different skills areas and on particular assessment exercises. Specific attention is given to the ways that students use the tools and resources of history and geography. The questions reflected the content and cognitive dimensions deemed essential for an understanding of these subjects. One content dimension included four themes: change and continuity in U.S. democracy: ideas, institutions, practices, and controversies; the gathering and interaction of peoples, cultures, and ideas; economic and technological changes and their relation to society, ideas, and the environment; and the changing role of the United States in the world. A second content dimension covers eight time periods: Three Worlds and Their Meeting in the Americas (beginnings to 1607); Colonization, Settlement, and Communities (1607 to 1763); The Revolution and the New Nation (1763 to 1815); Expansion and Reform (1801 to 1861); Crisis of the Union: Civil War and Reconstruction (1850 to 1877); Development of Modern America (1865 to 1920); Modern America and the World Wars (1914 to 1945); and Contemporary America (1945 to present). At every grade, the overall geography performance of males was higher than that of females; however, in U.S. history overall performances for males and females was significantly different at 12th grade only where males slightly outperformed females. In both subject areas, the performance of White students was higher than that of Black or Hispanic students. (MJP)

One of the most significant developments in school education in recent years has been the development and introduction of standards, a subject of considerable controversy. This book is the result of a symposium held in Kiel, a symposium that was arranged by two leading science education groups, one at IPN (Leibniz Institute for Science Education at the University of Kiel) in Germany and the other at the University of York, UK. The seminar brought together experts from 15 countries. These countries include those that have extensive experience with the effects of standards on the educational system, on individual schools and teachers and on students. Other reports concern countries which are introducing them shortly and yet others on countries that are in the early stages of development of standards. 11 are from Europe and the others are from Australia, Israel, Taiwan and the U.S. The book is divided into three parts. In Part A, two of the organizers set the scene, describing the reasons for arranging the symposium and outlining the preparations and the work done at the meeting. Part B contains 17 reports from the 15 countries and in Part C, there are two summaries, analysing the conclusions, taken from two different vantage points. The controversies surrounding standards remain. However, this book gives a succinct and authoritative overall account of the advantages and disadvantages of their introduction taken from the experiences of many countries.

On the train, on the beach, on the sofa ... many people in all parts of the world enjoy doing wordsearches. If you are studying English and want to learn and practise vocabulary related to various topics, then this book is for you! The topics reflect the kinds of everyday conversations that you might have both with native and non-native speakers of English. The topics are also those that are typically tested in English examinations e.g. TOEFL, Cambridge (First Certificate, Advanced), IELTS, and Trinity. Each chapter begins with a list of questions to enable you to have a conversation about a particular topic in various situations: on a social occasion (e.g. a work dinner, a conference lunch, a party); in the classroom during an English lesson; when chatting, either face to face or online; and

during an English oral exam. After the list of questions, you will find a Word List associated with the topic and exercises to test your knowledge of less common words. The final aim is then to find the words from the Word List in the related Wordsearch. Easy English! is a series of books to help you learn and revise your English with minimal effort. You can improve your English by: reading texts in English that you might normally read in your own language e.g. jokes, personality tests, lateral thinking games, and wordsearches; doing short exercises to improve specific areas grammar and vocabulary, i.e. the areas that tend to lead to the most mistakes - the aim is just to focus on what you really need rather than overwhelming yourself with a mass of rules, many of which may have no practical daily value. Other books in the Easy English! series include: Wordsearches: Widen Your Vocabulary in English Test Your Personality: Have Fun and Learn Useful Phrases Word games, Riddles and Logic Tests: Tax Your Brain and Boost Your English Top 50 Grammar Mistakes: How to Avoid Them Top 50 Vocabulary Mistakes: How to Avoid Them

This book focuses on how current and prospective teachers worldwide are prepared for the significant task of teaching geography, given the important role of teachers. It eschews a traditional career-centric framework (pre-service, in-service teaching) in favor of a topical approach toward issues that all teachers face. The book updates thinking on geography education subfields such as GI education and fieldwork and traces important contemporary discourses such as digitalization and sustainability. The book further explains the broad variety of institutionalization of geography teacher education in various political systems. In short, this book collects strategies for geography teacher educators worldwide to provide insight into the challenges, conditions, and solutions present at the classroom and institutional level. As such, this book is a must-have for teacher educators and geography teachers worldwide.

Take students in grades 6 and up on a field trip without leaving the classroom using World Geography: Daily Skill Builders! This 96-page book features two short, reproducible activities per page and includes enough lessons for an entire school year. It covers topics such as location and place, human-environment interaction, different types of maps, map reading, and the regions and countries of the world. Activities become more challenging as students build upon what they have learned. The book is perfect for review and practice and supports National Geography Standards.
