Governance, Risk and Compliance (GRC) The Pathway to Principled Performance If Principled Performance is the goal, then integrated GRC is the pathway to get there.

Governance, risk and compliance (GRC) is

a combined area of focus developed to cover an organization's strategy to handle any interdependencies between the three components. GRC aids an organization in achieving its goals through coordinating strategies around corporate governance, enterprise risk management (ERM) and compliance with any regulated requirements.

IT Governance, Risk and Compliance (IT GRC) Does business understand how IT operates or what it can and cannot do within a certain time frame? Is the IT organisation faced with dramatic change following a merger/acquisition? Is there adequate view or control over IT spending, or are IT costs perceived to be too high?

Governance, risk management, and compliance (GRC) is a corporate management system that focuses on integrating these three key elements across all departments.

Governance, management, and operations—governance involves setting directions, optimizing risks and resources, and monitoring performance and compliance to achieve an organization's objectives. It can be broadly classified into corporate governance, business governance, IT governance and legal governance.
