While engagement should focus on the issues and principles laid out in the note, there is, of course, scope for staff to tailor engagement to country specific circumstances beyond proposed practices.

The paradigm shift of GST liability from Restaurants to Food Aggregators from 1st January 2022 on the supply of 'restaurant services' would force these players to make foundational changes in their busi-

ness processes to implement the said amendment. Further, there would be many critical legal questions that may arise during such implementation. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

For more than 30 years, students and practising electricians have relied on John Whitfield to guide them through the complexities of the Wiring Regulations. Unlike other publications, it does not assume that readers are fully conversant with electrical theory. It assumes just a basic knowledge and introduces technical

matter with brief easy-to-understand explanations. His Guide is a recognised brand, has consistently been a bestseller and regarded as THE guide to the Wiring Regulations. This 4th Edition covers Amendment 3:2015, regarded as 'potentially life-saving', which comes into effect July 2015. As in earlier editions, all useful relevant details derived from other IET publications such as Guidance Notes, Wiring Matters, which might otherwise be overlooked by electricians, are included. Importantly the Guide also benefits from the most up-to-date, hands-on expertise provided by the co-author, Andrew Hay-Ellis, whose credentials are second-to-none. He is an established author of vocational electrical books and, amongst other functions, is a Chief Examiner at City & Guilds.

Addresses the areas highlighted as poor in the Chief Examiner's feedback of candidate performance Assists students in decoding questions found in the City and Guilds 2394 and 2395 exams Uses realistic exam questions as examples and rather than simply providing the answers, explains how the student should go about answering a question of that type. An essential guide to the City and Guilds 2394/2395 Initial Verification and Certification of Electrical Installation and Periodic Inspection and Testing qualifications, this book addresses the areas which have resulted in a considerable failure rate, such as the technical and legal terminology used within these exams. Full coverage of technical terms is included, as is the structure of exam questions and their interpretation. By running through examples of real exam questions in a step-by-step fashion, this book explains how to decode the questions and examine the answer choices in order to get to the correct answers. This book is ideal for all electricians, re-

gardless of their experience, who need a testing qualification in order to take the next step in their career.

Urbanization will become one of the defining trends of Asia's transformation in the coming decades. Investments in urban areas have a strong potential to contribute to inclusive growth, reduce urban poverty, and strengthen social resilience. The Guidance Note on Poverty and Social Dimensions in Urban Projects aims to assist Asian Development Bank (ADB) staff, including practitioners and specialists working on their behalf, to effectively address the poverty and social dimensions of ADB's urban operations. It provides practical guidance in strengthening the link between urban investments and poverty reduction by making better use of poverty and social analysis as a resource for successful projects. The guide complements the Handbook on Poverty and Social Analysis (2012) which provides general guidance on incorporating poverty and social dimensions in ADB operations.

The New Engineering Contract (NEC) is a modern day family of standard contracts that truly embraces the concept of partnership and encourages employers, designers, contractors and project managers to work together to achieve the client's objectives. Each of the main options is printed as a separate document and contains the Core Clauses merged with the applica-

ble main Option Clauses. Under Option E of the EEC, the Contractor is reimbursed his Actual Costs plus a Fee. Actual Cost for non-subcontracted work is defined in the schedule of Cost Components at the back of the Contract and predominantly covers the Contractor's direct and indirect on-site costs. This contract will be effective when: - time or quality are overriding priorities for the Employer or - the scope is not sufficiently defined at the outset or the contract is subject to a high level of uncertainty e.g. in planning interfaces or risks encountered such that the Contractor is unable to price the works with any degree of accuracy.

"This note provides general guidance on the use of the Flexible Credit Line (FCL). After an overview of the instrument, explaining its specific nature, the operational issues are grouped into three areas:

- an outline of the process and specific steps that need to be followed if a member expresses interest in an arrangement;
- guidance on determining qualification of a member; and
- a how-to guide for determining appropriate access levels.

The note is an aid to the implementation of the policy and its underlying principles. If there is any instance in which a provision of the guidance note or its implementation conflicts with Board policy, Board policy prevails. It will be revised

as needed, for example following relevant policy reviews."
