External desktop hard drives buying guide | Macworld

The most important thing to consider when buying a hard drive is the value of the data on the drive and what it would cost to replace that data. If you have a good backup plan and practice the 3-2-1 backup strategy , then the value of a given drive is low and limited to the time and cost it takes to replace the drive that goes bad.

Everything you need to know before buying an external hard drive Using an external hard drive is an affordable way to back up data on your PC and keep it safe from system crashes and other ...

7. Internal and External Hard Drives for Mac. If you're on a MacBook Air, MacBook Pro, Mac Mini, or iMac, then there are a handful of extra considerations you should keep in mind when buying a hard drive. Internal Mac Hard Drives. The most important thing is that Mac hard drive upgrades are pretty much DIY projects.

An external hard drive is useless if there's no way to connect it to your computer. Most drives can handle a USB 3.0 connection, and some newer drives can use the faster USB 3.1. If you have an older computer, with support only for USB 2.0, an external hard drive will still work fine, but data

will transfer more slowly.

Often overlooked as something that you need to buy “bigger” to be better, hard drives and storage devices have evolved a bit from their heavy-set historical past. At first, it may seem daunting to keep up with the different formats and technologies. What follows in this buying guide will help you choose the best storage for your desktop PC.
