Consumable Reading and Children's Literature explores how multisensory experiences enhance early childhood literacy practices through material and sensory interactions. Embodied engagements that focus on the gustatory experience and, in particular, the sense of taste are investigated by studying food-related narratives. Children's literature and different reading scenarios involving consumable objects, packages, tableware and utensils are scrutinized. Surfaces, the underlying mechanisms that support children's literature, are considered in connection to emerging media and groundbreaking technologies. The interdisciplinary nature of this work draws on material and surface science, human-computer interaction, arts and food studies. As innovation and everyday materials meet, the potential of hybrid narratives mimicking synesthesia emerges with discussions on cross-modal learning. This monograph will inspire the interest of not only students, teachers, scholars of children's literature and child development but also researchers and practitioners across various artistic and scientific disciplines.

Fully illustrated. Heidi is a novel about the events in the life of a young girl in her grandfather's care, in the Swiss Alps. Heidi is an orphaned girl initially raised by her aunt Dete in Maienfeld, Switzerland after the early deaths of her parents, Tobias and Adelheid (Dete's sister and brother-in-law). Dete brings 6-year-old Heidi to her paternal grandfather's house, up the mountain from Dörfli. He has been at odds with the villagers and embittered against God for years and lives in seclusion on the alm. This has earned him the nickname Alm-Uncle. He briefly resents Heidi's arrival, but the girl's evident intelligence and cheerful yet unaffected demeanor soon earn his genuine, if reserved, affection. Heidi enthusiastically befriends her new neighbors, young Peter the goatherd, his mother, Bridgget, and his blind maternal grandmother. With each season that passes, the mountaintop inhabitants grow more attached to Heidi. Heidi is one of the best-selling books ever written and is among the best-known works of Swiss literature.

Midget, feeble-minded, crippled, lame, and insane: these terms and the historical photographs that accompany them may seem shocking to present-day audiences. A young woman with no arms wears a sequined tutu and smiles for the camera as she smokes a cigarette with her toes; a man holds up two prosthetic legs while his own legs are bared to the knees to show his missing feet. The photos were used as promotional material for circus sideshows, charity drives, and art galleries. They were found on begging cards and in family albums. In *Picturing Disability*, Bogdan and his collaborators gather over 200 historical

photographs showing how people with disabilities have been presented and exploring the contexts in which they were photographed. Rather than focus on the subjects, Bogdan turns his gaze on the people behind the camera. He examines the historic and cultural environment of the photographs to decipher the relationship between the images and the perspectives of the picture makers. In analyzing the visual rhetoric of these photographs, Bogdan identifies the wide variety of genres, from sideshow souvenirs to clinical photographs. Ranging from the 1860s, when photographs first became readily available, to the 1970s, when the disability rights movement became a force for significant change, Bogdan chronicles the evolution of disability image creation. *Picturing Disability* takes the reader beyond judging images as positive or slanderous to reveal how particular contexts generate specific emotions and lasting depictions.

Weissenberger's Ohio Civil Procedure Litigation Manual provides a thorough, yet concise, analysis of the Ohio Rules of Civil Procedure. It is intended to aid the practitioner, judge, and student alike in understanding the operation and application of the Rules in situations that recur throughout the course of litigation. Although this manual is not exhaustive of every procedural issue in Ohio, it is anticipated that it will function both to identify other additional sources on Ohio law as well as to re-

solve problems frequently engendered by the application of the Rules. Each chapter contains the full text of each Rule in a format that lends itself to easier examination and dissection than any other currently available. Practical commentary on each rule is also provided, as are hundreds of illustrations of possible applications. This publication also includes a list of additional Ohio authorities and a carefully-selected list of leading cases. These cases are intended to serve as starting points for additional research; comprehensive annotations are beyond the scope of this manual. This manual also contains a host of other useful features, including a directory of all clerks of court within the state of Ohio, a note on judicial rulemaking in Ohio, an appellate district map, official forms, and a table used to calculate the number of days between two dates, as well as the full text of the Ohio Rules of Appellate Procedure. A quick reference index will direct the user to the section of the book where the desired information is found.

Our fate is NOT written in the stars, as the popular form of interpreting horoscopes would like us to believe. Instead, a serious approach to astrology describes an individual's special dispositions and developmental possibilities that can be lived out in entirely different ways. The experienced Jungian analyst and astrologist Marianne Meister connects this reputable astrological approach with the theories of C.G. Jung's Analytical Psychology. In her *Depth Psychological Astrology*, she works out the various basic patterns of the personality and makes it possible for readers to discover their own inclinations, needs, and potential. This book shows that the experiential knowledge from astrology and depth psychology can be used like a roadmap as important help in orientation on the path of life.

Older Yet Faster (English and French editions with illustrations and photos, and online lesson and exercise videos) is a manual for teaching runners how to transition to efficient running and to help them to avoid incurring almost all of the common running injuries as they do so. It is ideal for beginners to learn how to run well and for experienced runners to changeover to good technique. Coaches can also use this book as a reference on how to implement technique change for their clients, and we expect it to become the go-to manual for medical professionals, to help them deal with running related injuries caused by bad technique and footwear. After learning how injuries are caused and then gaining a good understanding of running technique in the early chapters you will be prepared to read about our technique-change system which we call "OYF Running". This consists of "Keith's Lessons" used in combination with "Heidi's Strengthening Exercises" and forms the main body of the book." Keith shows you how to run efficiently in a simple, step-by-step guide both in the book and with videos. Each Lesson provides exercises set out in a format which is both easy to understand and implement. The first three lessons teach you the basics of running correctly and the last three help you put these into practice and help you to refine your technique over the period of your transition. This program is set up so that runners can teach themselves in conjunction with the online videos and

forum. Heidi's Strengthening Exercises consists of a well-ordered series of exercises which will help your body safely adjust to the redistribution of the workload and are essential to rebuild parts of the body which have been neglected due to poor technique. It should be started as soon as possible, in order to build strength and to deal with the resultant muscle and tendon soreness that you will start to experience. We identify specific injuries and how they are caused and we show how by improving running technique, and re-strengthening these injuries are quickly cured. Podiatrists will find Heidi's experiences and advice particularly interesting, especially as they will almost certainly, be in conflict with what is still taught in universities. Chapters Twelve and Thirteen, 'Managing the changes' and 'Rehabilitation', explain what should happen during the transition and what to do should you get injured, or if you are currently injured. Chapter Fourteen is very important as you must have suitable footwear to run with good technique. There is then a chapter on how your body shape will change as you adopt your new technique and a chapter on general tips and traps a list of commonly used terms, a glossary and an index. Finally, we have included three appendices: For Coaches, For Podiatrists and a detailed look at Heidi's strengthening program. In Appendix A, Keith discusses how to implement his Lessons from a coach's point of view, in Appendix B, Heidi explains how she treats her patients who are suffering with specific injuries and in Appendix C she explains her Strengthening program in greater detail for medical professionals and interested runners.
