aminers and teachers, it offers authoritative and engaging guidance through the topic, exploring domestic developments during this time in Germany, Italy, Spain and France.

Originally published in 1984, The Roots of Modern Environmentalism provides a historical, philosophical and ideological background to environmentalism. Topics covered include, the roots of technological environmentalism, the medieval cosmology and Bacon's philosophy, the non-scientific roots of ecological environmentalism, such as Romanticism and its scientific roots in the theories of Malthus and Darwin. The Marxist perspective on Nature is also discussed. The concluding chapter is a criticism of education which challenges its usefulness as an agent of socio-economic change. This book will be of interest to academics and students of environmentalism and geography.

How To Choose a Pre-University Course in Malaysia? Questions you should ask yourself and courses to consider before making your decision. Let us help you find the best Pre-University course for you!

The 2013 IB HL Economics syllabus change introduced Paper 3, an essentially calculations-based assessment. This development challenged teachers and students alike, as few Paper 3 practice resources have been available. THIS is furthermore an area of the syllabus where, as in Mathematics, practice is fundamentally important in developing the skills and confidence for needed for success. Paul Hoang's latest publication therefore represents an invaluable resource in helping students to prepare for the examination challenges they face. For many candidates the mix of words, theory and numbers in Paper 3 questions can be overwhelming, if they have not developed easy familiarity throughout their course. With clear layout and content that beautifully mirrors IB examination questions, this resource is the one we have all been waiting for. I absolutely recommend it as a 'must have' for all those who are preparing for the HL Economics examination. IT is a core resource invaluable to students and teachers alike. Janet Barrow, IB Economics Teacher, OSC Teacher, IB Examiner, author of IB Business Management and TOK teacher resources 20160615

subject. - Includes new integrated subtopics of Economics of the environment and Economics of inequality and poverty which helps bring to light the global challenges facing the planet today and how these can be addressed using an Economics lens. - Apply new skills and knowledge to everyday life with examples and case studies. - Foster the attributes of the IB learner profile with explicit reference made throughout, as well as TOK links for every topic. - Prepare for the new assessment model with exam-style questions and review questions. - Avoid common mistakes and aim for the best grades with expert tips and hints.

Book 1 *Trinity of the Dark Legacy Cycle* details the violent end of the Kai Order; an ancient, spiritual guild of warrior guardians and priestesses who have sworn their lives to protect the Oracle Queen of Atlantis; at the hands of Maniok, the being referred to as the "Great Evil" in the age-old Song of the Oracle King. It is a chronicle of Arkan, the last Kai guardian, and his desperate attempt to save the life of his priestess who carries his unborn son, and his escape from Atlantis. It is the story of Kieko, a lonely Lemurian boy of mixed blood who seeks to know more about his absent father's mysterious Atlantean past. Constantly bullied by Aiko, he eventually takes refuge with the village priest in the Kadek Temple where he studies medicinal and culinary arts, calligraphy, and ultimately, the art of Ki sword. Under the tutelage of the priest he comes to know the grim truth about his father, and is prepared to face the horrific assault of the armies of the Atlantean Empire upon his humble world.

Principles of Economics in Context lays out the principles of micro- and macroeconomics in a manner that is thorough, up to date, and relevant to students, attuned to the economic realities of the world around them. It offers engaging treatment of important current topics such as new thinking in behavioral economics, financial instability and market bubbles, debt and deficits, and policy responses to the problems of unemployment, inequality, and environmental sustainability. This new, affordable edition combines the just-released new editions of *Microeconomics in Context* and *Macroeconomics in Context* to provide an integrated full-year text covering all aspects of both micro and macro analysis and application, with many up-to-date examples and extensive supporting web resources for instructors and students. Key features include: An eye-opening statistical portrait of the United States; Clear explanation of basic concepts and analytical tools, with advanced models presented in optional chapter appendices; Presentation of policy issues in historical, institutional, social, political, and ethical context--an approach that fosters critical evaluation of the standard microeconomic models, such as welfare analysis, labor markets, and market competition; Issues of human well-being, both domestic and global, are given central importance, enriching the topics and analytical tools to which students are introduced; The theme of sustainability--financial, social, and ecological--is thoroughly integrated in the book, with chapters on alternatives to standard GDP measurement, the environment, common property, public goods, and growth and sustainability in the twenty-first century; Full complement of instructor and student support materials online, including test banks and grading through Canvas.

Once called the "dismal science," economics now offers prescriptions for improving people's happiness. In this book Richard Easterlin, the "father of happiness economics," draws on a half-century of his own research and that conducted by fellow economists and psychologists to answer in plain language questions like: Can happiness be measured? Will more money make me happier? What about finding a partner? Getting married? Having a baby? More exercise? Does religion help? Who is happier--women or men, young or old, rich or poor? How does happiness change as we go through different stages of life? Public policy is also in the mix: Can the government increase people's happiness? Should the government increase their happiness? Which countries are the happiest and why? Does a country need to be rich to be happy? Does economic growth improve the human lot? Some of the answers are surprising (no, more money won't do the trick; neither will economic growth; ba-

bies are a mixed blessing!), but they are all based on reason and well-vetted evidence from the fields of economics and psychology. In closing, Easterlin traces the genesis of the ongoing "Happiness Revolution" and considers its implications for people's lives down the road.

Comprehensive books to support study of History for the IB Diploma Paper 3, revised for first assessment in 2017.

Now in colour, with increased diagrams and photographs to support students' learning as well as a CD-ROM that contains 17 handy revision sheets, specimen papers, glossary, and weblinks for further research.

Digital technologies are spreading rapidly, but digital dividends--the broader benefits of faster growth, more jobs, and better services--are not. If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone, why can't others around the world do the same? If 8 million entrepreneurs in China--one third of them women--can use an e-commerce platform to export goods to 120 countries, why can't entrepreneurs elsewhere achieve the same global reach? And if India can provide unique digital identification to 1 billion people in five years, and thereby reduce corruption by billions of dollars, why can't other countries replicate its success? Indeed, what's holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver? Two main reasons. First, nearly 60 percent of the world's population are still offline and can't participate in the digital economy in any meaningful way. Second, and more important, the benefits of digital technologies can be offset by growing risks. Startups can disrupt incumbents, but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms. Employment opportunities may be greater, but not when the labor market is polarized. The internet can be a platform for universal empowerment, but not when it becomes a tool for state control and elite capture. The World Development Report 2016 shows that while the digital revolution has forged ahead, its 'analog complements'--the regulations that promote entry and competition, the skills that enable workers to access and then leverage the new economy, and the institutions that are accountable to citizens--have not kept pace. And when these analog complements to digital investments are absent, the development impact can be disappointing. What, then, should countries do? They should formulate digital development strategies that are much broader than current information and communication technology (ICT) strategies. They should create a policy and institutional environment for technology that fosters the greatest benefits. In short, they need to build a strong analog foundation to deliver digital dividends to everyone, everywhere.

Comprehensive books to support study of History for the IB Diploma Paper 3, revised for first assessment in 2017.
