The discipline of international relations offers much insight into why violent power transitions occur, yet there have been few substantive examinations of why and how peaceful changes happen in world politics. This work is the first comprehensive treatment of that subject. The Oxford Handbook of Peaceful Change in International Relations provides a thorough examination of research on the problem of change in the international arena and the reasons why change happens peacefully at times, and at others, violently. It contains over forty chapters, which examine the historical, theoretical, global, regional, and national foreign-policy dimensions of peaceful change. As the world enters a new round of power transition conflict, involving a rapidly rising China and a relatively declining United States, this Handbook provides a necessary resource for decisionmakers and scholars engaged in this vital area of research.

This book is designed to introduce readers to a representative range of work which raises what should be regarded as pressing ethical issues in the context of international politics. Although by no means comprehensive in coverage of the possible questions that could be appropriately asked, the chapters convey a sense of how variegated is the field of ethical inquiry in the global realm. Some of the issues are familiar to students of international relations, some of them less so. What they all show, however, is that the academic discipline of international relations has much to learn and benefit from how such problems may be addressed using techniques and approaches that have, until recently, been rather more exclusively restricted to domestic -- nation-statist -- political theory...(From the Introduction) Contents: Introduction: Topics in International Political Theory; Who Should Pay (And How Much) for Realising Human Rights?; World Citizenship and The Ethics of Individual Responsibility; World Hunger, Moral Theory, and Radical Rawlsianism; Kids 'R' Us? Children as Political Bodies; Dealing with the Past: Forgiveness and the Reconstruction of Memory in Divided Societies; Outsour

This comprehensive guide captures important trends in international relations (IR) pedagogy, paying particular attention to innovations in active learning and student engagement for the contemporary International Relations IR classroom.

Global Politics: A Toolkit for Learners is an innovative and exciting new learner-centered approach to the study of international relations. Leveraging decades of in-class teaching and learning experiences, authors Roni Kay M. O'Dell and Sasha Breger Bush have developed evidence-based teaching and learning practices which support a scaffolded, skills-oriented approach. Each chapter introduces historical documents from key political events, important concepts and the techniques learners need to independently and actively engage with primary sources. Readers are encouraged to develop a personal connection with global issues, to consider matters of justice, freedom and equality, and to think critically about possibilities for social transformation in the global arena.

This book analyzes China's attitude to international law based on historical experiences and documents, and provides an explana-

tion of China's approaches to international legal issues. It also establishes several elements for a possible framework of Chinese theory on international law. The book offers researchers, university students and practitioners valuable insights into how China views international law and why it does so in the way it does.

The conference "The United States and the World: from Imitation to Challenge" was meant to gather those interested in various aspects of the mutual connections between the United States and the world. It concentrated on the problem of the model of American democracy, the presidential system, American politics, American society, American culture and the world's reflections about them from imitation to challenge. For this, there was an invitation to scholars from many research fields: political science, philosophy, law, culture studies, economy, and sociology. It was a result of our vision of American Studies as an interdisciplinary effort. And so, thanks to the rich and diverse approaches of the participants, our vision turned out to be true. The effect of the conference is reflected in the contributions that follow in this volume and in the rich, interdisciplinary debate over the American impact on the world, integration in Pax Americana and patterns of integration in other parts of the world, different and/or similar approaches to challenges to international order, and last but not least the issue of continuity and change in politics. Here one also needs to mention the ever-present debate on the American "export" of values: separation of church and state, human rights, the idea of sovereignty, the rule of separation of powers, modern federalism, democratization approaches, Americanism, American Studies dilemmas, American exceptionalism, uniqueness in contemporary American society, and patterns in foreign policy

This updated and expanded edition of the highly popular volume originally published in 1997 describes the tools and skills of peace-making that are currently available and critically assesses their usefulness and limitations.

An examination of the ways cyberspace is changing both the theory and the practice of international relations.

This book distills the essential elements of world politics, both the enduring characteristics as well as the revolutionary changes that may be altering the very fabric of the centuries-old state system. Author J. Martin Rochester explores all the important topics that one would expect to find in an IR text (war, diplomacy, foreign policy, international law and organization, the international economy, and more) but injects fresh perspectives on how globalization and other contemporary trends are affecting these issues. In addition, the author does so through a highly engaging, lively writing style that will appeal to today's students. Fundamental Principles of International Relations is a tightly woven treatment of international politics past and present, drawing on the latest academic scholarship while avoiding excessive jargon and utilizing pedagogical aids while avoiding clutter. Rochester ultimately challenges the reader to think critically about the future of a post-Cold War and post-9/11 world that is arguably more complex, if not more dangerous, than some previous eras, with the potential for promise as well as peril.

Contemporary Africa and the Foreseeable World Order brings together rich and diverse contributions from seasoned scholars from around the globe. Anchored in a wide array of disciplinary perspectives, the contributors explore the interesting and complex dynamics at play in Africa's interactions with the rest of the world.

Communication in the broadest sense gains increasing importance in UN peace missions. However, a gap between demand and reality can be observed that points to a multitude of problematic issues. These are taken up by the thesis and it is finally argued: Successful communication strategies need to be aligned to the goals and tasks of the UN mission on all levels in order to be credible; they need to be conflict and context responsive, inclusive and participatory, consider cultural peculiarities and cross vertical as well as horizontal conflict lines. In the tradition of conflict transformative approaches a framework for analysis and evaluation of communication strategies is built and applied to the UN peace missions in Timor-Leste and Nepal. Derived is a dynamic model for the design of communication strategies that covers all relevant fields of action and performances.

An in-depth account of why countries' treacherous foreign policies often have harmless origins, how this predicament shapes international politics, and what to do about it. The increasing unpredictability of state behavior in recent world politics is a surprising development. The uncertainty that results intensifies conflict and stymies trust. In Volatile States in International Politics, Eleonora Mattiacci offers the first account of this issue that investigates which states have been volatile and why. Leveraging statistical

techniques and archival data in a probing analysis of rivals and allies since the end of World War II, she rejects attempts at dismissing volatility as reflecting mercurial leaders or intractable issues. Instead, Mattiacci explains that a state acts in a volatile manner when its clashing domestic interests leverage power to achieve their goals on the international arena. In demonstrating states' potential for volatile behaviors, she asks us to reconsider how much we really know about change and instability in international politics. When properly understood, she shows, volatile behavior can become less confusing for observers and potentially less dangerous. This book offers novel, evidence-based tools to cope with volatility in the global arena.

A collection of studies examining the role of gender in teaching and learning in the traditionally male-dominated field of political science. Gender in the Political Science Classroom looks at the roles gender plays in teaching and learning in the traditionally male-dominated field of political science. The contributors to this collection bring a new perspective to investigations of gender issues in the political behavior literature and feminist pedagogy by uniting them with the Scholarship of Teaching and Learning (SoTL). The volume offers a balance between the theoretical and the practical, and includes discussions of issues such as curriculum, class participation, service learning, doctoral dissertations, and professional placements. The contributors reveal the discipline of political science as a source of continuing gender-based inequities, but also as a potential site for transformative pedagogy and partnerships that are mindful of gender. While the contributors focus on the discipline of political science, their findings about gender in higher education are relevant to SoTL practitioners, other social-science disciplines, and the academy at large. "A bold and compelling collection that asks important questions about the ways in which the teaching of Political Science reproduces gender inequities." --Aeron Haynie

This book examines the key motivations for and challenges to greater regional integration in Southeast Asia. It demonstrates how security and economic concerns -domestic, regional and international - have either contributed to, or detracted from, an increased level of unity and cooperation in ASEAN. It also explores how the patterns of interaction and socialization generated by these issues, together with the nature of domestic political systems, have affected the emergence of common values, norms and interests. It covers the full range of issues confronting ASEAN at present, and the full range of ASEAN countries, and discusses both developments in ASEAN to date and also likely future developments.

The author is an Assistant Professor of Political Science at Chandernagore Government College, West Bengal, India. She received her Ph.D. in International Relations from Jadavpur University in 2014 and is a Gold medallist in her M.A. programme from the same university. She has also served as an instructor of German language at the Ramakrishna Mission Institute of Culture, Kolkata and translated several English and Bengali texts and songs into German language. Her areas of interest include: international politics, defence and strategic studies, comparative politics and international law. Since the Second World War, there have been very few women politicians to have come to lead their nations and dominate the world politics. Out of them, Indira Gandhi, Margaret Thatcher and Golda Meir are regarded as powerful women leaders of the world. These three Premiers were the first and only women leaders to have assumed political leadership in their respective countries till date. They were universally recognised as Iron Ladies because of their command and control over their respective governments, their conviction mindset and their capability to transform and implement their visions and ideas into practical policies. They were surrounded by male colleagues and there was hardly any woman in their respective Cabinets or governments; nor did they portray themselves as representatives of womenfolk. Also, their policies bore no reflection of women-friendly approaches; neither were they supporters of women's rights, nor did they encourage women's participation in politics or promote women's empowerment. They were successful in maintaining domestic peace and resisted external aggressions with strong hands, for which, they were universally recognised as tough leaders and were personified with their respective countries as well. This book intends to look at their electoral politics, modes of functioning and the power-sharing patterns, makes a comparative study of the nature of their leadership, along with the personal and institutional factors in their access to power, mitigating domestic discontents as well as their individual roles in the Indo Pak War of 1971, the Falklands Island dispute of 1982 and the Yom Kippur War of 1973.

The issues raised by the Iraq War are symptomatic of larger phenomena that will continue to preoccupy American foreign policy makers well into the twenty-first century. The war on terror, the proliferation of weapons of mass destruction, humanitarian intervention, and a litany of other concerns on the foreign policy agenda pose complex dilemmas for which there are no simple answers. Through lucid, lively analysis, as well as multiple illustrations and case studies, *US Foreign Policy in the Twenty-First Century* explores the difficult choices that confront the United States today in a complicated and often dangerous post-Cold War environment. Author J. Martin Rochester engages students in an intelligent examination of American foreign policy past, present, and future, involving them in critical thinking about how foreign policy is made, what factors affect foreign policy decisions and behavior, and how one might go about not only describing and explaining foreign policy but also evaluating it and prescribing solutions.

This book offers a critical engagement with contemporary IR textbooks via a novel folklorist approach. Two parts of the folklorist approach are developed, addressing story structures via resemblances to two fairy tales, and engaging with the role of authors via framing gestures. The book not only looks at how the idea of 'social science' may persist in textbooks as many assumptions about what it means to study IR, but also at how these assumptions are written into the defining stories textbooks tell and the possibilities for (re)negotiating these stories and the boundaries of the discipline. This book will specifically engage with how the stories in textbooks constrain how it is possible to define IR through its (re)production as a social science discipline. In the first part, story structures are explored via *Donkeyskin* and *Bluebeard* stories which the book argues resemble some structures in textbooks that define how it is permissible to tell stories about IR. In the second part the role of authors is explored via their framing gestures within a text, drawing on a number of fairy tales. By approaching the stories in textbooks alongside fairy tales, Starnes reflects back onto IR the disciplining practices in the stories textbooks tell by rendering them unfamiliar. Aiming to spark a critical conversation about the role of textbooks in defining the boundaries of what counts as IR and by extension the boundaries of the IR canon, this book is of great interest to students and scholars of international relations.

This volume explores the domestic and transnational considerations associated with Indonesia's ascent, referring to its rise in terms of hard and soft power and its likely trajectory in the future. This book examines the emergent conviction that UN robust peacekeeping works better than UN traditional peacekeeping in reducing civilian killings within contemporary post-cold war violent civil wars. In an unprecedented study, Nsia-Pepra has systematically and empirically documented the relationship between robust peacekeeping and civilian killings in violent civil wars using both statistical and case study models. His research, engagingly expounded upon in *UN Robust Peacekeeping*, indicates that robust peacekeeping works better than traditional peacekeeping in lowering civilian killings by spoilers in violent civil wars. His book also presents the concept of a formidable barrier model of robust peacekeeping success using the game theoretical model. It makes policy recommendations to enhance the UN's capacity to protect civilians from human rights violations, including a unified, coherent doctrinal definition for robust peacekeeping, an operational doctrine on the use of force, and improved UN intelligence capacity. Nsia-Pepra also suggests employing the GA 1950 Uniting for Peace Resolution as well as robust mandates, common training doctrine, pre-deployment training, improved UN intelligence capacity, major power participation, implementation of R2P and US objective global leadership.

Historically, artwork has played a powerful role in shaping settler colonial subjectivity and the political imagination of Westphalian sovereignty through the canonization of particular visual artworks, aesthetic theories, and art institutions' methods of display. *Creative Presence* contributes a transnational feminist intersectional analysis of visual and performance artwork by Indigenous contemporary artists who directly engage with colonialism and decolonization. This book makes the case that decolonial aesthetics is a form of labour and knowledge production that calls attention to the foundational violence of settler colonialism in the formation of the world order of sovereign states. *Creative Presence* analyzes how artists' purposeful selection of materials, media forms, and place-making in the exhibitions and performances of their work reveals the limits of conventional International Relations theories, methods, and debates on sovereignty and participates in Indigenous reclamations of lands and waterways in world politics. Brian Jungen's sculpture series *Prototypes* for *New Understanding* and Rebecca Belmore's filmed performances *Vigil* and *Fountain* exhibit how colonial power has been imagined, visualized and institutionalized historically and in contemporary settler visual culture. These contemporary visual and performance artworks by Indigenous artists that name the political violence of settler colonial claims to exclusive territorial sovereignty introduce possibilities for decolonizing audiences' sensibilities and political imagination of lands and waterways.

This volume, a product of the first Tricontinental Conference organized by Yeditepe University, Istanbul, brings together perspectives on democracy and development in Africa, the Middle East and Latin America. Representing local voices and insight, the contributors here respond to the dearth of comparative analysis on these three regions. In spite of the differences observed in colonial practices and postcolonial transitions, a shared disenchantment with the performance of competitive politics comes to the forefront in these geographical areas. Decades after decolonization, low-intensity democracy and the continuing potential for democratic reversals and backsliding make the study of these three regions relevant. Considering the debates on protests, social upheavals, activism, change and continuity, this book encourages the reader to survey the various trials and tribulations of the postcolonial era.

Analyses of the political and ideological transformation of Hizbullah.

This book provides an insightful analysis from complementary perspectives of the seven-decades-long contest and contestation between the People's Republic of China and the Republic of China for diplomatic recognition on the Africa continent. It examines China and Taiwan's presence and active involvement in African affairs.

The ongoing political turmoil in the Middle East as a whole would seem to be essentially a contest between the minimalist and maximalist positions on popular sovereignty: should power merely come from, and be exercised in the name of, the people? Or, should those in power be fully accountable to the people? The dilemma warrants a closer look. The present volume comes out of an international conference held in Calcutta, India organised by the Institute of Foreign Policy Studies and the Centre for Pakistan and West Asian Studies, University of Calcutta in March 2013. This volume aims not at a definitive analysis of why what happened did happen; it aims instead at getting a sense of what was actually happening, and what is at issue.
