432 - CONRAD CURTIS

In the vein of Jurassic Park, this high-concept thriller follows a group of graduate students lured to Hawaii to work for a mysterious biotech company—only to find themselves cast out into the rain forest, with nothing but their scientific expertise and wits to protect them. In the lush forests of Oahu, groundbreaking technology has ushered in a revolutionary era of biological prospecting, feeding a search for priceless drugs and applications on a scale beyond anything previously imagined. In Cambridge, Massachusetts, seven graduate students at the forefront of their fields are recruited by a pioneering microbiology start-up, Nanigen MicroTechnologies, which dispatches the group to a mysterious lab in Hawaii. But once in the rainforest, the scientists are thrust into a hostile wilderness that reveals surprising dangers at every turn. Armed only with their knowledge of the natural world, they find themselves prey to a technology of radical and unbridled power. An instant classic, *Micro* pits nature against technology in vintage Michael Crichton fashion. Completed by visionary science writer Richard Preston, this boundary-pushing thriller melds scientific fact with pulse-pounding fiction to create yet another masterpiece of sophisticated, cutting-edge entertainment.

For more than a century, original music has been composed for the cinema. From the early days when live music accompanied silent films to the present in which a composer can draw upon a full orchestra or a lone synthesizer to embody a composition, music has been an integral element of most films. By the late 1930s, movie studios had established music departments, and some of the greatest names in film music emerged during Hollywood's Golden Age, including Alfred Newman, Max Steiner, Dimitri Tiomkin, and Bernard Herrmann. Over the decades, other creators of screen music offered additional memorable scores, and some composers—such as Henry Mancini, Randy Newman, and John Williams—have become household names. The *Encyclopedia of Film Composers* features entries on more than 250 movie composers from around the world. It not only provides facts about these artists but also explains what makes each composer notable and discusses his or her music in detail. Each entry includes Biographical material Important dates Career highlights Analysis of the composer's musical style Complete list of movie credits This book brings recognition to the many men and women who have written music for movies over the past one hundred years. In addition to composers from the United States and Great Britain, artists from dozens of other countries are also represented. A rich resource of movie music history, *The Encyclopedia of Film Composers* will be of interest to fans of cinema in general as well as those who want to learn more about the many talented individuals who have created memorable scores.

Learn critical lessons from a person who helped design and build one of the largest high-performance .NET systems in the world. This book does not just teach you how the CLR works—it teaches you exactly what you need to do now to obtain the best performance today. It will expertly guide you through the nuts and bolts of extreme performance optimization in .NET, complete with in-depth examinations of

CLR functionality, free tool recommendations and tutorials, useful anecdotes, and step-by-step guides to measure and improve performance. Among the topics you will learn are how to: Choose what to measure and why Use many amazing tools, freely available, to solve problems quickly Understand the .NET garbage collector and its effect on your application Use effective coding patterns that lead to optimal garbage collection performance Diagnose common GC-related issues Reduce costs of JITting Use multiple threads sanely and effectively, avoiding synchronization problems Know which .NET features and APIs to use and which to avoid Use code generation to avoid performance problems Measure everything and expose hidden performance issues Instrument your program with performance counters and ETW events Use the latest and greatest .NET features Ensure your code can run on mobile devices without problems Build a performance-minded team ...and much more.

Ever since 1927, when *The Jazz Singer* broke the silence of the silver screen, sound has played an integral role in the development and appreciation of motion pictures. This encyclopedia covers the people, processes, innovations, facilities, manufacturers, formats and award-winning films that have made sound such a crucial part of the motion picture experience. Every film that has won a sound-related Academy Award is included here, with detailed critical commentary. Every sound mixer or editor who has been honored by the Academy has his or her own entry and filmography, and career biographies are provided for key developers including Jack Foley, Ray Dolby, George Lucas, and more.

In this second edition of *Orchestral "Pops" Music: A Handbook*, Lucy Manning brings forward to the present her remarkable compendium of information about this form of orchestral music. Since the appearance of the first edition in 2008, this work has proven critical to successful "pops" concert programming. With changes in publishers and agents, the discontinuation of the publication of certain original material or, worst of all, presses going out of business, music directors, orchestra conductors, and professional instrumentalists face formidable challenges in tracking down accurate information about this vast repertoire. This revised handbook alleviates the time-consuming task of researching these changes by offering a list of works for orchestral "pops" concerts that is comprehensive, informative, and current. Manning's emphasis on clarity and accuracy gives users an indispensable tool for gathering vital information on the style, instrumentation, and availability of the repertoire listed, as well as notes on its performance. The user-friendly appendices include expanded instrumentation choices, easy-to-find durations, and handy title cross-references. In addition to corrections and updates, this new edition of *Orchestral "Pops" Music* includes at least 1,000 new title listings. *Orchestral "Pops" Music: A Handbook* is the ideal tool for working conductors and orchestral librarians, as well as music program directors at colleges, conservatories, and orchestras.

(Vocal Selections). Matching the music from the 2017 Tony Award nominated Broadway revival of this hit Boubliil & Schonberg musical, our collection features a baker's dozen selections in piano/vocal format. Includes: The American Dream * Bui-Doi * The Heat Is on in Saigon * I Still Believe * I'd Give My Life for You * If You Want to Die in Bed * The Last Night of the World * Maybe * The Movie in My Mind * Sun and Moon * Too Much for One Heart * What a Waste * Why God Why? Includes color artwork from the production.

(Band). Sung by the Jets gang in Bernstein's *West Side Story*, this familiar song is filled with energy and rambunctious humor. With the melodic phrases being bounced from section to section, this clever adaptation by Paul Murtha is a great way to liven up the concert stage.

A full-speed-ahead oral history of the nearly two-decade making of the cultural phenomenon *Mad Max: Fury Road*—with more than 130 new interviews with key members of the cast and crew, including Charlize Theron, Tom Hardy, and director George Miller, from the pop culture reporter for *The New York Times*, Kyle Buchanan. It won six Oscars and has been hailed as the greatest action film ever, but it is a miracle *Mad Max: Fury Road* ever made it to the screen... or that anybody sur-

vived the production. The story of this modern classic spanned nearly two decades of wild obstacles as visionary director George Miller tried to mount one of the most difficult shoots in Hollywood history. Production stalled several times, stars Tom Hardy and Charlize Theron clashed repeatedly in the brutal Namib Desert, and Miller's crew engineered death-defying action scenes that were among the most dangerous ever committed to film. Even accomplished Hollywood figures are flummoxed by the accomplishment: As the director Steven Soderbergh has said, "I don't understand how they're not still shooting that film, and I don't understand how hundreds of people aren't dead." Kyle Buchanan takes readers through every step of that moviemaking experience in vivid detail, from *Fury Road*'s unexpected origins through its outlandish casting process to the big-studio battles that nearly mutilated a masterpiece. But he takes the deepest dive in reporting the astonishing facts behind a shoot so unconventional that the film's fantasy world began to bleed into the real lives of its cast and crew. As they fought and endured in a wasteland of their own, the only way forward was to have faith in their director's mad vision. But how could Miller persevere when almost everything seemed to be stacked against him? With hundreds of exclusive interviews and details about the making of *Fury Road*, readers will be left with one undeniable conclusion: There has never been a movie so drenched in sweat, so forged by fire, and so epic in scope.

The entertainment industry has long been dominated by legendary screenwriter William Goldman's "Nobody-Knows-Anything" mantra, which argues that success is the result of managerial intuition and instinct. This book builds the case that combining such intuition with data analytics and rigorous scholarly knowledge provides a source of sustainable competitive advantage – the same recipe for success that is behind the rise of firms such as Netflix and Spotify, but has also fueled Disney's recent success. Unlocking a large repertoire of scientific studies by business scholars and entertainment economists, the authors identify essential factors, mechanisms, and methods that help a new entertainment product succeed. The book thus offers a timely alternative to "Nobody-Knows" decision-making in the digital era: while coupling a good idea with smart data analytics and entertainment theory cannot guarantee a hit, it systematically and substantially increases the probability of success in the entertainment industry. Entertainment Science is poised to inspire fresh new thinking among managers, students of entertainment, and scholars alike. Thorsten Henning-Thurau and Mark B. Houston – two of our finest scholars in the area of entertainment marketing

- have produced a definitive research-based compendium that cuts across various branches of the arts to explain the phenomena that provide consumption experiences to capture the hearts and minds of audiences. Morris B. Holbrook, W. T. Dillard Professor Emeritus of Marketing, Columbia University Entertainment Science is a must-read for everyone working in the entertainment industry today, where the impact of digital and the use of big data can't be ignored anymore. Henig-Thurau and Houston are the scientific frontrunners of knowledge that the industry urgently needs. Michael Kölmel, media entrepreneur and Honorary Professor of Media Economics at University of Leipzig Entertainment Science's winning combination of creativity, theory, and data analytics offers managers in the creative industries and beyond a novel, compelling, and comprehensive approach to support their decision-making. This ground-breaking book marks the dawn of a new Golden Age of fruitful conversation between entertainment scholars, managers, and artists. An excellent book. The authors have the rare capacity to handle popular culture and case studies in a theoretically informed manner. Original and well researched - Mike Featherstone, Nottingham Trent University Understandings of globalization have been little explored in relation to gender or related concerns such as identity, subjectivity and the body. This book contrasts 'the natural' and 'the global' as interpretive strategies, using approaches from feminist cultural theory. The book begins by introducing the central themes: ideas of the natural; questions of scale and context posed by globalization and their relation to forms of cultural production; the transformation of genealogy; and the emergence of interest in definitions of life and life forms. The authors explore these questions through a number of case studies including Benneton advertising, Jurassic Park, The Body

Shop, British Airways, Monsanto and Dolly the Sheep. In order to respecify the 'nature, culture and gender' concerns of two decades of feminist theory, this highly original book reflects, hypothesizes and develops new interpretive possibilities within established feminist analytical frames.

(Beginning Piano Solo Songbook). 14 of Williams' most beloved themes from movies arranged so even beginning pianists can sound great, including: Harry's Wondrous World * Hymn to the Fallen * The Imperial March (Darth Vader's Theme) * Theme from "Jaws" * Theme from "Jurassic Park" * Raiders March * Rey's Theme * Theme from "Schindler's List" * Star Wars (Main Theme) * and more.

The perfect gift for fans of The Big Lebowski, Jeff Bridges's "The Dude", and anyone who could use more Zen in their lives. Zen Master Bernie Glassman compares Jeff Bridges's iconic role in The Big Lebowski to a Lamed-Vavnik: one of the men in Jewish mysticism who are "simple and unassuming," and "so good that on account of them God lets the world go on." Jeff puts it another way. "The wonderful thing about the Dude is that he'd always rather hug it out than slug it out." For more than a decade, Academy Award-winning actor Jeff Bridges and his Buddhist teacher, renowned Roshi Bernie Glassman, have been close friends. Inspiring and often hilarious, The Dude and the Zen Master captures their freewheeling dialogue and remarkable humanism in a book that reminds us of the importance of doing good in a difficult world.

As the Internet and World Wide Web continue to influence corporate and private activities, systems are needed that mimic human-to-human interface, to simplify the human-to-computer interface. Intelligent Agents are likely to play a significant role in the design of such interfaces, and this book explores how they could influence media-based systems. Throughout, the text maps out the consid-

erable advances that have already been made, paving the way toward a future where computers will be truly described as an intelligent aid to our personal and business lives.

A film-centric portrait of the extraordinarily gifted movie director whose decades-long influence on American popular culture is unprecedented Everything about me is in my films, Steven Spielberg has said. Taking this as a key to understanding the hugely successful moviemaker, Molly Haskell explores the full range of Spielberg's works for the light they shine upon the man himself. Through such powerhouse hits as Close Encounters of the Third Kind, E.T., Jurassic Park, and Indiana Jones, to lesser-known masterworks like A.I. and Empire of the Sun, to the haunting Schindler's List, Haskell shows how Spielberg's uniquely evocative filmmaking and story-telling reveal the many ways in which his life, work, and times are entwined. Organizing chapters around specific films, the distinguished critic discusses how Spielberg's childhood in non-Jewish suburbs, his parents' traumatic divorce, his return to Judaism upon his son's birth, and other events echo in his work. She offers a brilliant portrait of the extraordinary director a fearful boy living through his imagination who grew into a man whose openness, generosity of spirit, and creativity have enchanted audiences for more than 40 years.

A stimulating and unusually wide-ranging collection of essays overviewing ways in which music functions in film soundtracks.

(Educational Piano Library). Spike, Party Cat and friends guide the student through fun and creative assignments that introduce the language of music and its symbols for sound, silence, and rhythm. Ear training and basic theory exercises help students learn to write and play the music they are learning as well as the music they create themselves. Correlates to Piano Lessons Book 1. This marvelous, comprehensive medley of the endearing themes from the movie Harry Potter and the Sorcerer's Stone has now been arranged by Robert W. Smith. The vivid imagery of the film is woven into the varied textures of this symphonic band medley. Wonderful symphonic literature you should not miss. (8: 00)
