De George: Business Ethics and The International Legal Coordination Problem Takao Katsuragi:

On Multi-Value Structure or Market Ethics Francois Ost / Mark van Hoecke: From contract to transmission Robert Isaak: Philosophical Bases of oGreen Logico.

This important book, the fifth in the Civil Procedure in Europe series, provides a comparative overview, of 13 EU countries and Switzerland, on the law of evidence. Each country's practice in this area is described and analysed by a national expert distinguished in the field of civil procedural law. The contributions are written in either English, French or German, and are followed by summaries in both remaining languages. Bibliographies are included to enable the reader to locate material for further study. A comparative contribution by the editor, Professor Jose Lebre de Freitas, analyses the similarities and differences between the various European systems. Further-

more, the editor discusses attempts to harmonise the law of evidence in Europe and provides concrete suggestions for a future harmonisation or unification of this area of law. The countries covered are Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, The Netherlands, Portugal, Spain, Sweden and Switzerland.

"A view of the civil government and administration of justice in the province of Canada while it was subject to the crown of France," by William Hey: 48 p. at end of v. 1.

The association's Report of the executive council, 1913/15, includes papers prepared for a proposed 1914 conference at the Hague.

The International Tribunal for the Law of the Sea is an independent judicial body established by the United Nations Convention on the Law of the Sea

to adjudicate disputes arising out of the interpretation and application of the Convention. This volume contains the texts of the judicial decisions rendered by the Tribunal in the year 2014 in English and French.

The American Law Institute and UNIDROIT (International Institute for the Unification of Private Law) are preeminent organizations working toward the clarification and advancement of the procedural rules of law. Recognizing the need for a 'universal' set of procedures that would transcend national jurisdictional rules and facilitate the resolution of disputes arising from transnational commercial transactions, Principles and Rules of Transnational Civil Procedure was launched to create a set of acceptable rules and principles that would be accepted globally. This work strives to reduce uncertainty for parties obliged to litigate in unfamiliar surroundings and promote fairness in judicial judgments. As recognized standards of civil justice, Principles and Rules of Transnational Civil Procedure can be used in pleadings, development, and presentation of evidence, legal argument, and tribunal judgments such as arbitration. The re-

sult is a work which significantly contributes to the promotion of a universal rule of law norm.

Un avocat de retour d'un voyage trouve son épouse (depuis 31 ans) suicidée. Il est de plus engagé dans la défense de son beau-frère accusé de malversation à la Bourse auxquelles sont mêlées sa fille et son gendre. Une enquête diaboliquement décrite.

This challenging volume contains articles by a wide variety of well-known scholars and practitioners, and deals with human rights, international humanitarian law, international criminal law and humanitarian assistance, as well as other areas of international law relating to the protection of humanity. These are topics to which Flavia Lattanzi, in whose honour the volume is being published, has made an outstanding contribution and to which she has given her determined and unrelenting professional and personal commitment. As a former Professor at the Universities of Pisa, Sassari, Teramo and Roma Tre and as Judge ad litem at the International Tribunal for Rwanda and the International Tribunal for the Former Yugoslavia, she has adhered constant-

ly to a number of important principles, as reflected in the research contained in this volume. They include the firm conviction that respect for human rights is an indispensable precondition for durable peace; the notion that grave breaches of human rights, including the refusal to provide assistance to populations in distress, can imply a threat to international peace and security; and that guarantees against human rights violations include the question of the punishment of core crimes under International Law.

La mise en place d'un logiciel sans défaut reste primordiale pour plusieurs domaines qui requièrent des applications dites de sécurité comme les transports. La réalisation d'un modèle formel est l'approche la plus efficace pour atteindre l'objectif du zéro défaut, que ce soit en termes de temps ou de maîtrise de la complexité. Ce modèle permet d'analyser et de vérifier le comportement d'un logiciel. Cet ouvrage présente la méthode B, une méthode formelle s'appuyant sur la preuve de propriétés qui, sur la base d'une spécification et de la notion de raffinement, permet d'aller jusqu'à la produc-

tion automatique de code. Différents outils découlant de cette méthode ainsi que des exemples concrets d'utilisations industrielles de différentes tailles sont aussi exposés dans des domaines tels que l'avionique ou les systèmes manufacturiers.

The Czech Yearbooks Project, for the moment made up of the Czech Yearbook of International Law® and the Czech (& Central European) Yearbook of Arbitration®, began with the idea to create an open platform for presenting the development of both legal theory and legal practice in Central and Eastern Europe and the approximation thereof to readers worldwide. This platform should serve as an open forum for interested scholars, writers, and prospective students, as well as practitioners, for the exchange of different approaches to problems being analyzed by authors from different jurisdictions, and therefore providing interesting insight into issues being dealt with differently in many different countries. The Czech (& Central European) Yearbook of Arbitration®, the younger twin project within the Czech Yearbooks, primarily focuses on the problematic of arbitration from both the

national and international perspective. The use of arbitration as a method of dispute resolution continues to increase in importance. Throughout Central and Eastern Europe, arbitration is viewed as being progressive, due to its practical aspects, and to its meeting the needs of specialists in certain practice areas. Central and Eastern Europe, the primary, but not exclusive, focus of this project, is steeped in the Roman tradition of continental Europe, in which arbitration is based on the autonomy of the parties and on informal procedures. This classical approach is somewhat different from the principles on which the system of arbitration in common-law countries is based. Despite similarities among countries in the region, arbitration in Central and Eastern Europe represents a highly particularized and fragmented system. One shortcoming in the use of arbitration in Central and Eastern Europe is the absence of comparative standards or a baseline that would facilitate the identification of commonalities and differences in individual countries, and help resolve problems that are common throughout the region. The CYArb® project

aims to address this issue and provide a forum for comparisons of arbitration practice and doctrine in countries within the region, and in relation to practices internationally. It sheds light on both practical and academic aspects within these countries, and compares those approaches to broader European and international practices. This project will also foster a broad exchange of legal research and other information on the subject. The third volume of the CYArb® focuses on the blurry area which borders the procedural and substantial law. Editors, being motivated with an endeavour to provide the readers with complex insight into the problematic, invited authors of Civil same as Common law jurisdictions to provide their insight and analysis on the problems of i.e. mandatory provisions of procedural same as substantive law, issues of application of law in arbitration, adjudication according to the *ex aequo et bono* principles, issues of the burden and standard of proof and others. The issues are presented on highly comparative basis provided mostly by practitioners who are simultaneously involved in academic activities. The

book is divided into four sections. The backbone sections encompass the doctrinal articles of the authors same as case law analysis of the domestic courts from the region relating to the topic, covering the case law of Constitutional, General same as Arbitral courts of the countries from the Central European Region. The rest of the book covers the news in the arbitration area same as interesting arbitration events or published articles and books of the authors from the region. The new volume of the The Czech (& Central European) Yearbook of Arbitration® : Borders of Procedural and Substantive Law in Arbitral Proceedings (Civil versus Common Law Perspectives) brings useful resource for everyone who is dealing with arbitration in all of its aspects, be it an academic, practitioner, law or international relations student who seeks global compendium on the issue including an overlap to economic and politic aspects of the problematic.

Si vous avez lu et aimé Le Petit Prince et si vous aimez les devinettes, ce livre vous intéressera probablement. Que veut dire la "magnifique image" du début du livre de

Saint-Exupéry? La plupart des lecteurs ne la trouvent pas "magnifique" bien au contraire. Seulement, ceux qui savent que "l'essentiel est invisible pour les yeux" voient là une invitation à s'instruire et à réfléchir. Le "chapeau" qui est en réalité bien autre chose est une autre invitation à chercher au-delà des apparences. En lisant ce livre d'une admiratrice de Saint-Exupéry vous verrez ce que représentent la Forêt Vierge mentionnée à la première page, le pilote, le petit prince, l'éternel cache-nez d'or du petit prince et le merveilleux "renard." Vous verrez ce que sont vraiment "les enfants." Vous saisirez le sens profond de la guerre des "moutons" contre "la rose." Vous reconnaîtrez le symbolisme universel de l'arbre, de la corde, de la roue et du puits de science. Vous serez édifiés par l'expérience de l'astronome Turc. Vous verrez comme tout cela se rattache aux événements et à la politique actuels car, comme le remarque l'auteur de ce livre, "tout cela se tient." Vous vous poserez peut-être une question passionnante: Saint Exupéry voyait-il l'avenir? C'est pourquoi le Petit Prince a comme le

dit finalement son auteur: "tellement d'importance." If you have read and loved The Little Prince and if you like riddles, this book will probably interest you. What is the meaning of the "magnificent image" at the beginning of that book? Most readers do not find it magnificent, on the contrary. Yet, those who know that "the essential is invisible to the eyes" see in it an invitation to learn and to think. The "hat" that actually is something quite different is another invitation to look beyond appearance. As you read this book by an admirer of Saint-Exupéry, you will see what is represented by the Virgin Forest mentioned on the first page

La vidéosurveillance fait désormais partie des outils utilisés dans les politiques sécuritaires. Les récentes évolutions techniques rendent son usage de plus en plus intrusif dans la vie privée mais aussi dans l'espace public. Cet ouvrage explore une dimension encore inédite de la vidéosurveillance. Elle réside dans le caractère automatique de la détection des « comportements anormaux » dans l'espace public. L'anormalité est un enjeu fondamental dans la définition de la citoyenneté, en établissant

sant une frontière entre ce qui est jugé acceptable et ce qui doit être réprimé. Or, des projets de recherches appliqués récents tentent de coupler l'usage de la vidéosurveillance avec une évaluation automatique de l'anormalité. Désormais, les algorithmes contribuent à définir ces comportements anormaux et donc,

dessinent les figures de l'anormal. L'automatisme modifie considérablement les capacités d'appréciation de la normalité, jusqu'ici de la compétence du juge et des pouvoirs publics. La convergence des techniques (vidéo, base de données informatiques...) contribue à modifier profondément les frontières de l'espace public et, par con-

séquent, de l'espace démocratique. L'ouvrage présente les débats interdisciplinaires qui ont eu lieu à l'occasion d'une application technique actuellement en cours. S'interroger sur ce qu'est un comportement anormal permet de rappeler les modalités d'élaboration de la normalité dans une démocratie.
