Why do we assess reading? What do we assess when we assess reading? How, where, and when do we assess reading? Reading instruction and assessment expert Peter Afflerbach addresses these questions and much more in the 3rd edition of Understanding and Using Reading Assessment, K-12. Using the CURRV model to evaluate reading assessment methods—including reading inventories, teacher questioning, performance assessment, and high-stakes reading tests—Afflerbach considers the consequences and usefulness of each method, the roles and responsibilities of key stakeholders, and the reliability and validity of the assessments. In addition, he examines four important but often overlooked aspects of reading assessment: • Assessment accommodation for English-language learners and students with special needs • Assessment of noncognitive aspects of reading, such as motivation, engagement, self-concept, and self-efficacy • The use of formative and summative assessment • The importance of self-assessment in building reading independence The book provides detailed case studies from all grade levels to illustrate reading assessment done well. It also includes 15 reproducible forms and checklists that teachers and administrators can use to optimize their reading assessment efforts. Students are expected to read increasingly complex texts and to complete increasingly complex reading-related tasks to demonstrate their growth as readers. This book offers teachers and administrators alike a clear path to helping students meet those expectations. This book is a co-publication of ASCD and ILA. New to the 3rd edition: • New chapter "Formative and Summative Assessment" • Three significantly revised chapters—Performance Assessment; Assessment Accommodation for English Learners and Students With Special Needs ("Accommodation and Reading Assessment" in 2nd edition); Assessing "the Other": Important Noncognitive Aspects of Reading • Fifteen reproducible and downloadable forms and checklists

The Test of English as a Foreign Language™ (TOEFL®) is used by more universities worldwide than any other test to assess English language proficiency for academic admission and placement decisions, and to guide English language instruction. This landmark volume provides a detailed description and analysis of Educational Testing Service's research and development efforts to develop a major revision of the TOEFL® test. The result is a book that serves as a case study of test design drawing upon theory in the complex domain of English language proficiency while attempting to meet standards of educational measurement. Building a Validity Argument for the Test of En-

glish as a Foreign Language™ is distinctive in its attempt to develop a coherent story of the rationale for a test or its revision, explain the research and development process, and provide the results of the validation process. Through its treatment of one test, it expands on and tests principles and approaches to educational measurement, providing an in-depth, integrated perspective on the overall process of test revision. Moreover, because the conceptual foundation and history are presented alongside the empirical studies and validity argument, these sometimes disparate areas are presented in a way that demonstrates their connections – an approach which represents a departure from, or extension of, conventional materials on test revision. This volume is particularly relevant for professionals and graduate students in educational measurement, applied linguistics, and second language acquisition as well as anyone interested in assessment issues.

Shadowing, an active and highly cognitive technique for EFL listening skill development, in which learners track heard speech and vocalize it simultaneously, is gradually becoming recognized. However, there remain a lot of mysteries and misunderstandings about it. This book uncovers shadowing in terms of theory and practice. This book cements shadowing as a separate technique from other similar techniques such as Elicited Imitation, Mirroring, and simple repetition, and provides ample empirical data to explain the function of Shadowing. It also elaborates on how Shadowing should be used in terms of materials, procedure, and learners' psychology, which would aid in instructors' use of Shadowing in teaching. A guide on a method effective in improving learners' bottom-up listening skills, this book will certainly prove useful to English Language learners and instructors in their linguistic pursuits.
