Magento Business Intelligence (MBI) is a cloud-based data management and analytics platform. MBI provides you with the ability to easily consolidate and manage your data sources, model your data, create charts and reports, and maintain a single source of truth.

2 of 4 Using the Extension Common Scenarios First lets talk about the normal order flow when using this payment method to understand when orders are created and when they are available for capture funds (User-Guide#authorize-at- purchase-time.- capture-at-shipment-time) or refund (User-Guide#processing-refunds) actions. Authorize only and Synchronous Mode

This guide is intended for web storeowners and first-time users of Magento CE. It provides a quick guide through the most important steps for getting your web store up and running and ready for selling online. The options described in this user guide enable you to generate a feature-rich and attractive eCommerce interface without the need for advanced technical expertise.

Being an owner of a global Magento 2 store, you must know better than anyone the challenges of running a multiple store view ecommerce. GEOIP Store Switcher for Magento 2 will bring up user experiences in multi-store website to a whole new level. The

extension helps detect user's IP location and redirect them to the appropriate store view. 2.

Magento is an open-source e-commerce platform written in PHP. It uses multiple other PHP frameworks such as Laminas and Symfony. Magento source code is distributed under Open Software License v3.0. Magento was acquired by Adobe Inc in May 2018 for \$1.68 Billion USD. The software was originally developed by Varien Inc., a US private company headquartered in Culver City, California, with assistance from volunteers. More than 100,000 online stores have been created on this platform. The platform co To download and install the latest release of Magento 2.4.x on your server, see the Installation and Configuration in our developer documentation. The Magento installation can be deployed to run in either production or developer mode.

Social Login for Magento 2 Extension allows customers to sign through social media accounts like Facebook, Twitter, Google Plus... quickly via Ajax pop-up. They can sign up or login on a site quickly within a few clicks instead of wasting time filling in register or login form.
