Mathemagic! Number Tricks : Lynda Colgan : Free Download ...

A related trick is to take any three-digit number. Multiply it by 7, 11, and 13. The result will be a six-digit number that repeats the three-digit number. Example: 456 becomes 456456. 05. of 10. The 11 Rule . This is a quick way to multiply two-digit numbers by 11 in your head.

Mathemagic Number Tricks

This trick uses the binary number system which is based on the number 2. Look at the number in the top left-hand corner of each card: 1, 2, 4, 8, & 16. Each number has been multiplied by 2 to get the next number. They are called powers of 2. The rest of the numbers on each card have these powers of 2 as parts of their numbers.
