Divinity is worshipped in all forms conceivable by the human mind. Lord Rama is an incarnation. Anjaneya is a devotee, and loyal companion and servant of Lord Rama, but by his own merit, Anjaneya is wor-

shipped by Hindus in awe and admiration of the godliness in him. Anjaneya's story is not complete without the story of Rama, known as Ramayana. In this book, following Anjaneya's birth, childhood, education, Rama enters the great monkey's life. What follows is the confluence of divinities. This confluence and the ensuing flow of the story have been instilled in the mindset of generations of Indian minds. The mythology says that Anjaneya is Chiranjeevi, an immortal. Whether Anjaneya actually existed, and whether he was a Chiranjeevi is not important; however, he is a Chiranjeevi in the minds of thousands and millions of Indians. Sun Wukong is an extraordinary monkey character appearing in a Chinese mythology, Journey to the West. Anjaneya and Sun Wukong share many resemblances. Immortality is not about being present in a physical form, but about being present in the minds of more than two billion people in the world.

Arturo Marone called his pear brandy the Elixir. His family calls it the Nectar of the Gods. Doc thinks they might be right. A former serviceman, Doc's been at loose ends since his forced exit from a savage military career. His promising university professorship is terminated when it's discovered he fabricated a portion of his resume. Since then he's been wandering, picking up jobs where he can. While working as a carpenter in Houston, Doc is invited to the Texas Hill Country home of Maggie Marone. There he meets Maggie's family and samples Arturo's pear brandy for the first time. Unfortunately, Arturo, Maggie's husband, disappeared four years ago, amid rumors that his fortune came from dealing drugs. Maggie wants to find her husband, or at least determine whether or not he's still alive. Intrigued, Doc agrees to help track the man down. The only clues available come from Arturo's occasional correspondence, forming a patchwork trail of churches, monasteries, communes, and reservations. As Doc retraces Arturo's steps, he finds a complex web of people who knew, admire, and loved the missing man. Something more than drug dealing accounts for Arturo's disappearance—a mystery tied to the magical power of the Elixir.

The collection of drawings at the Getty Museum was started in 1981 with the purchase of Rembrandt's *Nude Woman with a Snake* and has steadily expanded since then, so that now, at the turn of the new millennium, it stands at more than six hundred drawings and is, sheet for sheet, one of the best anywhere. The Getty goal is to create from the finest examples a collection of the different Western European schools of drawing before 1900, with special emphasis on the work of the most important and accomplished draftsmen. The collection now contains superb examples of the work of Leonardo da Vinci, Raphael, Michelangelo, Dürer, Rembrandt, Claude Lorraine, Watteau, Gainsborough, David, Millet, Manet, Van Gogh, and Degas. This is the fourth in the series of catalogues describing the drawings in the Getty Museum. Most of the drawings discussed in the present volume were chosen for the collection in the period of 1994 to 1998 and include examples from the Italian, German, Dutch and Flemish, French, Spanish, and British schools. Also included are several gifts from private collectors, which mark the start of a tradition that, it is hoped, will continue in the future. The catalogue entries for these new acquisitions are organized first by national school and then by artist. The book also includes a bibliography and indexes of artists, former owners, related drawings, prints, and works in other media.

An exploration of humans' symbiotic relationships with plants and chemicals presents information on prehistoric partnership societies, the roles of spices and spirits in the rise of dominator societies; and the politics of tobacco, tea, coffee, opium, and alcohol. Why, as a species, are humans so fascinated by altered states of consciousness? Can altered states reveal something to us about our origins and our place in nature? In *Food of the Gods*, ethnobotanist Terence McKenna's research on man's ancient relationship with chemicals opens a doorway to the divine, and perhaps a solution for saving our troubled world. McKenna provides a revisionist look at the historical role of drugs in the East and the West, from ancient spice, sugar, and rum trades to marijuana, cocaine, synthetics, and even television—illustrating the human desire for the “food of the gods” and the powerful potential to replace abuse of illegal drugs with a shamanic understanding, insistence on community, reverence for nature, and increased self-awareness. Praise for *Food of the Gods* “Deserves to be the modern classic on mind-altering drugs and hallucinogens.”—The Washington Post “Terence McKenna is the most important—and most entertaining—visionary scholar in America.”—Tom Robbins “The culture's foremost spokesperson for the psychedelic experience . . . Those who know and enjoy Joseph Campbell's work will almost certainly appreciate McKenna.”—L.A. Weekly “An eloquent proposal for recovering something vital—a sense of the sacred, the transcendent, the Absolute—before it's too late.”—Larry Dossey, M.D., author of *Meaning & Medicine, Recovering the Soul, and Space, Time & Machine*

Consulting plant spirits for spiritual and psychological guidance and healing • Reveals how, by communing with the deva or spirit of a plant, we can call forth its medicine without even needing to ingest it • Includes wisdom from the devas of 13 herbs, such as rosemary, datura, and uva ursi • Empowers readers with the tools to develop their own inner resources for healing in relationship with the plant devas around them Each plant has a story to share with us, a healing story to guide us in trying times, a spirit medicine for the New Earth that is presently unfolding. Herbs are some of the most powerful allies we have for these transitional times--we just need to learn how to listen as they share their knowledge with us. In *Wisdom of the Plant Devas*, Thea Summer Deer reveals a new dimension of herbal medicine, one where the plant's spirit is consulted for guidance and healing beyond the physical. Examining the botany, modern and traditional uses, history, and folklore of 13 special herbs, such as rosemary, uva ursi, and datura, she shares divinations and messages from their devas, or plant spirits, explaining how these stories carry the herbs into our lives, letting them work their magic on us. Exploring herbal medicine from an energetic perspective, she reveals that by communing with the deva of a plant, we can call on the plant's physical, psychological, and spiritual medicine and guidance--without ingesting

it or even being in its presence. Detailing the sacred space of a Medicine Wheel Garden, whether in a backyard or our imaginations, she connects us with the devas and empowers us to seek our own answers with their much-needed spiritual guidance and divinatory advice. Creating a bridge between botanical medicine and plant spirit medicine, she shows how by coming into community with the devas and co-creating with the world of nature, we can gain tremendous insights to help heal our hearts, our minds, and our spirits and consciously evolve as together we birth the New Earth. The Author sheds important new light on addiction, so that both individuals and professionals can make more informed choices. Drawing on extensive research with drug users and his rehabilitation work as a psychologist, Ron Dunselman offers remarkable insights into: why drugs are so attractive to users; the origin and history of drugs; detailed descriptions of the physical and psychological effects of each drug; how drugs undermine personal identity.
