05C - SINGH TALIAH

This book contains a broad selection of revision questions, giving excellent coverage of the most common and important problems in paediatrics and child health. Based on real scenarios, these questions are aimed at doctors training in paediatrics and general practice. They are ideal revision material for postgraduate examinations and for those wishing to test their knowledge of paediatrics. Key features: over 140 case-history based questions; well-illustrated, many in full colour; comprehensive coverage of all paediatric issues; and ideal revision material for DCH, MRCPCH, MRCGP and the MCQ part of the summative assessment for GPs.

Medical school is full of unfamiliar and often frightening experiences for students. In the first year, a student must move away from home, balance personal finances, assimilate large volumes of information, learn practical skills, pass high stakes exams, and face a range of unique experiences. The Oxford Handbook for Medical School provides an essential, practical guide for all students, whether you have just received your offer, you're eager to succeed on the wards, or you're about to start your final exams. This handbook includes quick-access summaries covering the crucial information for your preclinical years and for each clinical specialty. With bullet lists of the key information you need to know, and helpful mnemonics throughout, this is a concise yet thoroughly comprehensive guide. Written by a team of recent students, now successfully graduated and embarking on their careers, this book will be your closest companion right up to graduation. More than a survival guide, it will help you navigate the bewildering range of opportunities medical school offers, showing you how to make the most of your time, so you are fully prepared for your future career.

This invaluable guide to the GPVTS supports trainees from the process of application, through to qualification and beyond. Written by a recently qualified general practitioner, it combines a frank and friendly approach with a wealth of insider knowledge to guide the trainee through each stage of the training process. It not only features real-life case studies from those in training or who have recently completed training but also gives handy hints and tips on how to avoid some of the common trainee pitfalls. This first hand account aims to guide trainees through all the highs and lows of train.

Doctors often lack the skills needed to give them a competitive edge over their colleagues. Despite being academically gifted they leave medical school after six years ill equipped to attain their own career goals. Management skills that are often the most basic to those working for private companies are left out of their undergraduate training. Some simple tips, strategies and well researched advice will empower doctors to develop their own unique career pathway and help them achieve suc-

cess in their professional life. This book is for all newly qualified doctors. It systematically and logically examines the entire hospital doctor and GP career process from start to finish, dispelling common myths and advising doctors on how to break down their career into sections and tackle them one at a time. Planning a career should be like sitting an exam. Each chapter is devoted to one aspect of the career pathway from how to choose the right job for you through to FY1, FY2 and ST jobs, and covering application forms, exams, the interview process, audit and finally publications. This book helps to answer specific questions such as: Should I apply for jobs in multiple deaneries to increase my chances of success? What do those questions on the application form really mean? Exactly what type of questions will come up in my interview? Which postgraduate exam should I choose, how will I get through it and when should I sit it? How can I excel in an audit and make a difference to my department? How do I get published and which journals should I choose? Brimming with sound practical advice, hints, tips with its readily accessible style and approach, this text is an essential purchase for all doctors embarking on their career.

Reflecting the latest exam formats, this book provides essential revision for those taking the Paediatric Membership exams - MRCPCH Papers 1a and 1b, and DCH diploma. Features over 500 completely up-to-date questions. Includes subject-based chapters for focussed revision. Includes all question formats likely to be encountered in the exam - BOF, MCQs and EMQs. Contains expanded answers to every question, helping students build understanding and confidence for success. Written by experienced, practising Paediatric Specialist Registrars, and edited by renowned author R Mark Beattie.

A book of 120 practice data interpretation questions and answers to help candidates prepare for this section of the MRCP Part II (Paeds) examination. Answers are explained and reflect the marking system. All common laboratory results are represented and the range of topics is wide. Questions are grouped randomly into mock papers to simulate the exam situation. The MRCP part II (Paeds) includes a 45 min 'data interpretation section' consisting of 10 laboratory results eg ECGs, EEGs, audiograms etc. The candidate will be asked to give likely diagnosis(es) and further investigations required. This title is one of the new Paediatric Revision Series - 5 titles all of which should be published by April 1995 in time for the annual BPA (British Paediatric Association) meeting. Winrow: 100 Paediatric Picture Tests (published January 1994), Field et al: Grey Cases for Paediatric Examinations, Stephenson/O'Callaghan: Data Interpretation for Paediatric Examinations, Stephenson/Wallace: Clinical Paediatrics for Postgraduate Examination 2E, Cade et al: An Aid to the Paediatric MRCP viva. The paediatric MRCP is sat 3 times a year (January, April, September) with the viva following on 6 weeks after the written examination.

This book describes the history of the Royal College of Paediatrics and Child Health (RCPCH) covering the period from 1988 to 2014, which includes the transition from the British Paediatric Association (BPA) to the formation of the now established RCPCH. The book contains a collection of viewpoints from paediatricians who held officer posts with the association and College through this time. The authors offer insights and reflections to help the reader understand where the College is at the moment on a variety of core paediatric issues, and significantly where it has come from. The formation of the RCPCH from the BPA was very controversial, with some members resigning from the RCP. Since then, the College has come a long way and is now recognised as the definitive body to speak for children's health in the UK and has forged relationships with many overseas countries. It has produced influential documents, and lobbied for advances in the practice of paediatrics. It has reported on standards for how children should be cared for in emergency and urgent care settings, launched policy to improve how children are looked after in the secure estate, and produced teaching and training materials for child protection among many other contributions to child health. Finally, it will be of interest to other Colleges and professional bodies as well as to Members and Fellows of the College.

Comprising five exam papers, each with a random selection of 60 questions which allow readers to assess their knowledge of a wide range of topics, this text is aimed at students who will be sitting the Part 1 Examination for the Paediatric Membership of the Royal College of Physicians. The answers to the questions are given, along with explanations to assist with filling in the gaps of the reader's knowledge. A PC disk is included for self-assessment purposes.

This companion book to Volume 1 contains chapters on Infectious Diseases, Metabolic Medicine, Neonatology, Neurology, Ophthalmology, Respiratory, Rheumatology and Statistics.

Surviving the journey through the Royal Australasian College of Physicians (RACP) examinations requires grit, courage and hard work. The second edition of How To Pass the RACP Written and Clinical Exams is fully updated to help candidates - and those who teach them - dig deep to maximise their chances of success. This insider's guide takes the candidate through the whole process, from preparing for the Written Exam, through to presenting short and long cases in the Clinical Exam. The au-

thors' experiences are combined with tips from recent candidates, wisdom from RACP examiners and advice from specialist contributors. Additional chapters for post-exam registrars and supervisors include career planning, providing feedback, preparing for interviews, and organising the Clinical Exam. As well as comprehensive guidance for adult medicine candidates, this new edition includes 'Paeds Points' for paediatrics trainees. Containing a wealth of information, pearls of wisdom, real-life examples and practical advice, this light-hearted insider's guide makes the path through the grueling RACP exams far easier.

Essential Paediatrics and Child Health is a comprehensive and practical guide to paediatric disorders as they present to the student and practitioner, offering step-by-step guidance on symptom assessment, history taking, physical examination, investigation and diagnosis, management and treatment, patient education, follow-up and prognosis. With full-colour images and a range of unique and innovative learning features, this completely revised new edition of the award-winning book Paediatrics and Child Health will prove an invaluable resource for medical students and junior doctors on their journey through contemporary paediatrics. Organises paediatric disorders into system-based chapters for easy navigation, with symptom-based and integrative discussions of all the important diseases and disabilities in paediatrics Combines up-to-date descriptions of the latest in basic and clinical science with the core competencies expected of students in paediatric rotations Self-directed learning is made easy by means of navigation diagrams, tables, key-point and "at-a-glance" boxes, links to guidelines and other summary aids Sections on student experience, self-assessment, doing well in paediatric clinical placements and preparing for examinations and OSCEs Includes a completely new introduction with perspectives on the nature of paediatrics and how best to become engaged and immersed within it, and new content on communication, national guidelines, imaging techniques, genetics and epigenetics, prescribing for children toxicology, the latest advances in diagnosing and treating disease, and much more Provides a companion website containing physical examination instruction videos, a complete set of interactive patient scenarios and multiple-choice questions Essential Paediatrics and Child Health is the ideal companion for medical students and junior doctors to succeed in their studies and clinical practice.

The essential guide to passing the MRCPCH Applied Knowledge in Practice (AKP) exam. Closely aligned to the Royal College of Paediatrics and Child Health (RCPCH) theory examination syllabus and also reflective of current UK practice. Applied Knowledge in Paediatrics will leave the reader with a sound knowledge of all the core topics relevant to paediatrics and child health. It will also provide a useful study aid for those undertaking the MRCPCH Applied Knowledge in Practice examination. The book covers how and why illnesses develop in children and young people, the appropriate investigations and treatment required, the urgency of implementation and the impact of the disease process on the child and their family. This comprehensive text is edited by Dr Martin Hewitt, a Senior Theory Examiner for the AKP examination, and Dr Roshan Adappa a Senior clinician and postgraduate trainer, with expert input from more than 60 paediatric specialists. 33 chapters provide comprehensive information of all areas of paediatric practice. Directly aligned to the Applied Knowledge in Practice syllabus and examination 50 sample questions along with answers and reasoning explaining each of the answer options Chapter on how to prepare for the RCPCH AKP examination Clinical scenarios in each chapter outlining difficult clinical problems and proposed management plans Clinical

images to aid understanding Level of detail to support clinical practice of paediatricians with 12-18 months experience

A book of six exam papers structured in a similar format and at the same level of the MRCP (Paediatric) exam. Each paper consists of 10 data interpretation questions, 5 grey cases and 20 picture tests.

A unique reference book covering the relevant basic sciences of cardiac anatomy, physiology and pharmacology through to the initial clinical assessment and investigation. It covers the core curricula for paediatricians in training at all levels including the MRCPCH and DCH examinations. This book is relevant to paediatricians in training, general practitioners, emergency department staff and specialist nurses. General staff working in specialist regional cardiac centres and healthcare professionals involved in the care of children and young people will also find this essential resource extremely useful. 'The aim of this handbook is to provide a rapid and reliable reference to congenital and acquired cardiac problems. It is very well organised, provides a more detailed discussion of cardiac physiology and pathophysiology and a comprehensive guide to ECG interpretation. It should be of particular interest to paediatricians in training, including those studying for higher professional examinations, but it also provides a valuable source of reference for paediatricians already in practice.' From the Foreword by Dr Christopher Wren

Written by Peter De Halpert and Ian Pollock, this text contains four practice papers for the new format Basic Child Health examination, giving an accurate reflection of the papers found in the exam.

Suitable for aspiring paediatricians who want to pass MRCPCH Part 1 examination, this book includes over 350 questions that are of a combination of MCQs, EMQs and Best of Fives to reflect the balance of questions in the exam and offer targeted, effective revision. It incorporates changes to the MRCPCH Part 1 exam.

Examining children presents unique challenges for trainees and new doctors in paediatrics. Paediatric patients vary greatly in age and development, often find it difficult to describe their symptoms, and can behave unpredictably in clinical settings. Clinical Examination Skills in Paediatrics helps MRCPCH candidates and other practitioners learn effective history taking and fundamental examination

techniques. Clear and concise chapters—with contributions from a team of paediatric specialists—demonstrate the clinical examination and questioning techniques used in daily practice. Emphasis on the intellectual processes involved in decision making assists both trainees preparing for a formal examination as well as new clinicians faced with a difficult diagnostic problem. Topics include cardiovascular and respiratory examination, examining a child with a neuromuscular disorder, musculoskeletal examination, and taking history from a child with diabetes and a rheumatological condition. Includes access to a companion website containing high-quality videos that demonstrate techniques, procedures and approaches Features commentary by experienced practitioners which offer observations and deductions at each stage of the examination process Offers tips for communicating effectively with the patients using appropriate lay terms Helps translate the symptoms and signs experienced by patients into medical-speak Covers all the skills tested in the MRCPCH Clinical exam Clinical Examination Skills in Paediatrics is the perfect study and reference guide for paediatrics trainees, MRCPCH candidates, foundation doctors, allied healthcare professionals, and anyone looking to improve their clinical and communication skills in paediatrics.

Paediatrics and Child Health is the perfect textbook to prepare you for clinical practice - providing a comprehensive and practical guide to paediatric disorders as they present to the practitioner, and grouped together by system for easy navigation. From birth through to adolescence, the emphasis is on common and important paediatric problems. This is the only book that takes each symptom and walks you through history taking and physical examination step-by-step. Each section concludes with characteristics and features of the symptoms covered, allowing you to reach differential diagnoses in a logical, highly-structured way. A unique feature are the videos, accessible via your desktop edition, that accompany the book. Designed to enhance your clinical skills and help you in OSCEs, they show you how to examine children correctly. This third edition has been substantially updated throughout and includes new chapters on cardiac conditions and social paediatrics. Beautifully presented, with many new illustrations and photographs, favourite features such as 'at a glance' and 'clues to the diagnosis' boxes are back, with new 'red flag' boxes to signal the crucial information you need. The self-assessment section allows you to check your knowledge and prepare

for paediatrics exams. Paediatrics and Child Health is the perfect resource for a course on paediatrics, and is accompanied by a FREE enhanced Wiley Desktop Edition - the interactive digital version of the book with downloadable text and images, highlighting and note-taking facilities, bookmarking, cross-referencing, in-text searching, and linking to references and glossary terms. Paediatrics and Child Health is also supported by fully downloadable figures and illustrations at www.wiley.com/go/rudolf/paediatrics.
