Plant taxonomy is one of the major branches of taxonomy. It is a science that deals with identification, classification and naming of plants. As discussed earlier whole nature is classified into three kingdoms. One among them is the plant kingdom which is divided into two main categories i.e. plants which can produce seed and plants which cannot produce seeds.

---

What is Taxonomy? - Examples, Levels, & Classification ...

(a) Basic characteristics of Kingdom Plantae (i) Plants are multicellular, autotrophic, eukaryotes. (ii) Possess cell walls made of a carbohydrate called cellulose and store food in the form of starch. (iii) The cell wall gives the plant cell strength and remains after the cell dies. In trees we call this wood.
