The Wildlife of Southern Africa: A Field Guide to the ...

Southern Africa is a globally recognized centre of biodiversity richness and endemism. It has 66 888 plant species (including medicinals) of which 3 666 are endemic. About 80% of the region's population relies on medicinal plants for its primary health care needs. However, medicinal plant diversity is in decline due to a variety of reasons.

Traditional Medicinal Plant Practice in Southern Africa

Of all the plants in the rich Southern African flora, none offer the gardener more beauty and variety than the geophytes (commonly referred to as bulbous plants- which include bulbs, corms, rhizomes and tubers). Yet the recent surge of interest in cultivating indigenous plants has for the most part strangely passed them by.
