The average age for menopause is about 52, so reaching menopause between the ages of 40 and 45 is considered early. Celine Loup / for NBC News Nov. 1, 2020, 1:39 PM UTC

The Secret Power of Menopause. Why the end of fertility doesn't mark the start of decline—and may even help explain our success as a species. Liza Mundy. October 2019 Issue.

The Power of Perimenopause explains how symptoms such as irregular cycles, night sweats and insomnia, decreased libido, memory lapses, and mood swings can be traced to fluctuating hormones. It gives detailed recommendations on how to use both conventional and alternative approaches to lessen symptoms, including the most up-to-date research and new treatments.
