Presumptive And Confirmatory Forensic Tests

Confirmatory tests, by contrast, are slower, harder to perform, more expensive, less sensitive, but extremely specific. They are typically used on samples that have passed presumptive/preliminary tests (to do otherwise would be a waste of time and money). Confirmatory tests offer only two answers: “Yes” and “No”.

FAQ - Guardian Forensic Sciences

A confirmatory test is required only when the presumptive test report is positive for the substance. It then confirm the substance's identity or measures the percentage purity or other quantitative analysis. The presence of a substance, even at a trace level, can be detected by a presumptive test.
