Welcome to the new world of TMNT! After the cataclysmic events of "City At War," the Turtles find New York City drastically changed--new factions and enemies are on the rise, and allies are in short supply. The Turtles discover that in order to survive they will need to work together like never before, but when they find themselves separated, Old Hob decides to fill the power vacuum with some very unusual mutants: Zanna, Mushroom, and Zink! Collects issues #101-105 of the Teenage Mutant Ninja Turtles series.

Stephane Kirkland gives an engrossing account of Napoleon III, Baron Haussmann, and one of the greatest transformations of a major city in modern history Traditionally known as a dirty, congested, and dangerous city, 19th Century Paris, France was transformed in an extraordinary period from 1848 to 1870, when the government launched a huge campaign to build streets, squares, parks, churches, and public buildings. The Louvre Palace was expanded, Notre-Dame Cathedral was restored and the French masterpiece of the Second Empire, the Opéra Garnier, was built. A very large part of what we see when we visit Paris today originates from this short span of twenty-two years. The vision for the new Nineteenth Century Paris belonged to Napoleon III, who had led a long and difficult climb to absolute power. But his plans faltered until he brought in a civil servant, Georges-Eugène Haussmann, to take charge of the implementation. Heedless of controversy, at tremendous cost, Haussmann pressed ahead with the giant undertaking until, in 1870, his political enemies brought him down, just months before the collapse of the whole regime brought about the end of an era. Paris Reborn is a must-read for anyone who ever wondered how Paris, the city universally admired as a standard of urban beauty, became what it is.

A vampire falls in love with a forbidden human.

Airpower Reborn offers a conceptual approach to warfare that emphasizes airpower's unique capability to achieve strategic effects. Six world-leading theorists argue that a viable strategy must transcend the purely military sphere, view the adversary as a multi-dimensional system, and pursue systemic paralysis and strategic effects rather than military destruction or attrition. The book is divided into three parts. The first section presents a historical perspective on airpower theory and airpower strategy, tracing their evolution from the 1920s to the 1980s. The second section contains in-depth examinations of the strategic concepts that John R. Boyd and John A. Warden developed in the 1980s and 1990s, with an emphasis on their contemporary relevance. The final section provides further context on modern airpower theory and strategy. Theory, in this setting, serves as

the basic paradigm, strategy represents its generic, mechanisms-centered application, and plans of campaign constitute the specific steps for any given situation. In short, the authors look beyond the land-centric, battlefield-oriented paradigm that has continued to dominate military theories and strategies long after airpower offered new options. The book acknowledges the essential role of advanced technology in improving airpower capabilities, but emphasizes that air services must cultivate and harness the intellectual acumen of airmen and encourage officers and men to think conceptually and strategically about the application of aerospace power. Modern airpower can offer political decision-makers more and better options--provided the underlying strategy coherently links the application of airpower directly to the end-state objectives rather than limiting it to "the battle." The book recommends that all countries should consider establishing a dynamic and vibrant environment for mastering aerospace history, theory, strategy, and doctrine; a milieu for cultivating broader knowledge of and insight into airpower; and a setting in which airpower experts have the opportunity to communicate their narrative to politicians, the media, and fellow officers, and to interact to mutual benefit with experts from all sectors of governance. This effort should emphasize the potentially unique contribution of airpower to political objectives and joint operations, and in turn connect to operational headquarters that do operational planning. Mastering such strategic thought lies at the heart of the military profession, but it requires in-depth knowledge and understanding of theory, strategy, and airpower, and transcends traditional metrics.

A theoretical physicist describes his new approach for thinking about the reality of time and explains his theory about the laws of physics not being timeless but rather capable of evolving.

In our self-help, DIY culture, we love the idea of improvement. We make-over wardrobes and restore houses and commit ourselves to better habits. But we're still left feeling empty and not-quite-enough. That's because what we need is not an upgrade but a complete upending of our lives. We need to be reborn. And it's not something we can do by ourselves. With deep compassion, Clayton King shares the compelling stories of 12 broken people who came face-to-face with Jesus in the New Testament and got a second chance at life. A respected religious leader, an ostracized woman, a despised embezzler, a condemned thief--all of them flawed, sinful, full of regret--encountered Jesus and were never the same. Along with their stories, King shares contemporary stories of people struggling with addiction, lust, greed, and depression, showing that Jesus still meets people right where they are and changes them from the inside out. If you're tired of going through the religious motions by your own power and long to experience the radical life and heart change that Jesus promised, it's time for an encounter with Jesus. It's time to be reborn.

"Beyond the battles themselves, Glantz also presents an in-depth portrait of the Red Army as an evolving military institution. Assessing more clearly than ever before the army's size, strength, and force structure, he provides keen insights into its doctrine, strategy, tactics, weaponry, training, officer corps, and political leadership. In the process, he puts a human face on the Red Army's commanders and soldiers, including women and those who served in units - security (NKVD), engineer, railroad, auto-transport, construction, and penal forces - that have till now remained poorly understood."--BOOK JACKET.

In 2011, a Montana contractor removed the first pieces from two concrete dams on the Elwha River which cuts through the Olympic range. It was the beginning of the largest dam removal project ever undertaken in North America--one dam was 200 feet tall--and the start of an unprecedented attempt to restore an entire ecosystem. More than 70 miles of the Elwha and its tributaries course from the mountain headwaters to clamming beaches on the Strait of Juan de Fuca. Through interviews, field work, archival and historical research, and photojournalism, The Seattle Times has explored and reported on the dam removal, the Elwha ecosystem, its industrialization, and now its renewal. Elwha: A River Reborn is based on these features. Richly illustrated with stunning photographs, as well as historic images, graphics, and a map, Elwha tells the interwoven stories of this region.

'I intend to do everything . . . I shall anticipate pleasure everywhere and find it too, for it is everywhere! I shall involve myself wholly . . . everything matters!' This first selection from Susan Sontag's diaries (from 1947 - 1963) takes us from early adolescence though to when Sontag was in her early thirties. It is an astonishingly affecting and honest self-portrait which is also a fascinating, revealing account of an artist and critic being born. We see Sontag honing her skills and fashioning herself, by a supreme act of will, into an intellectual force. 'Inspirational. Sontag shows us not just the importance, but the exhilaration of being earnest' New Statesman 'One can feel Sontag's mind beginning to ripen and bloom, and the full force of the intellectual originality that would be her hallmark emerging' Guardian 'A fascinating document of her apprenticeship, charting her earnest quest for education, identity and voice. Reborn is overwhelmingly a record of an inner landscape' New York Review of Books

"BRAVE NEW WORLD" BY DAVID BISHOP A year after the fateful events of the Odessa Summit, the world is a very different place. It's certainly no longer friendly for Evolved Humans—or "Evos"—who are held responsible for what happened. If the government doesn't find you, there are some tenacious and merciless Evo-hunters out there who will. Based on Tim Kring's original drafts of the script for the season premiere of Heroes Reborn and includes content not seen in the TV show. "A MATTER OF TRUST" BY TIMOTHY ZAHN As the number of Evolved Humans increases,

so does the pressure from the governments and people of the world. Father Mauricio begins searching for a way to help all Evos after befriending a troubled teenager who possesses a devastating secret. As a priest, it is Father Mauricio's calling to protect the innocent and this includes the Evos who, by no fault of their own, find their lives and freedom being threatened. "DIRTY DEEDS" BY STEPHEN BLACKMOORE A veteran Federal agent begins investigating the involvement of ruthless Los Angeles Police Department detective James Dearing in the death of an Evolved Human. But when she gets close to uncovering a dangerous truth, it could cost him everything: his job, his freedom, maybe even his life. THREE BRAND-NEW NOVELLAS BASED ON NBC'S WORLD-WIDE HIT TV SERIES HEROES, AND THE EPIC EVENT SERIES HEROES REBORN.

#1 New York Times bestselling author J. R. Ward's "different, creative, dark, violent, and flat-out amazing"* Black Dagger Brotherhood series continues as a vampire warrior crosses the line between life and death...into a world of dark dreams and darker desires. Ever since the death of his shellan, Tohrment has been a heartbroken shadow of the vampire leader he once was. Brought back to the Brotherhood by a self-serving fallen angel, he fights again with ruthless vengeance, unprepared for a new tragedy. Seeing his beloved in dreams—trapped in a cold, isolated netherworld—Tohr turns to the angel Lassiter to save his former mate. The only way to rescue her is for Tohr to love another. As war with the lessers rages, and a new clan of vampires vie for the Blind King's throne, Tohr struggles between an unforgettable past and a hot, passion-filled future. But can his heart let go and set all of them free? * All About Romance

Katie Price returns with this incredible new instalment of her life in the public eye. But only now is she ready to tell her story. After finding love with Kieran, Katie thought she had found the man of her dreams and that happy-ever-after was possible after all. But she soon finds that being in the perfect relationship isn't easy. From her turbulent marriage, her difficult pregnancy and birth to her beautiful baby Bunny, to her time in the Big Brother House, and the continued challenges of looking after her disabled son, Katie finally lifts the lid on the trials and tribulations of the past few years. Written with the fierce honesty and humour we've come to love, she tells us how she's carried on despite the heartbreak in her life, coming out the other side reborn and ready for whatever life throws at her while remaining positive, strong, and throughout it all, true to herself and her family.

One man's battle to get his life back after locked-in stroke left him totally paralysed. Peter Coghlan is an ordinary bloke whose life is transformed, for the second time, after a knock to the head. So begins an extraordinary story of recovery. Peter takes the reader on a journey that will appeal to those who can relate to Peter's circumstances as well as those wanting to understand what it means to be 'locked-in', what it takes to break free and how to build a new life. A story told in two parts, it is (at times) uncomfortable, drawing the reader into a reality where what happens is not in his control; but Peter's easy dialogue, honesty and irrepressible humour make that journey very well worth taking with him. Be prepared to laugh, cringe and cry. His story offers some answers, but also raises many questions about the obstacles to overcome and what 'success' can look and feel like, as well as shining a light on how society can view people with disabilities. Despite many setbacks and difficulties, at the heart of this story is an acknowledgement of the sacrifices he and others made, with a deep appreciation of the love, care and professionalism shown by those helping him along the way to becoming Peter Coghlan - reborn.

Mihai Spariosu here explores the significance of the closely linked concepts of play and aestheticism in philosophical and scientific discourse since the end of the eighteenth century. Spariosu points out that since its birth in archaic and classical Hellenic thought the concept of play has always been subject to the influences of various rational and prerational sets of values. Spariosu maintains that there have been not one but two major modern concepts of aestheticism: artistic aestheticism, related to a prerational mentality and introduced in modern thought by Schopenhauer and Nietzsche; and philosophical scientific aestheticism, initiated by Kant and Schiller and shaped by rationalism. According to Spariosu, the first has often arisen in response to the attempts of philosophy and science to impose their standards on art, and the second has often been called on to deal with the epistemological crises that periodically shake these disciplines. Spariosu also looks closely at some of the play concepts that surface in modern science in connection with the Darwinian theory of evolution and the play of scientific discourse itself, as exemplified by the new physics and the contemporary philosophy of science. A penetrating and cogently argued book, Dionysus Reborn will be welcomed by readers interested in Continental philosophy, scientific discourse, and the aesthetics of play, including literary theorists, comparatists, philosophers, intellectual historians, and social scientists.

In 1996, the hottest creators of the day - including Jim Lee, Rob Liefeld and Whilce Portacio - teamed up to reimagine and reinvigorate Marvel mainstays such as Captain America, Thor, Iron Man, the Avengers and the Fantastic Four. Seemingly killed off in the mainline Marvel Universe, the House of Ideas' most popular heroes were reborn with bold new looks on a brave new world, their origins re-envisioned with a raw vitality and contemporary sensibility. The Fantastic Four are Reborn, but it could be a short and unworldly life as menaces emerge from the earth, the sea and Latveria! In The Age of Entanglement, Louisa Gilder brings to life one of the pivotal debates in twentieth century physics. In 1935, Albert Einstein famously showed that, according to the quantum theory, separated particles could act as if intimately connected—a phenomenon which he derisively described as “spooky action at a distance.” In that same year, Erwin Schrödinger christened this correlation “entanglement.” Yet its existence was mostly ignored until 1964, when the Irish physicist John Bell demonstrated just how strange this entanglement really was. Drawing on the papers, letters, and memoirs of the twentieth century’s greatest physicists, Gilder both humanizes and dramatizes the story by employing the scientists’ own words in imagined face-to-face dialogues. The result is a richly illuminating exploration of one of the most exciting concepts of quantum physics.

"... a major study of the poetry." -- Sandra M. Gilbert, New York Times Book Review "... the first book-length study to approach H.D. from a feminist perspective.... Psyche Reborn is a valuable book not only for H.D. specialists but also for those interested in twentieth-century intellectual history." -- Cheryl Walker, Signs "... lucid, deeply informed assessment..." -- Joanne Felt Diehl, Tulsa Studies in Women's Literature "Indiana University Press should be heartily commended for promoting Psyche Reborn in paperback, hence making this vital critical work more widely available." -- Lesbian and Gay Studies Newsletter "... a richly documented, polemical, and intelligent study... The American Revolution Reborn parts company with the American Revolution of our popular imagination and renders it as a time of intense ambiguity and frightening contingency. With an introduction by Spero and a conclusion by Zuckerman, this volume heralds a substantial and revelatory rebirth in the study of the American Revolution.

Asia Reborn unveils the story of Asia's resurgence over the past century. In the first single chronicle of the modern economic and political history of the whole continent, Prasenjit K. Basu weaves together a compelling account of how Asia's nations overcame European domination in the twentieth

century-and its legacies of war and famine-to begin the long climb to economic dynamism. Asia Reborn shows British, Dutch and French colonies to have had scant infrastructure or modern industry and to have consequently been far behind Taiwan, Manchuria and Korea in social indicators such as literacy and life expectancy by mid-century. In West Asia and Burma, the brief European imprint created the ethnic conflicts that still plague these regions. The British Indian Army held the edifice of empire together. Ultimately, it was the undermining of its legitimacy by the armies of Subhas Bose, Sukarno, Ho Chi Minh and Aung San that helped end the ravaging of Asia during the first half of the twentieth century. By the end of the century, the eastern part of the liberated continent, had emulated Japan and Singapore in transforming itself into an industrious, dynamic and increasingly creative force finally capable of taking its people to new heights in an Asian twenty-first century.

Edmund D. Pellegrino has played a central role in shaping the fields of bioethics and the philosophy of medicine. His writings encompass original explorations of the healing relationship, the need to place humanism in the medical curriculum, the nature of the patient's good, and the importance of a virtue-based normative ethics for health care. In this anthology, H. Tristram Engelhardt, Jr., and Fabrice Jotterand have created a rich presentation of Pellegrino's thought and its development. Pellegrino's work has been dedicated to showing that bioethics must be understood in the context of medical humanities, and that medical humanities, in turn, must be understood in the context of the philosophy of medicine. Arguing that bioethics should not be restricted to topics such as abortion, third-party-assisted reproduction, physician-assisted suicide, or cloning, Pellegrino has instead stressed that such issues are shaped by foundational views regarding the nature of the physician-patient relationship and the goals of medicine, which are the proper focus of the philosophy of medicine.

Shadow Falls vampire Della Tsang teams up with a boy who might break her heart in order to save everyone she cares about from a new threat.

In industrialized societies, professionals have long been valued and set apart from other workers because of their specialized knowledge and skill. But has their role in these societies declined? Of what significance are they today? In this concise synthesis of the major debates about the professions since World War II, Eliot Freidson explores several broad questions about professionalism today—what it is, what its future is likely to be, and its value to public policy. Freidson argues that because professionalism is based on specialized knowledge, it is distinct from either bureaucratic or market-based forms of work. He predicts a rebirth of the professions during which practitioners lose some of their independence and become more accountable to standards of a professional elite. And, defending professionalism as a desirable method of providing complex, discretionary services to the public, Freidson argues that market-based or bureaucratic methods would impoverish the quality of service to consumers, and suggests ways the virtues of professionalism can be reinforced. The most accessible survey available of almost fifty years of theory and research by the scholar whose own work helped define the field, this book will appeal to the growing international body of scholars concerned with studying and theorizing about the professions.

Aside from her rock star looks, Catra Corbett is a standout in the running world on her accomplishments alone. Catra is the first American woman to run over one hundred miles or more on more

than one hundred occasions and the first to run one hundred and two hundred miles in the Ohlone Wilderness, and she holds the fastest known double time for the 425-miles long John Muir Trail, completing it in twelve days, four hours, and fifty-seven minutes. And, unbelievably, she's also a former meth addict. After two years of addiction, Catra is busted while selling, and a night in jail is enough to set her straight. She gives up drugs and moves back home with her mother, abandoning her friends, her boyfriend, and the lifestyle that she came to depend on. Her only clean friend pushes her to train for a 10K with him, and surprisingly, she likes it—and decides to run her first marathon after that. In *Reborn on the Run*, the reader keeps pace with Catra as she runs through difficult terrain and extreme weather, is stalked by animals in the wilderness, and nearly dies on a training run but continues on, smashing running records and becoming one of the world's best ultrarunners. Along the way she attempts suicide, loses loved ones, falls in love, has her heartbroken, meets lifelong friends including her running partner and dachshund TruMan, and finally faces

the past that led to her addiction.
