In 1975 Godfrey published his first book 'Living on the Sun: harnessing renewable energy for an equitable society'. It advanced the then revolutionary idea that industrial countries could wean themselves off fossil fuels and fully power themselves by renewable energy instead.

Professor Godfrey Boyle – Open University

Renewable Energy: Power for a Sustainable Future, is thus a timely and welcome addition to the existing literature on the subject...Godfrey Boyle and his team of authors have, in my view, managed to produce an outstanding textbook in which a wealth of information, including an extensive amount of data, is presented in a lucid and comprehensible form.'
